Foreword to the Second Edition	xi
Foreword to the First Edition	xiii
Preface to the First Edition	xv
In remembrance of Keith Henry Stockman Campbell (23 May 1954–5 October 2012)	xvii
List of Contributors	xix

Part I Basics

1. Artificial Activation of Mammalian Oocytes for Cloning: Present Status and Future Perspectives

Takuya Wakai, Junya Ito and Rafael A. Fissore

2. Epigenetic Reprogramming of Somatic Nuclei via Cell Fusion

Takashi Tada and M. Azim Surani

3. Nuclear Origins and Clone Phenotype: What Cloning Tells Us about Embryonic Development

Dasari Amarnath and Keith E. Latham

Part II Methods

4. Micromanipulation Techniques for Cloning

Raymond L. Page and Christopher M. Malcuit

5. Nuclear Transfer with Germ Cells: Germ Cell Cloning Contributes to Current Understanding of Genomic Imprinting in Mammals

Jiyoung Lee, Takashi Kohda and Fumitoshi Ishino

6. Culture of Viable Mammalian Embryos *In Vitro*

David K. Gardner and Michelle Lane

7. Genetic and Phenotypic Similarity Among Members of Mammalian Clonal Sets

George E. Seidel Jr.

8. Advances in the Generation of Transgenic Domestic Species via Somatic Cell Nuclear Transfer

Xia Zhang and Jorge A. Piedrahita

9. Pregnancy and Neonatal Care of SCNT Animals

Pascale Chavatte-Palmer, Rita Lee, Marcelo Bertolini, Hélène Jammes, Mette Schmidt and Henrik Callesen

10. Donor Cell Type and Cloning Efficiency in Mammals

Yoko Kato and Yukio Tsunoda

11. Enhancing SCNT with Chromatin Remodeling Agents

Satoshi Kishigami, Van Thuan Nguyen, Sayaka Wakayama and Teruhiko Wakayama

12. Cell Cycle Regulation in Cloning

Keith H.S. Campbell, Inchul Choi, Jie Zhu and Josef Fulka

13. Clone-Specific X-Linked Gene Repression Caused by Ectopic Xist Transcripts from the Active X Chromosome

Kimiko Inoue and Atsuo Ogura

Part III Cloning by Species

14. Cloning of Amphibia 175
Marta Teperek-Tkacz, James A. Byrne and J. B. Gurdon
15. Cloning of Medaka Fish 187
Yuko Wakamatsu
16. Somatic Cell Nuclear Transfer in Zebrafish 197
Kannika Siripattarapratvat, Boonya Pinmee and José B. Cibelli
17. Cloning of Mice 209
Eiji Mizutani, Satoshi Kishigami and Teruhiko Wakayama
18. Cloning of Rabbits 227
Qinggang Meng, Zsuzsanna Polgar, Zsuzsanna Tancos, Xiuchun (Cindy) Tian and Andras Dinnyes
19. Cloning Pigs by Somatic Cell Nuclear Transfer 245
Kiho Lee and Randall S. Prather
20. A Historical Perspective of the Cloning of Cattle 255
Marijo Kent-First, Zeki Beyhan, Jennifer Ambroggio and Neal L. First
21. Cloning of Canines 273
Byeong Chun Lee, Hyunju Oh, Minjung Kim, Geon A Kim and Jung Eun Park
22. Cloning of Equines 287
Cesare Galli, Irina Lagutina, Roberto Duchi, Silvia Colleoni and Giovanna Lazzari
23. Cloning Primates 299
Calvin Simerly, Masahito Tachibana, Shoukhrat Mitalipov and Gerald Schatten

Part IV Applications

24. Nuclear Transfer for Stem Cells 313
Alan Trounson
25. Current Research and Commercial Applications of Cloning Technology 317
Steven L. Stice and David Faber
26. Transgenic Cloned Goats and the Production of Recombinant Therapeutic Proteins 329
William Gavin, LiHow Chen, Michael Schofield, Nick Masiello, Harry Meade and Yann Echelard
27. Commercializing Genetically Engineered Cloned Cattle 343
Eddie J. Sullivan, Jerry Pommer and Zhongde Wang
28. Cloning Endangered Species 353
Pasqualino Loi, Jacek Modlinski and Grazyna Ptak

Part V Complementary Technologies

29. Genome Editing in Somatic Cells Using Zinc Finger Nucleases and Transcription Activator-Like Effector Nucleases 369
Shondra M. Pruett-Miller
30. Targeted Chromosome Elimination from ES-Somatic Hybrid Cells 379
Kunio Hirano, Liang Tso Sun and Takashi Tada

Part VI SCNT as a Tool to Answer Biological Questions

31. How Cell Division Facilitates Nuclear Reprogramming 393
Jason Fan and Dieter Egli

32. Proteomic Approach to the Reprogramming Machinery of the Mouse Oocyte	407	38. Role of iPSC-Producing Factors in Pre-Implantation Embryos	473
<i>Martin J. Pfeiffer, Marcin Siatkowski, Yogesh Pauldel, Sebastian T. Balbach, Nicole Baeumer, Nicola Crosetto, Hannes C.A. Drexler, Georg Fuellen and Michele Boiani</i>		<i>Tomokazu Amano and Minoru S.H. Ko</i>	
33. Biological Age of Cloned Animals	419	Part VII	
<i>Kazuhiro Saeki, Yoichiro Hoshino and Shunji Taniguchi</i>		Ethical and Legal Affairs	
34. Mitochondrial DNA	429	39. Genome Exchange in Human Oocytes	487
<i>Justin C. St. John</i>		<i>Daniel Paull and Dieter Egli</i>	
35. Interspecies Somatic Cell Nuclear Transfer	441	40. Ethical Implications of Reproductive Cloning	497
<i>Sebastian Canovas and José B. Cibelli</i>		<i>Ronald M. Green</i>	
36. Epigenetics of Cloned Livestock Embryos and Offspring	453	41. An Overview of the Regulatory Considerations for Animal Cloning	507
<i>Heiner Niemann</i>		<i>Jeff Jones, Harlan Howard, Kathleen M. Jones and Larisa Rudenko</i>	
37. Comparing SCNT-Derived ESCs and iPSCs	465	Author Index	517
<i>Bradly Alicea and José B. Cibelli</i>		Subject Index	555
