Preface: Mechanistic links between biodiversity and ecosystem functioning

xix

1. A multitrophic perspective on biodiversity–ecosystem functioning research

1

Nico Eisenhauer, Holger Schielzeth, Andrew D. Barnes, Kathryn E. Barry, Aletta Bonn, Ulrich Brose, Helge Bruelheide, Nina Buchmann, François Buscot, Anne Ebeling, Olga Ferlian, Grégoire T. Freschet, Darren P. Gilling, Stephan Hättenschwiler, Helmut Hillebrand, Jes Hines, Forest Isbell, Eva Koller-France, Birgitta König-Ries, Hans de Kroon, Sebastian T. Meyer, Alexandru Milcu, Jörg Müller, Charles A. Nock, Jana S. Petermann, Christiane Roscher, Christoph Scherber, Michael Scherer-Lorenzen, Bernhard Schmid, Stefan A. Schnitzer, Andreas Schuldt, Teja Tschardtke, Manfred Türke, Nicole M. van Dam, Fons van der Plas, Anja Vogel, Cameron Wagg, David A. Wardle, Alexandra Weigelt, Wolfgang W. Weisser, Christian Wirth, and Malte Jochum

- 1. What are the key achievements of BEF research? 3
- 2. What are the key challenges of future BEF research? 12
- 3. Concluding remarks 33
- Acknowledgements 34
- References 34

2. Above- and belowground overyielding are related at the community and species level in a grassland biodiversity experiment

55

Kathryn E. Barry, Alexandra Weigelt, Jasper van Ruijven, Hans de Kroon, Anne Ebeling, Nico Eisenhauer, Arthur Gessler, Janneke M. Ravenek, Michael Scherer-Lorenzen, Natalie J. Oram, Anja Vogel, Cameron Wagg, and Liesje Mommer

- 1. Introduction 56
- 2. Methods 60

3. Results	67
4. Discussion	77
5. Conclusions	83
Authorship statement	83
Acknowledgements	83
References	84
3. Lost in trait space: species-poor communities are inflexible in properties that drive ecosystem functioning	91
Anja Vogel, Peter Manning, Marc W. Cadotte, Jane Cowles, Forest Isbell, Alexandre L.C. Jousset, Kaitlin Kimmel, Sebastian T. Meyer, Peter B. Reich, Christiane Roscher, Michael Scherer-Lorenzen, David Tilman, Alexandra Weigelt, Alexandra J. Wright, Nico Eisenhauer, and Cameron Wagg	
1. Introduction	92
2. Methods	97
3. Results	104
4. Discussion	116
5. Conclusions	121
Acknowledgements	122
References	122
4. Terrestrial laser scanning reveals temporal changes in biodiversity mechanisms driving grassland productivity	133
Claudia Guimarães-Steinicke, Alexandra Weigelt, Anne Ebeling, Nico Eisenhauer, Joaquín Duque-Lazo, Björn Reu, Christiane Roscher, Jens Schumacher, Cameron Wagg, and Christian Wirth	
1. Introduction	134
2. Material and methods	138
3. Results	144
4. Discussion	149
5. Conclusions	155
Acknowledgements	155
References	155

5. Plant functional trait identity and diversity effects on soil meso- and macrofauna in an experimental grassland	163
Rémy Beugnon, Katja Steinauer, Andrew D. Barnes, Anne Ebeling, Christiane Roscher, and Nico Eisenhauer	
1. Introduction	164
2. Material and methods	167
3. Results	171
4. Discussion	174
5. Conclusions	179
Acknowledgements	180
References	180
Further reading	184
 6. How plant diversity impacts the coupled water, nutrient and carbon cycles	 185
Markus Lange, Eva Koller-France, Anke Hildebrandt, Yvonne Oelmann, Wolfgang Wilcke, and Gerd Gleixner	
1. Introduction	186
2. Plant diversity effects on the soil microbial community and soil processes and functions	187
3. Consequences of the element and water cycles and their coupling for the BEF relationships	207
Acknowledgements	211
References	211
 7. A new experimental approach to test why biodiversity effects strengthen as ecosystems age	 221
Anja Vogel, Anne Ebeling, Gerd Gleixner, Christiane Roscher, Stefan Scheu, Marcel Ciobanu, Eva Koller-France, Markus Lange, Alfred Lochner, Sebastian T. Meyer, Yvonne Oelmann, Wolfgang Wilcke, Bernhard Schmid, and Nico Eisenhauer	
1. Introduction	222
2. Methods	227
3. Results	236

4. Discussion	250
5. Conclusions	256
Acknowledgements	256
References	257
8. Linking local species coexistence to ecosystem functioning: a conceptual framework from ecological first principles in grassland ecosystems	265
Kathryn E. Barry, Hans de Koon, Peter Dietrich, W. Stanley Harpole, Anna Roeder, Bernhard Schmid, Adam T. Clark, Margaret M. Mayfield, Cameron Wagg, and Christiane Roscher	
1. Introduction	266
2. Jointly emerging local coexistence and ecosystem functioning from ecological first principles	269
3. Population level effects of abiotic and biotic conditions on fecundity, growth, and survival	273
4. How ecological first principles influence trade-offs between fecundity, growth, and survival and in turn influence local coexistence and ecosystem functioning	279
5. Conclusion	285
Author contributions	286
Acknowledgements	286
References	286
Further reading	296
9. Mapping change in biodiversity and ecosystem function research: food webs foster integration of experiments and science policy	297
Jes Hines, Anne Ebeling, Andrew D. Barnes, Ulrich Brose, Christoph Scherber, Stefan Scheu, Teja Tschardtke, Wolfgang W. Weisser, Darren P. Gilling, Alexandra M. Klein, and Nico Eisenhauer	
1. Topic networks as a way to visualize global conversation about biodiversity and ecosystem functioning	298
2. Divisions among research domains: influences on food webs	307
3. Summary and outlook: towards integrative food-web ecology	312
Acknowledgements	314
References	315

10. Transferring biodiversity-ecosystem function research to the management of 'real-world' ecosystems	323
Peter Manning, Jacqueline Loos, Andrew D. Barnes, Péter Batáry, Felix J.J.A. Bianchi, Nina Buchmann, Gerlinde B. De Deyn, Anne Ebeling, Nico Eisenhauer, Markus Fischer, Jochen Fründ, Ingo Grass, Johannes Isselstein, Malte Jochum, Alexandra M. Klein, Esther O.F. Klingenberg, Douglas A. Landis, Jan Lepš, Regina Lindborg, Sebastian T. Meyer, Vicky M. Temperton, Catrin Westphal, and Teja Tschamtké	
1. Introduction	324
2. Small-grain and highly-controlled experiments (Cluster A)	326
3. Small-grain studies with low experimental control (Cluster B)	337
4. Large-grain studies without experimental control (Cluster C)	340
5. Conclusion	344
Acknowledgements	345
References	346
