Section 1

History of GHS and Ghrelin

1. History to the Discovery of Ghrelin 3

Cyril Y. Bowers

1. Introduction/Pre-GHRP Studies	4
2. GHRP Beginning	6
3. GHRP-6 Active <i>In Vitro</i> and <i>In Vivo</i> (1982)	10
4. GHRH Isolation and Identification (1982)	11
5. GHRP Versus GHRH (1981–1984)	11
6. GHRP Reflects Activity of a New Hormone and New Receptor—Hypothalamic–Pituitary Models (1984–1991)	12
7. GHRP/GHS Receptor Assays (1989–2000)	15
8. GHS/GHRP Receptor (1996–1998)	16
9. Clinical Results in Humans	18
10. Summary/Conclusion	26
Acknowledgments	28
References	28

2. Orphan GPCRs and Methods for Identifying Their Ligands 33

Morikatsu Yoshida, Mikiya Miyazato, and Kenji Kangawa

1. Introduction	33
2. Strategies for Identifying Ligands of Orphan GPCRs	34
3. Selection of Target Orphan GPCRs	36
4. Recombinant Expression Systems for Orphan GPCRs	38
5. Sources of Potential Ligands of Orphan GPCRs	38
6. Functional Assays for Screening Candidate Ligands of Orphan GPCRs	40
7. Summary	42
Acknowledgments	42
References	43

3. Purification of Rat and Human Ghrelins	45
Masayasu Kojima, Hiroshi Hosoda, and Kenji Kangawa	
1. Introduction	46
2. GHS and Its Receptor	46
3. Purification of Rat Ghrelin	48
4. Purification of Human Ghrelin	54
5. Purification of Rat des-Gln14-ghrelin	57
6. Obestatin, an Anorexigenic Hormone or a Digested Peptide Fragment from a Ghrelin Precursor?	58
7. Conclusion	60
References	60
4. Variety of Acyl Modifications in Mammalian Ghrelins	63
Takanori Ida	
1. Introduction	63
2. Purification of Mammalian Ghrelin	64
3. GH-Releasing Activity of Ghrelin in Mammals	69
4. Summary	71
Acknowledgments	72
References	72
5. Determination of Nonmammalian Ghrelin	75
Hiroyuki Kaiya, Hiroshi Hosoda, Kenji Kangawa, and Mikiya Miyazato	
1. Introduction	76
2. Purification of Ghrelin	76
3. Measurement of Ghrelin Activity	82
4. cDNA Cloning and Determination of Amino Acid Sequence of Prepro-Ghrelin	84
5. Determination of Species of Fatty Acid Modification by Mass Spectrometric Analysis	85
6. Summary	86
Acknowledgments	86
References	86

Section 2**Molecular Forms of Ghrelin and Measuring of the Concentrations****6. Morphological Analysis of Ghrelin Neurons in the Hypothalamus 91**

Haruaki Kageyama, Fumiko Takenoya, and Seiji Shioda

1. Introduction 92
2. Observation of Ghrelin-Containing Cells at the Light Microscope Level 92
3. Observation of Ghrelin-Containing Cells at Electron Microscopic Level 96
4. Summary 98
- Acknowledgments 98
- References 99

7. High-Performance Liquid Chromatography Analysis of Hypothalamic Ghrelin 101

Takahiro Sato and Masayasu Kojima

1. Introduction 102
2. Identification of Hypothalamic Ghrelin 102
3. Quantification of Immunoreactive Ghrelin in Rats 107
4. Quantification of Rat Ghrelin mRNA in Hypothalamic Ghrelin in Rats 107
5. Identification of Ghrelin-Producing Neurons in Rats 109
6. Summary 111
- Acknowledgments 111
- References 111

8. Standard Sample Collections for Blood Ghrelin Measurements 113

Hiroshi Hosoda and Kenji Kangawa

1. Introduction 114
2. Materials and Methods 115
3. Study Protocols 116
4. Results 118
5. Discussion 122
- Acknowledgments 124
- References 124

Section 3**Enzymes for Processing of Ghrelin****9. From Ghrelin to Ghrelin's O-Acyl Transferase****129**

