PART 1 FUSION AND FISSION OF LIPID BILAYERS

CHAPTER 1 The Pathway to Membrane Fusion through Hemifusion

*Jörg Nikolaus, Jason M. Warner, Ben O'Shaughnessy
and Andreas Herrmann*

- I. Overview 1
- II. Introduction 2
- III. Criteria and Assays to Identify Hemifusion 6
- IV. Experimental Evidence for Hemifusion 8
- V. Modeling the Biophysical Mechanisms
of Hemifusion on the Pathway to Fusion 15
- References 22

CHAPTER 2 Dynamic Remodeling of Membranes Catalyzed by Dynamin

Thomas J. Pucadyil

- I. Overview 33
- II. Introduction 34
- III. Characteristics of Dynamin 35
- IV. Dynamin-Induced Membrane Remodeling 35
- V. Evolution of Models for Dynamin-Catalyzed
Membrane Fission 41
- VI. Current Insights from Structural Studies 42
- VII. Future Perspectives 44
- References 45

PART 2 VIRAL FUSION**CHAPTER 3 Structure and Working of Viral Fusion Machinery***Aur lie Albertini, St phane Bressanelli, Jean Lepault and Yves Gaudin*

- I. Overview 49
- II. Introduction 50
- III. Structures of Fusion Proteins 51
- IV. Regulation of the Conformational Change 63
- V. Working of the Fusion Machinery 65
- VI. Concluding Remarks 71
- References 71

CHAPTER 4 Membrane Fusion Mediated by Human Immunodeficiency Virus Envelope Glycoprotein*Gregory B. Melikyan*

- I. Overview 81
- II. Introduction 82
- III. HIV Assembly and Structure 82
- IV. Structural Changes in HIV Env Leading to Membrane Fusion 86
- V. What Drives the Enlargement of Fusion Pores? 92
- VI. HIV Entry Pathways 93
- VII. Concluding Remarks 97
- References 98

CHAPTER 5 The Reovirus Fusion-Associated Small Transmembrane (FAST) Proteins: Virus-Encoded Cellular Fusogens*Julie Boutilier and Roy Duncan*

- I. Overview 107
- II. Introduction 108
- III. The Diversity of Fast Proteins 112
- IV. The Fast Proteins are Necessary and Sufficient to Induce Membrane Fusion 115
- V. The Fast Proteins and Prefusion Events 116
- VI. The Fast Proteins and Membrane Merger 121
- VII. The Fast Proteins and Postfusion Events 128
- VIII. Model of the Fast Protein-Mediated Cell-Cell Fusion Reaction 130
- IX. Summary and Future Directions 132
- References 134

PART 3 INTRACELLULAR FUSION**CHAPTER 6 C2 Domains and Membrane Fusion***Sascha Martens and Harvey T. McMahon*

- I. Overview 141
- II. Membrane Fusion 141
- III. The Molecular Machinery Mediating Calcium-Dependent Membrane Fusion 146
- IV. Conclusion 154
- References 155

CHAPTER 7 Chasing the Trails of SNAREs and Lipids Along the Membrane Fusion Pathway*Tae-Young Yoon, Dae-Hyuk Kweon and Yeon-Kyun Shin*

- I. Overview 161
- II. Introduction 162
- III. SNARE-Dependent Membrane Fusion 163
- IV. Small Molecules as Interrogators for SNARE-Mediated Membrane Fusion 170
- V. Single Molecule (or Particle) Fluorescence Techniques to Study SNARE-Mediated Membrane Fusion 173
- References 180

CHAPTER 8 Inferring Structures of Kinetic Intermediates in Ca^{2+} -Triggered Exocytosis*Meyer B. Jackson*

- I. Overview 185
- II. Introduction 186
- III. Hypothetical Intermediates 187
- IV. Lipid Contact 188
- V. Fluid Contact 190
- VI. Hydrocarbon-Water Contact 191
- VII. Membrane Bending 192
- VIII. Role of Proteins 196
- IX. Conclusion 202
- References 203

PART 4 DEVELOPMENTAL CELL FUSION

CHAPTER 9 Eukaryotic Cell-Cell Fusion Families

Ori Avinoam and Benjamin Podbilewicz

- I. Overview 209
- II. Introduction 210
- III. Choosing a Model System: *C. elegans* as an Organism to Study Cell-Cell Fusion 211
- IV. Syncytins: an Expanding Metazoan Fusion Family 223
- V. Regulation of Cell-Cell Fusion in Nematodes and Mammals 225
- VI. Concluding Remarks 226
- References 227

CHAPTER 10 Invasive Podosomes and Myoblast Fusion

Elizabeth H. Chen

- I. Overview 235
- II. Introduction 235
- III. Myoblast Fusion in Vertebrates 235
- IV. *Drosophila* as A Model System to Study Myoblast Fusion 237
- V. Myoblast Fusion in *Drosophila* 238
- VI. Relevance to Vertebrate Myoblast Fusion 252
- VII. Concluding Remarks 253
- References 254

PART 5 THEORETICAL MODELING

CHAPTER 11 Lipid Acrobatics in the Membrane Fusion Arena

Albert J. Markvoort and Siewert J. Marrink

- I. Overview 259
- II. Introduction 260
- III. Historical Background 261
- IV. Fusion Pathways at the Molecular Level 263
- V. Energy Landscape Along the Fusion Pathway 268
- VI. Fission Pathways in Molecular Detail 276
- VII. Peptide Modulated Fusion 281
- VIII. Outlook 287
- References 289

CHAPTER 12 An Alternate Path for Fusion and its Exploration by
Field-Theoretic Means*Marcus Müller and Michael Schick*

- I. Overview 295
- II. Introduction 295
- III. A Different Pathway to Fusion 298
- IV. Results from A Field-Theoretic Description 303
- V. Outlook 314
- VI. Conclusion 318
- References 319
