

TABLE OF CONTENTS

Preface *xiii*

1 Overview	1
I. Scope of Insect Ecology	3
II. Ecosystem Ecology	5
A. Ecosystem Complexity	6
B. The Hierarchy of Subsystems	7
C. Regulation	9
III. Environmental Change and Disturbance	10
IV. Ecosystem Approach To Insect Ecology	12
V. Scope of This Book	12

SECTION I

ECOLOGY OF INDIVIDUAL INSECTS

2 Responses to Abiotic Conditions	17
I. The Physical Template	18
A. Biomes	18
B. Environmental Variation	23
C. Disturbances	25

II. Surviving Variable Abiotic Conditions	30
A. Thermoregulation	32
B. Water Balance	35
C. Air and Water Chemistry	38
D. Other Abiotic Factors	39
III. Factors Affecting Dispersal Behavior	41
A. Life History Strategy	41
B. Crowding	41
C. Nutritional Status	42
D. Habitat and Resource Conditions	42
E. Mechanism of Dispersal	43
IV. Responses to Anthropogenic Changes	45
V. Summary	50
 3 Resource Acquisition	 53
I. Resource Quality	54
A. Resource Requirements	55
B. Variation in Food Quality	55
C. Plant Chemical Defenses	58
D. Arthropod Defenses	66
E. Variation in Resource Quality	70
F. Mechanisms for Exploiting Variable Resource Quality	75
II. Resource Acceptability	79
III. Resource Availability	82
A. Discovering Suitable Resources	83
B. Orientation	84
C. Learning	89
IV. Summary	93
 4 Resource Allocation	 95
I. Resource Budget	96
II. Allocation of Assimilated Resources	98
A. Foraging and Dispersal Behavior	98
B. Mating Behavior	102
C. Reproductive and Social Behavior	107
D. Competitive, Defensive and Mutualistic Behavior	111
III. Efficiency of Resource Use	118
A. Factors Affecting Efficiency	119
B. Trade-offs	121
IV. Summary	124

SECTION II

POPULATION ECOLOGY

5 Population Systems	129
I. Population Structure	130
A. Density	130
B. Dispersion	131
C. Metapopulation Structure	133
D. Age Structure	135
E. Sex Ratio	135
F. Genetic Composition	136
G. Social Insects	139
II. Population Processes	141
A. Natality	142
B. Mortality	142
C. Dispersal	143
III. Life History Characteristics	148
IV. Parameter Estimation	150
V. Summary	155
6 Population Dynamics	157
I. Population Fluctuation	158
II. Factors Affecting Population Size	163
A. Density Independent Factors	163
B. Density Dependent Factors	170
C. Regulatory Mechanisms	170
III. Models of Population Change	174
A. Exponential and Geometric Models	175
B. Logistic Model	176
C. Complex Models	176
D. Computerized Models	178
E. Model Evaluation	179
IV. Summary	182
7 Biogeography	185
I. Geographic Distribution	187
A. Global Patterns	187
B. Regional Patterns	188
C. Island Biogeography	189

D. Landscape and Stream Continuum Patterns	190
II. Spatial Dynamics of Populations	193
A. Expanding Populations	194
B. Metapopulation Dynamics	200
III. Habitat Connectivity	203
IV. Anthropogenic Effects On Spatial Dynamics	204
A. Fragmentation	205
B. Disturbances to Aquatic Ecosystems	208
C. Anthropogenic Transport Across Barriers	209
V. Models of Spatial Dynamics	211
VI. Summary	214

SECTION III

COMMUNITY ECOLOGY

8 Species Interactions	219
I. Classes of Interactions	220
A. Competition	221
B. Predation	226
C. Symbiosis	231
II. Factors Affecting Interactions	242
A. Abiotic Conditions	243
B. Resource Availability and Distribution	244
C. Indirect Effects of Other Species	245
III. Consequences of Interactions	253
A. Population Regulation	254
B. Community Regulation	254
IV. Summary	255
 9 Community Structure	 257
I. Approaches to Describing Communities	258
A. Species Diversity	259
B. Species Interactions	267
C. Functional Organization	273
II. Patterns of Community Structure	275
A. Global Patterns	275
B. Biome and Landscape Patterns	278
III. Determinants of Community Structure	282
A. Habitat Area and Complexity	282
B. Habitat Stability	283
C. Habitat or Resource Conditions	284
D. Species Interactions	285
IV. Summary	287