Jesus A. Gutierrez, Jill A. Willency, Michael D. Knierman, Tamer Coskun,
Patricia J. Solenberg, Doug R. Perkins, Richard E. Higgs, and John E. Hale

1. Introduction	130
2. Quantitative MALDI-ToF MS Methodology for Ghrelin in Biological Matrices	131
3. Stabilizing Ghrelin in Biological Matrices	135
4. TT Cell Culture System for Ghrelin Production	137
5. Functional Screening for Ghrelin's O-Acyl Transferase	138
6. GOAT is Ghrelin's Acyl Transferase	142
7. Summary	144
Acknowledgments	145
References	145

10. Enzymatic Characterization of GOAT, ghrelin O-acyltransferase**147**

Hideko Ohgusu, Tomoko Takahashi, and Masayasu Kojima

1. Introduction	148
2. GOAT Enzymatic Assay	148
3. Detecting the Molecular Forms of Ghrelin Generated by <i>In Vitro</i> GOAT Enzymatic Assays	151
4. Enzymatic Characterization of GOAT	154
5. Alterations in GOAT mRNA Expression in the Stomach Under Fasting Conditions	161
6. Conclusion	162
References	163

11. The Study of Ghrelin Deacylation Enzymes**165**

Motoyasu Satou and Hiroyuki Sugimoto

1. Introduction	166
2. Processing of Ghrelin	168
3. Determination of Ghrelin Deacylation Activity	169
4. Future Directions	176
Acknowledgments	178
References	178

Section 4**Synthesis of Ghrelin Agonists and Antagonists**

12. Synthesis of Ghrelin: Chemical Synthesis and Semisynthesis for Large-Scale Preparation of Modified Peptides	183
Tomohiro Makino, Masaru Matsumoto, and Yoshiharu Minamitake	
1. Introduction	185
2. Protocols of Chemical Synthesis of Human Ghrelin	186
3. Protocols of Semisynthesis of Human Ghrelin	189
4. Conclusion	200
Acknowledgments	202
References	202
13. Ghrelin O-Acyltransferase Assays and Inhibition	205
Martin S. Taylor, Yousang Hwang, Po-Yuan Hsiao, Jef D. Boeke, and Philip A. Cole	
1. Introduction	206
2. Analysis of Acyl Ghrelin Levels and GOAT Activity	208
3. GOAT Inhibitor Discovery	213
4. Challenges and Future Directions	219
Acknowledgments	224
References	224

Section 5**Action of Ghrelin**

14. Model-Based Evaluation of Growth Hormone Secretion	231
Johannes D. Veldhuis and Daniel M. Keenan	
1. Introduction	232
2. Ensemble GH-Regulation MODEL	232
3. Technical Assessment of Multipathway GH Regulation	236
4. Specific Methodological Strategies	237
5. Summary	245
Acknowledgments	245
References	245

15. Ghrelin in the Control of Energy, Lipid, and Glucose Metabolism 249

Kristy M. Heppner, Timo D. Müller, Jenny Tong, and Matthias H. Tschöp

1. Introduction 250
2. Central Administration of Ghrelin Increases Acute Food Intake in Rats 250
3. Chronic Central Infusion of Ghrelin Generates a Positive Energy Balance in Rodents 253
4. Ghrelin Regulates Glucose Homeostasis 257
5. Summary 258
- References 259

16. Ghrelin and the Vagus Nerve 261

Yukari Date

1. Introduction 262
2. Anatomy of the Vagus Nerve 262
3. GHS-R in the Vagal Afferent Neurons 263
4. Action of Ghrelin via the Vagus Nerve 264
5. Summary 267
- Acknowledgments 268
- References 268

17. Measurement of AMP-Activated Protein Kinase Activity and Expression in Response to Ghrelin 271

Chung Thong Lim, Francesca Lolli, Julia D. Thomas, Blerina Kola, and Márta Korbonits

1. Introduction 272
2. The AMPK Assay Methodology 273
3. Immunoblotting pAMPK 281
4. AMPK Gene Expression 283
5. Summary 285
- Acknowledgments 285
- References 285

