Preface v

Guided Tour x

Contents xxii

Part I The Molecular Basis of Life 1

- 1 The Science of Biology 1
- 2 The Nature of Molecules and the Properties of Water 17
- 3 The Chemical Building Blocks of Life 33

Part II Biology of the Cell 59

- 4 Cell Structure 59
- 5 Membranes 88
- 6 Energy and Metabolism 107
- 7 How Cells Harvest Energy 122
- 8 Photosynthesis 147
- 9 Cell Communication 168
- 10 How Cells Divide 186

Part III Genetic and Molecular Biology 207

- 11 Sexual Reproduction and Meiosis 207
- 12 Patterns of Inheritance 221
- 13 Chromosomes, Mapping, and the Meiosis-Inheritance Connection 239
- 14 DNA: The Genetic Material 256
- 15 Genes and How They Work 278
- 16 Control of Gene Expression 304
- 17 Biotechnology 327
- 18 Genomics 348
- 19 Cellular Mechanisms of Development 372

Part IV Evolution 396

- 20 Genes Within Populations 396
- 21 The Evidence for Evolution 417
- 22 The Origin of Species 436
- 23 Systematics, Phylogenies, and Comparative Biology 455
- 24 Genome Evolution 473
- 25 Evolution of Development 491

Part V Diversity of Life on Earth 507

- 26 The Origin and Diversity of Life 507
- 27 Viruses 523
- 28 Prokaryotes 540

- 29 Protists 561
- 30 Seedless Plants 585
- 31 Seed Plants 600
- 32 Fungi 617
- 33 Animal Diversity and the Evolution of Body Plans 636
- 34 Protostomes 658
- 35 Deuterostomes 690

Part VI Plant Form and Function 730

- 36 Plant Form 730
- 37 Transport in Plants 755
- 38 Plant Nutrition and Soils 773
- 39 Plant Defense Responses 790
- 40 Sensory Systems in Plants 802
- 41 Plant Reproduction 829

Part VII Animal Form and Function 862

- 42 The Animal Body and Principles of Regulation 862
- 43 The Nervous System 886
- 44 Sensory Systems 914
- 45 The Endocrine System 937
- 46 The Musculoskeletal System 961
- 47 The Digestive System 981
- 48 The Respiratory System 1001
- 49 The Circulatory System 1018
- 50 Osmotic Regulation and the Urinary System 1038
- 51 The Immune System 1055
- 52 The Reproductive System 1084
- 53 Animal Development 1105

Part VIII Ecology and Behavior 1132

- 54 Behavioral Biology 1132
- 55 Ecology of Individuals and Populations 1162
- 56 Community Ecology 1185
- 57 Dynamics of Ecosystems 1207
- 58 The Biosphere 1230
- 59 Conservation Biology 1256

Appendix A: Answer Key A-1

Glossary G-1

Credits C-1

Index I-1

Contents

Preface v

Guided Tour x

Part

The Molecular Basis of Life

1 The Science of Biology 1

- 1.1 The Science of Life 1
- 1.2 The Nature of Science 4
- 1.3 An Example of Scientific Inquiry: Darwin and Evolution 8
- 1.4 Unifying Themes in Biology 12

2 The Nature of Molecules and the Properties of Water 17

- 2.1 The Nature of Atoms 18
- 2.2 Elements Found in Living Systems 22
- 2.3 The Nature of Chemical Bonds 23
- 2.4 Water: A Vital Compound 25
- 2.5 Properties of Water 28
- 2.6 Acids and Bases 29

3 The Chemical Building Blocks of Life 33

- 3.1 Carbon: The Framework of Biological Molecules 34
- 3.2 Carbohydrates: Energy Storage and Structural Molecules 38
- 3.3 Nucleic Acids: Information Molecules 41
- 3.4 Proteins: Molecules with Diverse Structures and Functions 44
- 3.5 Lipids: Hydrophobic Molecules 53

Part

Biology of the Cell

4 Cell Structure 59

- 4.1 Cell Theory 59
- 4.2 Prokaryotic Cells 63
- 4.3 Eukaryotic Cells 65
- 4.4 The Endomembrane System 69
- 4.5 Mitochondria and Chloroplasts: Cellular Generators 73
- 4.6 The Cytoskeleton 75
- 4.7 Extracellular Structures and Cell Movement 79
- 4.8 Cell-to-Cell Interactions 82

