CONTRIBUTORS TO VOLUME 54	vii
CONTENTS OF VOLUMES 35-53	ix

Pollen Germination and Tube Growth

HUEI-JING WANG, JONG-CHIN HUANG, AND GUANG-YUH JAUH

I. Introduction	2
II. Pollen Adhesion and Hydration on the Stigma	4
III. Endomembrane Trafficking in the Tip Region Contributes to Rapid and Polar Growth	14
IV. Roles of Actin Cytoskeleton, Ionic and Regulatory Proteins in Regulation of Pollen Tube Growth	26
V. Ionic and Protein Regulators Contribute to Oscillatory Pollen Tube Growth ..	31
VI. Global Analysis of Gene Expression in Pollen Tubes	36
VII. Conclusions	37
Acknowledgements	39
References	39

Molecular Mechanisms of Sex Determination in Monoecious and Dioecious Plants

GEORGE CHUCK

I. Introduction	54
II. Sex Determination in Cucurbitacea.	56
III. Sex Determination in Melon	57
IV. Positional Specificity of the Sex Determination Signal.	59
V. Sex Determination in Maize.	60
VI. Genes Involved in Feminization.	63
VII. Genes Involved in Masculinization.	64
VIII. <i>Silkless1</i> —A Gene Involved in Perception and Protection from the Sex Determination Signal	66
IX. Genetic Interaction Between Sex-Determining Genes	66
X. Molecular Identity of the <i>Ts2</i> Gene	67
XI. Molecular Identity of <i>Ts1</i>	69
XII. Are Cytokinins Involved with <i>Ts1</i> and <i>Ts2</i> in Lower Floret Abortion?..	70
XIII. Molecular Identity of Class II <i>Tassel-seeds-Ts4</i>	71

XIV. Molecular Identity of <i>Ts6</i> , A Dominant Gain-of-Function Mutant of <i>ids1</i> . .	73
XV. The Maize Pistil Abortion Pathway may be Under Small RNA Control . . .	74
XVI. The Relationship Between Maize <i>AP2</i> Genes and Sex Determination . .	75
XVII. Hormones, <i>AP2</i> Genes and <i>MADS</i> Box Genes—What is the Connection To Sex Determination? Evidence and Speculation.	76
Acknowledgements.	78
References	78

The Evolution of Floral Symmetry

HÉLÈNE CITERNE, FLORIAN JABBOUR, SOPHIE NADOT AND
CATHERINE DAMERVAL

I. Introduction	86
II. Definitions of Symmetry	88
III. Symmetry and Flower Development.	93
IV. Evolution of Flower Symmetry	97
V. The Significance of Symmetry in Plant–Pollinator Interactions.	108
VI. Molecular Bases of Flower Symmetry	115
VII. Perspectives	126
Acknowledgements.	128
References	128

Protein Turnover in Grass Leaves

LOUIS JOHN IRVING, YUJI SUZUKI, HIROYUKI ISHIDA, AND
AMANE MAKINO

I. Introduction	140
II. Protein Synthesis	141
III. Protein Degradation	146
IV. Whole-Leaf Regulation of Protein Content	162
V. Implications of Protein Turnover in Whole Plants	168
VI. Conclusions	171
Acknowledgements.	172
References	172