10 Community Dynamics	293
I. Short-term Change in Community Structure	294
II. Successional Change in Community Structure	297
A. Patterns of Succession	299
B. Factors Affecting Succession	304
C. Models of Succession	308
III. Paleoecology	310
IV. Diversity vs. Stability	316
A. Components of Stability	319
B. Stability of Community Variables	320
V. Summary	321

SECTION IV

ECOSYSTEM LEVEL

11 Ecosystem Structure and Function	327
I. Ecosystem Structure	329
A. Physical Structure	330
B. Trophic Structure	331
C. Spatial Variability	332
II. Energy Flow	333
A. Primary Productivity	334
B. Secondary Productivity	337
C. Energy Budgets	338
III. Biogeochemical Cycling	339
A. Abiotic and Biotic Pools	340
B. Major Cycles	341
C. Factors Influencing Cycling Processes	347
IV. Climate Modification	348
V. Ecosystem Modeling	353
VI. Summary	357

12 Herbivory	359
I. Types and Patterns of Herbivory	361
A. Herbivore Functional Groups	361
B. Measurement of Herbivory	361
C. Spatial and Temporal Patterns of Herbivory	365
II. Effects of Herbivory	372
A. Plant Productivity, Survival and Growth Form	372
B. Community Dynamics	379
C. Water and Nutrient Fluxes	385
D. Effects on Climate and Disturbance Regime	392
III. Summary	395

13	Pollination, Seed Predation and Seed Dispersal	397
I.	Types and Patterns of Pollination	399
A.	Pollinator Functional Groups	399
B.	Measurement of Pollination	402
C.	Spatial and Temporal Patterns of Pollination	403
II.	Effects of Pollination	405
III.	Types and Patterns of Seed Predation and Dispersal	410
A.	Seed Predator and Disperser Functional Groups	410
B.	Measurement of Seed Predation and Dispersal	411
C.	Spatial and Temporal Patterns of Seed Predation and Dispersal	416
IV.	Effects of Seed Predation and Dispersal	417
V.	Summary	420
14	Decomposition and Pedogenesis	421
I.	Types and Patterns of Detritivory and Burrowing	423
A.	Detritivore and Burrower Functional Groups	423
B.	Measurement of Detritivory, Burrowing and Decomposition Rates	425
C.	Spatial and Temporal Patterns in Processing of Detritus and Soil	428
II.	Effects of Detritivory and Burrowing	432
A.	Decomposition and Mineralization	432
B.	Soil Structure, Fertility and Infiltration	440
C.	Primary Production and Vegetation Dynamics	446
III.	Summary	451
15	Insects as Regulators of Ecosystem Processes	453
I.	Development of the Concept	454
II.	Ecosystems as Cybernetic Systems	459
A.	Properties of Cybernetic Systems	460
B.	Ecosystem Homeostasis	461
C.	Definition of Stability	463
D.	Regulation of NPP by Biodiversity	465
E.	Regulation of NPP by Insects	471
III.	Summary	476

SECTION V

APPLICATIONS AND SYNTHESIS

16	Applications	481
I.	Ecosystem Services	483
A.	Provisioning Services	483
B.	Cultural Services	485

C. Supporting Services	488
D. Regulating Services	488
E. Valuation of Ecosystem Services	490
II. Integrated Pest Management	491
A. Development of the IPM Concept	491
B. Ecological Tactics for Managing Crop and Forest "Pests"	493
C. Ecological Tactics for Managing Medical and Veterinary "Pests"	499
D. Ecological Tactics for Managing Urban "Pests"	501
III. Conservation/Restoration Ecology	504
IV. Invasive Species	508
V. Indicators of Environmental Conditions	510
VI. Summary	511
17 Summary and Synthesis	513
I. Summary	514
II. Synthesis	516
III. Critical Issues	517
IV. Conclusions	522
Bibliography	525
Author Index	607
Taxonomic Index	619
Subject Index	625
