<i>Contributors</i>	vii
<i>Preface</i>	xi
1. Adaptive capacity in ecosystems	1
David G. Angeler, Hannah B. Fried-Petersen, Craig R. Allen, Ahjond Garmestani, Dirac Twidwell, Wen-Ching Chuang, Victoria M. Donovan, Tarsha Eason, Caleb P. Roberts, Shana M. Sundstrom, and Carissa L. Wonka	
1. Introduction	2
2. Definitions and formalization	5
3. Components of adaptive capacity	9
4. Assessing adaptive capacity	13
5. Managing adaptive capacity	16
6. Conclusion	18
Acknowledgements	19
References	19
Further reading	24
2. Extensive grassland-use sustains high levels of soil biological activity, but does not alleviate detrimental climate change effects	25
Julia Siebert, Madhav P. Thakur, Thomas Reitz, Martin Schädler, Elke Schulz, Rui Yin, Alexandra Weigelt, and Nico Eisenhauer	
1. Introduction	26
2. Methods	30
3. Results	43
4. Discussion	47
5. Conclusions and outlook	52
Acknowledgements	53
Author contributions	53
Competing interests	53
References	54
3. Assessing the resilience of biodiversity-driven functions in agroecosystems under environmental change	59
Emily A. Martin, Benjamin Feit, Fabrice Requier, Hanna Friberg, and Mattias Jonsson	
1. Introduction	60

2. The concept of resilience as applied to biodiversity-driven functions in agroecosystems	62
3. The link between indicators and resilience of agroecosystem functions	66
4. Resilience of agroecosystem functions to environmental change	80
5. Operationalizing resilience: A critique and steps ahead	97
Acknowledgements	105
References	105
Further reading	123
 4. Modelling land use dynamics in socio-ecological systems: A case study in the UK uplands	 125
Mette Termansen, Daniel S. Chapman, Claire H. Quinn, Evan D.G. Fraser, Nanlin Jin, Nesha Beharry-Borg, and Klaus Hubacek	
1. Introduction	126
2. Methodology and data	129
3. Conceptual model overview	131
4. Data	132
5. Model formulation and parameterisation	135
6. Results	139
7. Predicted impact on stocking densities	141
8. Predicted impact on burning activities	143
9. Predicted impact on land cover	144
10. Discussion and conclusion	146
Acknowledgements	148
References	149
Further reading	152
 5. Differing perceptions of socio-ecological systems: Insights for future transdisciplinary research	 153
Noa Avriel-Avni and Jan Dick	
1. Introduction	154
2. Objectives and methodology	159
3. Results	165
4. Discussion	178
Acknowledgements	186
References	186
Further reading	190
