
CONTENTS

Contributors	xiii
Preface	xix
 Part 1. Forward and Reverse Genetics	
1. Generating Conditional Mutations in Zebrafish Using Gene-trap Mutagenesis	3
<i>Lisette A. Maddison, Jianjun Lu, and Wenbiao Chen</i>	
I. Introduction	4
II. Rationale for Conditional Mutations	4
III. Rationale for Gene-trap Mutagenesis to Generate Conditional Mutations	5
IV. Rationale for Vector Design	5
V. Methods	7
VI. Discussion	19
VII. Summary	20
Acknowledgments	20
References	21
2. <i>Tol2</i> -mediated Transgenesis, Gene Trapping, Enhancer Trapping, and the Gal4-UAS System	23
<i>Gembu Abe, Maximiliano L. Suster, and Koichi Kawakami</i>	
I. Introduction	24
II. Transgenesis by Using the <i>Tol2</i> Transposable Element	26
III. <i>Tol2</i> -mediated BAC Transgenesis	30
IV. Gene Trapping and Enhancer Trapping with the <i>Tol2</i> Transposon System	36
V. Gene Trapping and Enhancer Trapping with the Gal4FF-UAS System	42
Acknowledgments	47
References	47

3. Engineering Zinc Finger Nucleases for Targeted Mutagenesis of Zebrafish	51
<i>Jeffrey D. Sander, J.-R. Joanna Yeh, Randall T. Peterson, and J. Keith Joung</i>	
I. Introduction	52
II. Methods and Resources for Engineering Zinc Finger Nucleases	52
III. Choice of Method to Engineer Zinc Finger Nucleases	54
Acknowledgments	56
References	56
4. Retroviral-mediated Insertional Mutagenesis in Zebrafish	59
<i>Adam Amsterdam, Gaurav Kumar Varshney, and Shawn Michael Burgess</i>	
I. Introduction	60
II. Mutagenesis	62
III. Cloning the Mutated Genes	65
IV. Retroviral-mediated Insertional Mutagenesis as a Reverse Genetic Tool	73
V. Future Directions	77
Acknowledgments	79
References	79
5. Genetic Screens for Mutations Affecting Adult Traits and Parental-effect Genes	83
<i>Francisco Pelegri and Mary C. Mullins</i>	
I. Introduction	84
II. Strategies for Adult Trait and Parental-effect Screens	89
III. Selection of Lines for Genetic Screens	101
IV. Recovery and Maintenance of Adult and Parental-effect Mutations	104
V. Mapping Adult and Parental-effect Mutations	108
VI. Solutions, Materials, and Protocols	112
VII. Conclusions	117
Acknowledgments	117
References	117
6. High-throughput Target-selected Gene Inactivation in Zebrafish	121
<i>Ross N.W. Kettleborough, Ewart de Bruijn, Freek van Eeden, Edwin Cuppen and Derek L. Stemple</i>	
I. Introduction	122
II. Mutagenesis and Library Creation	122
III. PCR and Re-sequencing of Exons	124
IV. Analysis of Resequencing Data and Retrieval of Mutations	125
References	127

7. Genetic Suppressor Screens in Haploids	129
<i>Xiaoying Bai, Zhongan Yang, Hong Jiang, Shuo Lin, and Leonard I. Zon</i>	
I. Introduction and Rationale	130
II. Methods – an Example of Suppressor Screen in Moonshine Mutants	130
III. Conclusions and Prospective	135
Acknowledgments	136
References	136
8. Transgenic Zebrafish Using Transposable Elements	137
<i>Karl J. Clark, Mark D. Urban, Kimberly J. Skuster, and Stephen C. Ekker</i>	
I. Introduction	138
II. Requesting and Assembling <i>Tol2</i> System	141
III. Microinjection	144
IV. Quality Control	145
V. Select Injected Fish to Raise as Founder Generation F0	146
VI. Production of F1 Generation	146
VII. Select the Best Substrain(s) Based on Observation of F2 Generation	147
VIII. Discussion	147
Acknowledgments	147
References	147
9. Spatiotemporal Control of Embryonic Gene Expression Using Caged Morpholinos	151
<i>Ilya A. Shestopalov and James K. Chen</i>	
I. Introduction	152
II. Design and Synthesis of cMOs	154
III. Synthesis of cFD	161
IV. Microinjection of Caged Reagents	162
V. Global Photoactivation of Caged Reagents	163
VI. Titration of cMO Dose for Optimum Dynamic Range	165
VII. Localized Photoactivation of Caged Reagents	167
VIII. Conclusion	169
Acknowledgments	171
References	171
Part 2. Transgenesis	
10. Advanced Zebrafish Transgenesis with <i>Tol2</i> and Application for <i>Cre/lox</i> Recombination Experiments	175
<i>Christian Mosimann and Leonard I. Zon</i>	
I. Introduction	176
II. Transgene Design, Cloning, and <i>Tol2</i> Transgenesis	180
III. <i>Tol2</i> Transgene Genetics	185
IV. <i>CreER</i> ^{T2} -Controlled <i>lox</i> Recombination Using 4-OHT	188

