Section 1

GPCR Trafficking

1. Therapeutic Rescue of Misfolded/Mistrafficked Mutants: Automation-Friendly High-Throughput Assays for Identification of Pharmacoperone Drugs of GPCRs	3
David C. Smithson, Jo Ann Janovick, and P. Michael Conn	
1. Introduction	4
2. Choosing Pharmacoperone Model Systems	5
3. Selection of Endpoint Measures	7
4. Assay Automation	11
5. Data Analysis	12
6. Hit Follow-Up Experiments	12
7. Conclusions	14
Acknowledgments	14
References	14
2. Trafficking of the Follitropin Receptor	17
Alfredo Ulloa-Aguirre, James A. Dias, George Bousfield, Ilpo Huhtaniemi, and Eric Reiter	
1. Introduction	18
2. Outward Trafficking Defective FSHR Mutants. Studying Plasma Membrane Expression of the FSHR	23
3. Studying Oligomerization of Intracellular and Cell Surface-Expressed FSHRs	29
4. Phosphorylation, Internalization, and Recycling of the FSHR (Downward Trafficking)	33
Acknowledgments	41
References	41
3. Single-Molecule Imaging Technique to Study the Dynamic Regulation of GPCR Function at the Plasma Membrane	47
B. E. Snaar-Jagalska, A. Cambi, T. Schmidt, and S. de Keijzer	
1. Introduction	48

2. Labeling of GPCRs and Sample Preparation for SPT	48
3. Single-Molecule Imaging	56
4. Data Analysis	61
5. Concluding Remarks	64
Acknowledgments	65
References	65
4. GPCR Oligomerization and Receptor Trafficking	69
Richard J. Ward, Tian-Rui Xu, and Graeme Milligan	
1. Introduction	70
2. GPCR Expression Using the Flp-In™ T-Rex™ System	72
3. Detecting GPCR Internalization by Fluorescent Microscopy: The Orexin OX ₁ Receptor	74
4. SNAP-CLIP Tagging	75
5. Detecting GPCR Oligomerization by other Resonance Energy Transfer Techniques	82
6. Biotinylation Studies	84
7. ER Trapping, Pharmacological Chaperones, and the Use of Engineered Synthetic Ligands	87
Acknowledgments	89
References	89
5. β-Arrestins and G Protein-Coupled Receptor Trafficking	91
Dong Soo Kang, Xufan Tian, and Jeffrey L. Benovic	
1. Introduction	92
2. Arrestin Expression	92
3. Assays to Measure GPCR Trafficking	97
4. Evaluating the Role of β -Arrestins in GPCR Trafficking	102
5. Summary	103
Acknowledgments	105
References	105
6. Tracking Cell Surface Mobility of GPCRs Using α-Bungarotoxin-Linked Fluorophores	109
Saad Hannan, Megan E. Wilkins, Philip Thomas, and Trevor G. Smart	
1. Introduction	110
2. Methodology	113
3. Validating the BBS Tag	117
4. Experimental Applications for the BBS Tag	120

5. Image Analysis	123
6. Other Applications	126
7. Overview	128
References	128
 7. Regulatory Mechanism of G Protein-Coupled Receptor Trafficking to the Plasma Membrane: A Role for mRNA Localization	 131
Kusumam Joseph, Eleanor K. Spicer, and Baby G. Tholanikunnel	
1. Introduction	132
2. Purification and Identification of β_2 -AR mRNA-Binding Proteins	134
3. Functional Characterization of β_2 -AR mRNA-Binding Proteins in Receptor Expression and Function	137
4. Role of RNA-Binding Protein HuR in Receptor Trafficking to the Plasma Membrane	139
5. β_2 -AR mRNA Localization in Cells	141
6. Concluding Remarks and Future Perspectives	146
Acknowledgments	147
References	147
 8. Dissecting Trafficking and Signaling of Atypical Chemokine Receptors	 151
Elena Borroni, Cinzia Cancellieri, Massimo Locati, and Raffaella Bonecchi	
1. Introduction	152
2. ACR Trafficking	153
3. Atypical Chemokine Receptor Signaling	158
4. Summary	166
References	167
 Section 2	
Trafficking Motifs	
 9. Systematic and Quantitative Analysis of G Protein-Coupled Receptor Trafficking Motifs	 171
Carl M. Hurt, Vincent K. Ho, and Timothy Angelotti	
1. Introduction	172
2. Motif Screening by Immunofluorescent Staining	173
3. Analysis of Receptor Functionality	175
4. Biochemical Analysis of ER/Golgi Trafficking	179