5 Membranes 88

- 5.1 The Structure of Membranes 88
- 5.2 Phospholipids: The Membrane's Foundation 92

- 5.3 Proteins: Multifunctional Components 93
- 5.4 Passive Transport Across Membranes 96
- 5.5 Active Transport Across Membranes 99
- 5.6 Bulk Transport by Endocytosis and Exocytosis 102

6 Energy and Metabolism 107

- 6.1 The Flow of Energy in Living Systems 108
- 6.2 The Laws of Thermodynamics and Free Energy 109
- 6.3 ATP: The Energy Currency of Cells 112
- 6.4 Enzymes: Biological Catalysts 113
- 6.5 Metabolism: The Chemical Description of Cell Function 117

7 How Cells Harvest Energy 122

- 7.1 Overview of Respiration 123
- 7.2 Glycolysis: Splitting Glucose 127
- 7.3 The Oxidation of Pyruvate to Produce Acetyl-CoA 130
- 7.4 The Krebs Cycle 131
- 7.5 The Electron Transport Chain and Chemiosmosis 134
- 7.6 Energy Yield of Aerobic Respiration 137
- 7.7 Regulation of Aerobic Respiration 138
- 7.8 Oxidation Without O_2 139
- 7.9 Catabolism of Proteins and Fats 140
- 7.10 Evolution of Metabolism 142

8 Photosynthesis 147

- 8.1 Overview of Photosynthesis 147
- 8.2 The Discovery of Photosynthetic Processes 149
- 8.3 Pigments 151
- 8.4 Photosystem Organization 154
- 8.5 The Light-Dependent Reactions 156
- 8.6 Carbon Fixation: The Calvin Cycle 160
- 8.7 Photorespiration 163

9 Cell Communication 168

- 9.1 Overview of Cell Communication 168
- 9.2 Receptor Types 171
- 9.3 Intracellular Receptors 173
- 9.4 Signal Transduction Through Receptor Kinases 174
- 9.5 Signal Transduction Through G Protein-Coupled Receptors 178

10 How Cells Divide 186

- 10.1 Bacterial Cell Division 187
- 10.2 Eukaryotic Chromosomes 189
- 10.3 Overview of the Eukaryotic Cell Cycle 192
- 10.4 Interphase: Preparation for Mitosis 193
- 10.5 M Phase: Chromosome Segregation and the Division of Cytoplasmic Contents 194
- 10.6 Control of the Cell Cycle 198

Part

Genetic and Molecular Biology

11 Sexual Reproduction and Meiosis 207

- 11.1 Sexual Reproduction Requires Meiosis 207
- 11.2 Features of Meiosis 209
- 11.3 The Process of Meiosis 210
- 11.4 Summing Up: Meiosis Versus Mitosis 215

12 Patterns of Inheritance 221

- 12.1 The Mystery of Heredity 221
- 12.2 Monohybrid Crosses: The Principle of Segregation 224
- 12.3 Dihybrid Crosses: The Principle of Independent Assortment 228
- 12.4 Probability: Predicting the Results of Crosses 230
- 12.5 The Testcross: Revealing Unknown Genotypes 231
- 12.6 Extensions to Mendel 232

13 Chromosomes, Mapping, and the Meiosis-Inheritance Connection 239

- 13.1 Sex Linkage and the Chromosomal Theory of Inheritance 240
- 13.2 Sex Chromosomes and Sex Determination 241
- 13.3 Exceptions to the Chromosomal Theory of Inheritance 244
- 13.4 Genetic Mapping 244
- 13.5 Selected Human Genetic Disorders 249

14 DNA: The Genetic Material 256

- 14.1 The Nature of the Genetic Material 256
- 14.2 DNA Structure 259
- 14.3 Basic Characteristics of DNA Replication 263
- 14.4 Prokaryotic Replication 266
- 14.5 Eukaryotic Replication 271
- 14.6 DNA Repair 273

15 Genes and How They Work 278

- 15.1 The Nature of Genes 278
- 15.2 The Genetic Code 282
- 15.3 Prokaryotic Transcription 284
- 15.4 Eukaryotic Transcription 287
- 15.5 Eukaryotic pre-mRNA Splicing 289
- 15.6 The Structure of tRNA and Ribosomes 291
- 15.7 The Process of Translation 293
- 15.8 Summarizing Gene Expression 297
- 15.9 Mutation: Altered Genes 299