V. Discussion	192
Conflict of interest statement	192
Acknowledgments	192
References	192
11. Use of Phage PhiC31 Integrase as a Tool for Zebrafish Genome Manipulation	195
<i>James A. Lister</i>	
I. Introduction	196
II. Rationale	199
III. Materials and Methods	203
IV. Discussion	203
V. Summary	205
Acknowledgments	205
References	205
12. Method for Somatic Cell Nuclear Transfer in Zebrafish	209
<i>Kannika Siripattarapavatt and Jose B. Cibelli</i>	
I. Methods	210
II. Materials	216
References	217
Part 3. The Zebrafish Genome and Mapping Technologies	
13. Single Nucleotide Polymorphism (SNP) Panels for Rapid Positional Cloning in Zebrafish	221
<i>Matthew D. Clark, Victor Guryev, Ewart de Bruijn, Isaac J. Nijman, Masazumi Tada, Catherine Wilson, Panos Deloukas, John H. Postlethwait, Edwin Cuppen and Derek L. Stemple</i>	
I. Introduction	222
II. Extraction of Zebrafish Genomic DNA	223
III. Affymetrix Molecular Inversion Probe Panel	225
IV. Suggested Mapping Strategy	233
V. General Considerations	233
References	234
14. Molecular Cytogenetic Methodologies and a BAC Probe Panel Resource for Genomic Analyses in the Zebrafish	237
<i>Kimberly P. Dobrinski, Kim H. Brown, Jennifer L. Freeman and Charles Lee</i>	
I. Introduction	238
II. Cytogenetic Methods	240
III. Application of Cytogenetic Methods in Zebrafish Studies	247
IV. Methods for Array CGH	250
V. Application of Array CGH in Zebrafish Studies	254
VI. Summary	256
Acknowledgments	256
References	256

15. Conserved Synteny and the Zebrafish Genome	259
<i>Julian M. Catchen, Ingo Braasch and John H. Postlethwait</i>	
I. Introduction	260
II. Rationale: Gene Duplication and Orthology Assignments	260
III. Methods	264
IV. Using the Synteny Database: A Case Study of Nerve Growth Factor Receptors	272
V. Zebrafish, Conserved Syntenies, and the Teleost Genome Duplication	279
VI. Summary	280
Acknowledgments	281
References	281
 16. The Zon Laboratory Guide to Positional Cloning in Zebrafish	 287
<i>Yi Zhou and Leonard I. Zon</i>	
I. Introduction	288
II. Mapping Strains	289
III. Families and Genetic Markers	290
IV. Crosses for Line Maintenance and Mapping	291
V. Preparation of the DNA	295
VI. Mapping Genes	296
VII. General Flow of Information from the Zebrafish Genome Sequence Assemblies	303
VIII. Synteny between Human, Zebrafish, Fugu, and Tetraodon Genomes	304
IX. Proving a Candidate Gene is Responsible for the Mutant Phenotype	306
X. Morpholinos	307
XI. Future Technologies	307
References	308
 Part 4. Informatics and Comparative Genomics	
17. Data Extraction, Transformation, and Dissemination through ZFIN	313
<i>Douglas G. Howe, Ken Frazer, David Fashena, Leyla Ruzicka, Yvonne Bradford, Sridhar Ramachandran, Barbara J. Ruef, Ceri Van Slyke, Amy Singer and Monte Westerfield</i>	
I. Introduction	314
II. Extracting Data and Data Flow	314
III. Ensuring Accurate and Rapid Data Dissemination	319
IV. Submitting Data Directly to ZFIN	322
V. Conclusions	324
Acknowledgments	324
References	325

18. DNA Methylation Profiling in Zebrafish	327
<i>Shan-Fu Wu, Haiying Zhang, Saher Sue Hammoud, Magdalena Potok, David A. Nix, David A. Jones and Bradley R. Cairns</i>	
I. Introduction	328
II. Rationale	332
III. Methods	332
VI. Discussion	336
Acknowledgments	336
References	337
19. Chromatin Immunoprecipitation in Adult Zebrafish Red Cells	341
<i>Eirini Trompouki, Teresa Venezia Bowman, Anthony DiBiase, Yi Zhou and Leonard I. Zon</i>	
I. Introduction	342
II. Adult Zebrafish Exsanguination	343
III. Chromatin Immunoprecipitation (Lee <i>et al.</i> , 2006)	343
IV. ChIP-seq Sample Preparation (Guenther <i>et al.</i> , 2008)	347
V. ChIP-seq Data Analysis	347
VI. Summary and Conclusions	348
VII. Online tools	349
VIII. Conflicts of Interest	350
Acknowledgments	350
References	350
20. Discerning Different <i>In vivo</i> Roles of MicroRNAs by Experimental Approaches in Zebrafish	353
<i>Luke Pase and Graham J. Lieschke</i>	
I. Introduction	354
II. Using Zebrafish to Study the Function of miRNAs	366
III. Summary	373
Acknowledgments	374
References	374
21. Sequencing-based Expression Profiling in Zebrafish	379
<i>Jin Liang, Gabriel Renaud and Shawn M. Burgess</i>	
I. Introduction	380
II. Digital Gene Expression	382
III. Potential Issues in DGE	395
Acknowledgments	397
References	398

22. Chromatin Modification in Zebrafish Development	401
<i>Jordi Cayuso Mas, Emily S. Noël and Elke A. Ober</i>	
I. Chromatin Modifications	402
II. Chromatin Modifications in Development	408
III. Functions of Chromatin Modifications in Tissue Regeneration	421
IV. Outlook	422
Acknowledgments	423
References	423
 Part 5. Infrastructure	
23. Advances in Zebrafish Husbandry and Management	431
<i>Christian Lawrence</i>	
I. Introduction	432
II. Breeding	432
III. Larviculture	436
IV. Aquaculture Systems	439
V. Nutrition	440
VI. Health Management	442
VII. Genetic Management	444
VIII. Regulatory Compliance	445
IX. Education and Training	447
X. Summary	448
References	448
 24. Aquaculture and Husbandry at the Zebrafish International Resource Center	453
<i>Zoltán M. Varga</i>	
I. Introduction	454
II. Methods	455
III. Materials	475
Acknowledgments	477
References	477
 Index	 479
Volumes in Series	495