18. Ghrelin and Gastrointestinal Movement 289

Naoki Fujitsuka, Akihiro Asakawa, Haruka Amitani, Mineko Fujimiya, and Akio Inui

1. Introduction 290
2. The Role of Ghrelin in Gastrointestinal Motility 291
3. The GI Motor Effect of Ghrelin Mediated by the Gut-Brain Axis 296

4. Summary	299
Acknowledgments	299
References	299
19. Ghrelin Acylation by Ingestion of Medium-Chain Fatty Acids	303
Yoshihiro Nishi, Hiroharu Mifune, and Masayasu Kojima	
1. Introduction	304
2. Preparing Food and Water Containing MCFAs or MCTs	304
3. Samples for Ghrelin Measurement	305
4. Measurement of Ghrelins Modified with or without the <i>n</i> -Octanoyl Group	307
5. Purification and Characterization of Acyl Ghrelins from Stomachs	309
6. Summary	314
Acknowledgments	314
References	314
20. Islet β-Cell Ghrelin Signaling for Inhibition of Insulin Secretion	317
Katsuya Dezaki and Toshihiko Yada	
1. Introduction	318
2. Ghrelin is Released in the Pancreatic Islets	318
3. Insulinostatic Function of Islet-Derived Ghrelin	319
4. Ghrelin Signaling in Islet β -Cells	322
5. Conclusion	327
Acknowledgments	328
References	329
21. Rikkunshito as a Ghrelin Enhancer	333
Hiroshi Takeda, Shuichi Muto, Koji Nakagawa, Shunsuke Ohnishi, Chiharu Sadakane, Yayoi Saegusa, Miwa Nahata, Tomohisa Hattori, and Masahiro Asaka	
1. Introduction	334
2. Cisplatin-Induced Anorexia	335
3. Anorexia of Aging	339
4. Stress	343
5. Ghrelin-Degrading Enzyme	348
References	350

Section 6

Tg and KO Mice of Ghrelin**22. Thermogenic Characterization of Ghrelin Receptor Null Mice 355**

Ligen Lin and Yuxiang Sun

1. Introduction	356
2. <i>In Vivo</i> Metabolic and Thermogenic Characterizations	358
3. Hormonal Characterization: Thyroid Hormones and Catecholamines	359
4. Gene/Protein Expression Profiles and <i>Ex Vivo</i> Lipolysis of BAT	362
5. Isolation and Characterization of Brown Adipocytes	366
6. Summary	368
Acknowledgments	369
References	369

23. Transgenic Mice Overexpressing Ghrelin or Ghrelin Analog 371

Hiroyuki Ariyasu, Go Yamada, Hiroshi Iwakura, Takashi Akamizu, Kenji Kangawa, and Kazuwa Nakao

1. Introduction	372
2. Des-Acyl Ghrelin Tg Mice	372
3. Tg Mice Overexpressing a Ghrelin Analog	373
4. Tg Mice Overexpressing Both Human GOAT and Ghrelin	375
5. Summary	376
References	377

Section 7

Clinical Application of Ghrelin**24. Therapeutic Potential of Ghrelin in Restricting-Type Anorexia Nervosa 381**

Mari Hotta, Rina Ohwada, Takashi Akamizu, Tamotsu Shibasaki, and Kenji Kangawa

1. Introduction	382
2. Pathophysiology of AN	383
3. Plasma Ghrelin in AN	384
4. Clinical Application of Ghrelin in Patients with AN	389
5. Conclusions	395
Acknowledgments	395
References	395

25. Clinical Application of Ghrelin for Chronic Respiratory Diseases 399

Nobuhiro Matsumoto and Masamitsu Nakazato

1. Introduction 399
2. Clinical Application of Ghrelin for Chronic Respiratory Disease 400
3. Summary 405
- References 405

26. Clinical Trial of Ghrelin Synthesis Administration for Upper GI Surgery 409Shuji Takiguchi, Yuichiro Hiura, Yasuhiro Miyazaki, Akihiro Takata,
Kohei Murakami, and Yuichiro Doki

1. Introduction 410
2. Ghrelin Replacement Therapy After TG and Esophagectomy 411
3. Anti-inflammatory Role of Ghrelin After Esophageal Surgery 417
4. Ghrelin Replacement Therapy During Chemotherapy in Patients with Esophageal Cancer 425
- References 430