5. Quantitative Analysis of GPCR Trafficking	181
6. Summary	184
Acknowledgments	186
References	186
10. Identification of Endoplasmic Reticulum Export Motifs for G Protein-Coupled Receptors	189
Guangyu Wu	
1. Introduction	190
2. Experimental Approaches to Identify ER Export Motifs for GPCRs	191
3. Conclusions	199
Acknowledgment	200
References	200
11. Amino Acid Residues of G-Protein-Coupled Receptors Critical for Endoplasmic Reticulum Export and Trafficking	203
Motono Nakamura, Daisuke Yasuda, Nobuaki Hirota, Teruyasu Yamamoto, Satoshi Yamaguchi, Takao Shimizu, and Teruyuki Nagamune	
1. Introduction	204
2. Generation of Mutant GPCRs	205
3. Examination of Mutant GPCR Trafficking	205
4. ER Export of Mutant GPCRs by Specific Ligands	209
5. Functional Analysis of Surface-Trafficked Mutant GPCRs in Living Cells	210
6. Conclusion	214
Acknowledgments	215
References	215
Section 3	
GPCR Oligomerization	
12. G-Protein-Coupled Heteromers: Regulation in Disease	219
Ivone Gomes, Achla Gupta, and Lakshmi A. Devi	
1. Introduction	220
2. Generation of Heteromer-Selective mAbs	221
3. ELISA for Detection of Receptor Heteromers	228
4. Immunofluorescence for Visualization of Receptor Heteromers	230
5. Immunoprecipitation and Western Blotting	232
6. Summary and Perspectives	235

Acknowledgment	236
References	236
13. Hetero-oligomerization and Specificity Changes of G Protein-Coupled Purinergic Receptors: Novel Insight into Diversification of Signal Transduction	239
Tokiko Suzuki, Kazunori Namba, Natsumi Mizuno, and Hiroyasu Nakata	
1. Introduction	240
2. Measurement of GPCR Dimerization	242
3. Receptor Pharmacology	250
4. Conclusion	255
References	256
14. Bimolecular Fluorescence Complementation Analysis of G Protein-Coupled Receptor Dimerization in Living Cells	259
Karin F.K. Ejendal, Jason M. Conley, Chang-Deng Hu, and Val J. Watts	
1. Introduction	260
2. Generation of GPCR-BiFC Fusion Proteins	262
3. Detection of GPCR Interactions using BiFC and Fluorescence Microscopy	266
4. Microscopic Detection of GPCR Interactions by mBiFC	270
5. Fluorometric Detection of GPCR Dimerization using BiFC and mBiFC	273
6. Summary	275
Acknowledgments	276
References	276
15. G Protein-Coupled Receptor Heterodimerization in the Brain	281
Dasiel O. Borroto-Escuela, Wilber Romero-Fernandez, Pere Garriga, Francisco Ciruela, Manuel Narvaez, Alexander O. Tarakanov, Miklós Palkovits, Luigi F. Agnati, and Kjell Fuxe	
1. Introduction	282
2. <i>In Situ</i> PLA for Demonstrating Receptor Heteromers and Their Receptor-Receptor Interactions in Brain Tissue	283
3. Brain Tissue Preparation	283
4. Proximity Probes: Conjugation of Oligonucleotides to Antibodies	287
5. PLA Reactions, Reagents, and Solutions	287
6. Quantitative PLA Image Analysis	289
7. Advantages and Disadvantages of the PLA Method	289
8. Application	291

Acknowledgments	293
References	293
16. Experimental Strategies for Studying G Protein-Coupled Receptor Homo- and Heteromerization with Radioligand Binding and Signal Transduction Methods	295
Roberto Maggio, Cristina Rocchi, and Marco Scarselli	
1. Introduction	296
2. Radioligand Binding in Receptor Oligomerization	296
3. Signal Transduction in Receptor Oligomerization	302
4. Domain Swapping in Receptor Oligomerization	306
5. Concluding Remarks	307
References	308
17. Analysis of GPCR Dimerization Using Acceptor Photobleaching Resonance Energy Transfer Techniques	311
Marta Busnelli, Mario Mauri, Marco Parenti, and Bice Chini	
1. Introduction	312
2. Resonance Energy Transfer	313
3. Fluorescent Resonance Energy Transfer	313
4. BRET	321
5. Conclusions	326
Acknowledgments	327
References	327
18. Techniques for the Discovery of GPCR-Associated Protein Complexes	329
Avais Daulat, Pascal Maurice, and Ralf Jockers	
1. Introduction	330
2. TAP of GPCR and Its Associated Protein Complexes	331
3. Alternative Methodology to Perform TAP of GPCR-Associated Protein Complexes	337
4. Purification of GPCR-Associated Protein Complexes by Peptide Affinity Chromatography	339
5. Conclusion	343
Acknowledgments	344
References	344

19. Expression, Purification, and Analysis of G-Protein-Coupled Receptor Kinases	347
Rachel Sterne-Marr, Alison I. Baillargeon, Kevin R. Michalski, and John J. G. Tesmer	
1. Introduction	348
2. Expression and Purification of GRKs	349
3. GRK Functional Assays	357
Acknowledgments	364
References	364
20. Modern Methods to Investigate the Oligomerization of Glycoprotein Hormone Receptors (TSHR, LHR, FSHR)	367
Marco Bonomi and Luca Persani	
1. Introduction	368
2. Resonance Energy Transfer Techniques	369
3. Experimental Procedures	376
Acknowledgments	381
References	381