16 Control of Gene Expression 304

- 16.1 Control of Gene Expression 304
- 16.2 Regulatory Proteins 305
- 16.3 Prokaryotic Regulation 308
- 16.4 Eukaryotic Regulation 312
- 16.5 Eukaryotic Chromatin Structure 316
- 16.6 Eukaryotic Posttranscriptional Regulation 317
- 16.7 Protein Degradation 322

17 Biotechnology 327

- 17.1 Recombinant DNA 327
- 17.2 Introducing Foreign DNA into Cells 330
- 17.3 Amplifying DNA Without a Vector—The Polymerase Chain Reaction 332
- 17.4 Storing and Sorting DNA Fragments 334
- 17.5 Analyzing and Creating DNA Differences 335
- 17.6 Medical Applications 339
- 17.7 Agricultural Applications 342

18 Genomics 348

- 18.1 Mapping Genomes 348
- 18.2 Sequencing Genomes 352
- 18.3 Characterizing Genomes 355
- 18.4 Comparing Genomes 360
- 18.5 From Genes to Proteins 362
- 18.6 Applications of Genomics 366

19 Cellular Mechanisms of Development 372

- 19.1 The Process of Development 372
- 19.2 Cell Division 373
- 19.3 Cell Differentiation 375
- 19.4 Nuclear Reprogramming 380
- 19.5 Pattern Formation 383
- 19.6 Morphogenesis 390

Part

IV Evolution

20 Genes Within Populations 396

- 20.1 Genetic Variation and Evolution 396
- 20.2 Changes in Allele Frequency 398
- 20.3 Five Agents of Evolutionary Change 401
- 20.4 Quantifying Natural Selection 405
- 20.5 Natural Selection's Role in Maintaining Variation 406
- 20.6 Selection Acting on Traits Affected by Multiple Genes 408
- 20.7 Experimental Studies of Natural Selection 410
- 20.8 Interactions Among Evolutionary Forces 412
- 20.9 The Limits of Selection 413

21 The Evidence for Evolution 417

- 21.1 The Beaks of Darwin's Finches: Evidence of Natural Selection 418
- 21.2 Peppered Moths and Industrial Melanism: More Evidence of Selection 420
- 21.3 Artificial Selection: Human-Initiated Change 422
- 21.4 Fossil Evidence of Evolution 424
- 21.5 Anatomical Evidence for Evolution 427
- 21.6 Convergent Evolution and the Biogeographical Record 430
- 21.7 Darwin's Critics 432

22 The Origin of Species 436

- 22.1 The Nature of Species and the Biological Species Concept 437
- 22.2 Natural Selection and Reproductive Isolation 441
- 22.3 The Role of Genetic Drift and Natural Selection in Speciation 443
- 22.4 The Geography of Speciation 444

- 22.5 Adaptive Radiation and Biological Diversity 446
- 22.6 The Pace of Evolution 451

23 Systematics, Phylogenies, and Comparative Biology 455

- 23.1 Systematics 455
- 23.2 Cladistics 457
- 23.3 Systematics and Classification 460
- 23.4 Phylogenetics and Comparative Biology 463
- 23.5 Phylogenetics and Disease Evolution 469

24 Genome Evolution 473

- 24.1 Comparative Genomics 473
- 24.2 Genome Size 476
- 24.3 Evolution Within Genomes 481
- 24.4 Gene Function and Expression Patterns 484
- 24.5 Applying Comparative Genomics 486

25 Evolution of Development 491

- 25.1 Evolution of Developmental Patterns 491
- 25.2 Single-Gene Changes and the Alteration of Form and Function 494
- 25.3 Different Ways to Evolve the Same Structure 499
- 25.4 Diversity of Eyes in the Natural World: A Case Study 501

Part

V Diversity of Life on Earth

26 The Origin and Diversity of Life 507

- 26.1 Deep Time 509
- 26.2 Origins of Life 511
- 26.3 Evidence for Early Life 513
- 26.4 Earth's Changing System 514
- 26.5 Ever-Changing Life on Earth 517

