1. MicroRNAs in <i>Drosophila</i> Development	1
Geetanjali Chawla and Nicholas S. Sokol	
1. Introduction	2
2. Biogenesis of miRNAs	3
3. Regulation of miRNA Biogenesis	11
4. Mechanism of miRNA Action	15
5. Identification of <i>Drosophila</i> miRNAs	15
6. Identification of miRNA Targets	19
7. Functions of miRNAs in <i>Drosophila</i>	29
8. Concluding Remarks	48
Acknowledgment	49
References	50
2. New Insights Into the Mechanism of Development of <i>Arabidopsis</i> Root Hairs and Trichomes	67
Rumi Tominaga-Wada, Tetsuya Ishida, and Takuji Wada	
1. Introduction	68
2. Development of Root Hairs	69
3. Development of Trichomes	86
4. Concluding Remarks	94
Acknowledgments	95
References	95
3. Metastasis Suppressor Genes: At the Interface Between the Environment and Tumor Cell Growth	107
Douglas R. Hurst and Danny R. Welch	
1. Introduction	108
2. Genetic Regulation of Metastasis	121
3. Functionally Validated Metastasis Suppressor Genes	126
4. Conclusions and Perspectives	149

Acknowledgments	151
References	151
4. Dynamic Behavior of Double-Membrane-Bounded Organelles in Plant Cells	181
Shingo Takagi, Md. Sayeedul Islam, and Kosei Iwabuchi	
1. Introduction	182
2. Nuclear Positioning in Plant Cells	183
3. Dynamic Behavior of Plant Mitochondria	194
4. Overview of Recent Investigation on Plastids-Cytoskeleton Interactions	204
5. Perspectives	206
Acknowledgments	208
References	208
5. The Biology of the Desmosome-Like Junction: A Versatile Anchoring Junction and Signal Transducer in the Seminiferous Epithelium	223
Pearl P.Y. Lie, C. Yan Cheng, and Dolores D. Mruk	
1. Introduction	224
2. Structure, Function, and Regulation of Conventional Desmosomes	227
3. Desmosome-Like Junctions in the Seminiferous Epithelium	250
4. Junction Complexes in the Seminiferous Epithelium	252
5. Junctional Interplay at the BTB: Tight Junctions, Ectoplasmic Specializations, Desmosome-Like and Gap Junctions	255
6. Concluding Remarks	258
Acknowledgments	258
References	259
6. Abl Family of Tyrosine Kinases and Microbial Pathogenesis	271
Silja Wessler and Steffen Backert	
1. Introduction	272
2. Functional Role of Abl Kinases in Bacterial Infections	276
3. Functional Role of Abl Kinases in Viral Pathogenesis	286
4. Role of Abl Kinases in Transmissible Spongiform Encephalopathies	290
5. Concluding Remarks	292
References	292
