

Table of Contents

Contributors to Volume 7	ix
Preface	xv
Volumes in Series	xii

Section I Viral Vectors

1. Adeno-Associated Virus: Integrating Vectors for Human Gene Therapy <i>A. W. Skulimowski and R. Jude Samulski</i>	3
2. Techniques for Human Adenovirus Vector Construction and Characterization <i>Mary Hitt, Andrew J. Bett, Christina L. Addison, Ludvik Prevec, and Frank L. Graham</i>	13
3. Construction and Isolation of Recombinant Adenoviruses with Gene Replacements <i>David J. Spector and Lorna A. Samaniego</i>	31
4. Construction and Use of Recombinant Vaccinia Virus Vectors <i>Douglas Grosenbach and Dennis E. Hruby</i>	45
5. Epstein-Barr Viral Plasmid Vectors and Their Amplifiable Derivatives <i>Ann L. Kirchmaier, Tim A. Bloss, David Mackey, and Bill Sugden</i>	65

Section II DNA Viruses

6. Methods to Study Epstein-Barr Virus and p53 Status in Human Cells <i>Alison J. Sinclair and Paul J. Farrell</i>	89
7. The SV40 Minichromosome <i>Claudia Gruss and Rolf Knippers</i>	101
8. Site-Specific Integration of Multigenic Shuttle Plasmids into the Herpes Simplex Virus Type 1 Genome Using a Cell-Free Cre-lox Recombination System <i>Siyamak Rasty, William F. Goins, and Joseph C. Glorioso</i>	114
9. Strategies for Studying Transcription Regulation of Neurotropic Viruses in the Central Nervous System: Lesson from JC Virus <i>Jay Rappaport, Douglas A. Kerr, and Kamel Khalili</i>	131

10. Analysis of the Nuclear DNA-Binding Activity in Cells Overexpressing Hepatitis B Viral X and 3'-Truncated S Transactivators
Volker Schlüter and Wolfgang H. Caselmann 152
11. Investigations on Virus-Host Interactions: An Abortive System
Christiane Zock and Walter Doerfler 167

Section III Human Immunodeficiency Virus/Retroviruses

12. Quantitation of Virus Stocks Produced from Cloned Human Immunodeficiency Virus DNA
Carol A. Deminie and Michael Emerman 195
13. Quantitation of HIV-1 RNA in Plasma or Serum Samples
V. Natarajan and Norman P. Salzman 209
14. Detection of Cell Fusion Mediated by the Envelopes of Human Retroviruses by Transactivation of a Reporter Gene
Tatjana Dragic, Uriel Hazan, and Marc Alizon 218
15. Assembly of Recombinant Retroviral Gag Precursors into Pseudovirions in the Baculovirus-Insect Cell Expression System
Gregory J. Tobin, Jane K. Battles, Lynn Rasmussen, and Matthew A. Gonda 237
16. Retrovirus Reverse Transcription and Integration
Jonathan Leis and Ashok Aiyar 254
17. *In Vitro* Binding and Transcription Assays Using the Human T-Cell Leukemia Virus Type I Tax Protein
Mark G. Anderson, Maura-Ann H. Matthews, and William S. Dynan 267
18. Polymerase Chain Reaction-Based Techniques for Utilizing Retroviruses as Cell Lineage Markers
Christopher A. Walsh 280

Section IV RNA Viruses

19. New Methods to Study Poliovirus Assembly and Encapsidation of Genomic RNA
Casey D. Morrow, Donna C. Porter, and David C. Ansardi 299
20. Molecular Studies of Hepatitis Delta Virus RNAs
Tie-Bo Fu, Ting-Ting Wu, David Lazinski, and John Taylor 315
21. Systems to Express Recombinant RNA Molecules by the Influenza A Virus Polymerase *in Vivo*
Ignacio Mena, Susana de la Luna, Javier Martín, Carmen Albó, Beatriz Perales, Amelia Nieto, Agustín Portela, and Juan Ortín 329

22. Analysis of Membrane Association <i>in Vivo</i> and Targeting of Viral Proteins in Polarized Epithelial Cells <i>Debi P. Nayak, Amitabha Kundu, and Christopher M. Sanderson</i>	343
23. Cloning of Viral Double-Stranded RNA Genomes by Single Primer Amplification <i>Paul R. Lambden and Ian N. Clarke</i>	359
24. Using the RNA-Capture Assay to Assess the RNA-Binding Activity of Viral Proteins <i>John T. Patton and Jian Hua</i>	373
25. Protein RNA-Binding Activity Measured by Northwestern Blot Analysis: The Interferon-Inducible RNA-Dependent Protein Kinase PKR <i>Stephen J. McCormack and Charles E. Samuel</i>	388
Erratum	404
Index	405