27 Viruses 523

- 27.1 The Nature of Viruses 524
- 27.2 Bacteriophage: Bacterial Viruses 528
- 27.3 Human Immunodeficiency Virus (HIV) 530
- 27.4 Other Viral Diseases 534
- 27.5 Prions and Viroids: Subviral Particles 536

28 Prokaryotes 540

- 28.1 Prokaryotic Diversity 540
- 28.2 Prokaryotic Cell Structure 545
- 28.3 Prokaryotic Genetics 548
- 28.4 Prokaryotic Metabolism 553
- 28.5 Human Bacterial Disease 554
- 28.6 Beneficial Prokaryotes 557

29 Protists 561

- 29.1 Eukaryotic Origins and Endosymbiosis 562
- 29.2 Overview of Protists 564
- 29.3 Lack of Typical Mitochondria in Excavata 566
- 29.4 Secondary Endosymbiosis in Chromalveolata 569
- 29.5 Chloroplasts in Archaeplastida 577
- 29.6 Slender Pseudopods in Rhizaria 578
- 29.7 Blunt Pseudopods in Amoebozoans 580
- 29.8 Propulsion via a Single Posterior Flagellum in Opisthokonts 581

30 Seedless Plants 585

- 30.1 Origin of Land Plants 585
- 30.2 Bryophytes: Dominant Gametophyte Generation 588
- 30.3 Tracheophyte Plants: Roots, Stems, and Leaves 591
- 30.4 Lycophytes: Dominant Sporophyte Generation and Vascular Tissue 594
- 30.5 Pterophytes: Ferns and Their Relatives 594

31 Seed Plants 600

- 31.1 The Evolution of Seed Plants 600
- 31.2 Gymnosperms: Plants with "Naked Seeds" 601
- 31.3 Angiosperms: The Flowering Plants 605
- 31.4 Seeds 611
- 31.5 Fruits 612

32 Fungi 617

- 32.1 Defining Fungi 617
- 32.2 Microsporidia: Unicellular Parasites 621
- 32.3 Chytridiomycota and Relatives: Fungi with Flagellated Zoospores 622
- 32.4 Zygomycota: Fungi That Produce Zygotes 623
- 32.5 Glomeromycota: Asexual Plant Symbionts 625
- 32.6 Basidiomycota: The Club (Basidium) Fungi 625
- 32.7 Ascomycota: The Sac (Ascus) Fungi 626
- 32.8 Ecology of Fungi 628
- 32.9 Fungal Parasites and Pathogens 632

33 Animal Diversity and the Evolution of Body Plans 636

- 33.1 Some General Features of Animals 637
- 33.2 Evolution of the Animal Body Plan 638
- 33.3 Animal Phylogeny 642
- 33.4 Parazoa: Animals That Lack Specialized Tissues 647
- 33.5 Eumetazoa: Animals with True Tissues 649
- 33.6 The Bilateria 654

34 Protosomes 658

- 34.1 The Clades of Protostomes 659
- 34.2 Platyzoans: Flatworms (Platyhelminthes) 660
- 34.3 Platyzoans: Rotifers (Rotifera) 663
- 34.4 Lophotrochozoans: Mollusks (Mollusca) 664
- 34.5 Lophotrochozoans: Ribbon Worms (Nemertea) 670
- 34.6 Lophotrochozoans: Annelids (Annelida) 671
- 34.7 Lophophorates: Bryozoans (Bryozoa) and Brachiopods (Brachiopoda) 674
- 34.8 Ecdysozoans: Roundworms (Nematoda) 676
- 34.9 Ecdysozoans: Arthropods (Arthropoda) 678

35 Deuterostomes 690

- 35.1 Echinoderms 691
- 35.2 Chordates 694
- 35.3 Nonvertebrate Chordates 695
- 35.4 Vertebrate Chordates 696
- 35.5 Fishes 698
- 35.6 Amphibians 703
- 35.7 Reptiles 706
- 35.8 Birds 712
- 35.9 Mammals 716
- 35.10 Evolution of the Primates 721

Part VI Plant Form and Function

36 Plant Form 730

- 36.1 Organization of the Plant Body: An Overview 731
- 36.2 Plant Tissues 734
- 36.3 Roots: Anchoring and Absorption Structures 740
- 36.4 Stems: Support for Above-Ground Organs 744
- 36.5 Leaves: Photosynthetic Organs 749

37 Transport in Plants 755

- 37.1 Transport Mechanisms 756
- 37.2 Water and Mineral Absorption 760
- 37.3 Xylem Transport 762
- 37.4 Rate of Transpiration 764
- 37.5 Water-Stress Responses 766
- 37.6 Phloem Transport 768

38 Plant Nutrition and Soils 773

- 38.1 Soils: The Substrates on Which Plants Depend 773
- 38.2 Plant Nutrients 777
- 38.3 Special Nutritional Strategies 779
- 38.4 Carbon-Nitrogen Balance and Global Change 782
- 38.5 Phytoremediation 785

39 Plant Defense Responses 790

- 39.1 Physical Defenses 791
- 39.2 Chemical Defenses 793
- 39.3 Animals That Protect Plants 796
- 39.4 Systemic Responses to Invaders 797

40 Sensory Systems in Plants 802

- 40.1 Responses to Light 802
- 40.2 Responses to Gravity 807
- 40.3 Responses to Mechanical Stimuli 809
- 40.4 Responses to Water and Temperature 811
- 40.5 Hormones and Sensory Systems 813

41 Plant Reproduction 829

- 41.1 Reproductive Development 830
- 41.2 Making Flowers 832
- 41.3 Structure and Evolution of Flowers 837
- 41.4 Pollination and Fertilization 840
- 41.5 Embryo Development 846
- 41.6 Germination 852
- 41.7 Asexual Reproduction 855
- 41.8 Plant Life Spans 856

Part VII Animal Form and

Function

42 The Animal Body and Principles of Regulation 862

- 42.1 Organization of the Vertebrate Body 863
- 42.2 Epithelial Tissue 864

- 42.3 Connective Tissue 867
- 42.4 Muscle Tissue 869
- 42.5 Nerve Tissue 871
- 42.6 Overview of Vertebrate Organ Systems 872
- 42.7 Homeostasis 875
- 42.8 Regulating Body Temperature 877

43 The Nervous System 886

- 43.1 Nervous System Organization 887
- 43.2 The Mechanism of Nerve Impulse Transmission 889
- 43.3 Synapses: Where Neurons Communicate with Other Cells 895
- 43.4 The Central Nervous System: Brain and Spinal Cord 900
- 43.5 The Peripheral Nervous System: Sensory and Motor Neurons 908

44 Sensory Systems 914

- 44.1 Overview of Sensory Receptors 915
- 44.2 Mechanoreceptors: Touch and Pressure 916
- 44.3 Hearing, Vibration, and Detection of Body Position 919
- 44.4 Chemoreceptors: Taste, Smell, and pH 924
- 44.5 Vision 927
- 44.6 The Diversity of Sensory Experiences 933

45 The Endocrine System 937

- 45.1 Regulation of Body Processes by Chemical Messengers 938
- 45.2 Actions of Lipophilic Versus Hydrophilic Hormones 943
- 45.3 The Pituitary and Hypothalamus: The Body's Control Centers 946
- 45.4 The Major Peripheral Endocrine Glands 951
- 45.5 Other Hormones and Their Effects 955

46 The Musculoskeletal System 961

- 46.1 Types of Skeletal Systems 962
- 46.2 A Closer Look at Bone 963
- 46.3 Joints and Skeletal Movement 967
- 46.4 Muscle Contraction 969
- 46.5 Modes of Animal Locomotion 975

47 The Digestive System 981

- 47.1 Types of Digestive Systems 982
- 47.2 The Mouth and Teeth: Food Capture and Bulk Processing 984
- 47.3 The Esophagus and the Stomach: The Early Stages of Digestion 985
- 47.4 The Intestines: Breakdown, Absorption, and Elimination 987
- 47.5 Variations in Vertebrate Digestive Systems 991
- 47.6 Neural and Hormonal Regulation of the Digestive Tract 993
- 47.7 Accessory Organ Function 994
- 47.8 Food Energy, Energy Expenditure, and Essential Nutrients 995

48 The Respiratory System 1001

- 48.1 Gas Exchange Across Respiratory Surfaces 1002
- 48.2 Gills, Cutaneous Respiration, and Tracheal Systems 1004
- 48.3 Lungs 1006

- 48.4 Structures, Mechanisms, and Control of Ventilation in Mammals 1009
- 48.5 Transport of Gases in Body Fluids 1012

49 The Circulatory System 1018

- 49.1 The Components of Blood 1018
- 49.2 Invertebrate Circulatory Systems 1022
- 49.3 Vertebrate Circulatory Systems 1023
- 49.4 The Four-Chambered Heart and the Blood Vessels 1026
- 49.5 Characteristics of Blood Vessels 1030
- 49.6 Regulation of Blood Flow and Blood Pressure 1034

50 Osmotic Regulation and the Urinary System 1038

- 50.1 Osmolarity and Osmotic Balance 1038
- 50.2 Nitrogenous Wastes: Ammonia, Urea, and Uric Acid 1040
- 50.3 Osmoregulatory Organs 1041
- 50.4 Evolution of the Vertebrate Kidney 1043
- 50.5 The Mammalian Kidney 1045
- 50.6 Hormonal Control of Osmoregulatory Functions 1050

51 The Immune System 1055

- 51.1 Innate Immunity 1055
- 51.2 Adaptive Immunity 1061
- 51.3 Cell-Mediated Immunity 1066
- 51.4 Humoral Immunity and Antibody Production 1068
- 51.5 Autoimmunity and Hypersensitivity 1075
- 51.6 Antibodies in Medical Treatment and Diagnosis 1077
- 51.7 Pathogens That Evade the Immune System 1079

52 The Reproductive System 1084

- 52.1 Animal Reproductive Strategies 1084
- 52.2 Vertebrate Fertilization and Development 1087
- 52.3 Structure and Function of the Human Male Reproductive System 1090
- 52.4 Structure and Function of the Human Female Reproductive System 1094
- 52.5 Contraception and Infertility Treatments 1098

53 Animal Development 1105

- 53.1 Fertilization 1106
- 53.2 Cleavage and the Blastula Stage 1110
- 53.3 Gastrulation 1112
- 53.4 Organogenesis 1116
- 53.5 Vertebrate Axis Formation 1122
- 53.6 Human Development 1125

Part VIII Ecology and Behavior

54 Behavioral Biology 1132

- 54.1 The Natural History of Behavior 1133
- 54.2 Nerve Cells, Neurotransmitters, Hormones, and Behavior 1134
- 54.3 Behavioral Genetics 1135
- 54.4 Learning 1137

- 54.5 The Development of Behavior 1139
- 54.6 Animal Cognition 1141
- 54.7 Orientation and Migratory Behavior 1142
- 54.8 Animal Communication 1144
- 54.9 Behavioral Ecology 1147
- 54.10 Reproductive Strategies and Sexual Selection 1150
- 54.11 Altruism 1154
- 54.12 The Evolution of Group Living and Animal Societies 1157

55 Ecology of Individuals and Populations 1162

- 55.1 The Environmental Challenges 1162
- 55.2 Populations: Groups of a Single Species in One Place 1164
- 55.3 Population Demography and Dynamics 1168
- 55.4 Life History and the Cost of Reproduction 1171
- 55.5 Environmental Limits to Population Growth 1173
- 55.6 Factors That Regulate Populations 1175
- 55.7 Human Population Growth 1178

56 Community Ecology 1185

- 56.1 Biological Communities: Species Living Together 1186
- 56.2 The Ecological Niche Concept 1187
- 56.3 Predator-Prey Relationships 1192
- 56.4 The Many Types of Species Interactions 1196
- 56.5 Ecological Succession, Disturbance, and Species Richness 1202

57 Dynamics of Ecosystems 1207

- 57.1 Biogeochemical Cycles 1208
- 57.2 The Flow of Energy in Ecosystems 1214
- 57.3 Trophic-Level Interactions 1219
- 57.4 Biodiversity and Ecosystem Stability 1223
- 57.5 Island Biogeography 1226

58 The Biosphere 1230

- 58.1 Ecosystem Effects of Sun, Wind, and Water 1230
- 58.2 Earth's Biomes 1235
- 58.3 Freshwater Habitats 1238
- 58.4 Marine Habitats 1241
- 58.5 Human Impacts on the Biosphere: Pollution and Resource Depletion 1245
- 58.6 Human Impacts on the Biosphere: Climate Change 1250

59 Conservation Biology 1256

- 59.1 Overview of the Biodiversity Crisis 1256
- 59.2 The Value of Biodiversity 1261
- 59.3 Factors Responsible for Extinction 1264
