ix

1. The Immunobiology of IL-27	1
Aisling O'Hara Hall, Jonathan S. Silver, and Christopher A. Hunter	
1. The Biology of IL-27: Subunits, Sources, Receptors, and Signaling	2
2. Proinflammatory Properties of IL-27	16
3. Anti-Inflammatory Properties of IL-27	20
4. The Role of IL-27 in Other Cell Types	26
5. Translational Implications of IL-27	29
6. Conclusions	32
Acknowledgments	32
References	33
2. Autoimmune Arthritis: The Interface Between the Immune System and Joints	45
Noriko Komatsu and Hiroshi Takayanagi	
1. Introduction	46
2. CD4 ⁺ T Cells and Other Immunological Components Involved in Inflammatory Arthritis	47
3. Bone Destruction in Rheumatoid Arthritis	59
4. Concluding Remarks	63
Acknowledgments	64
References	64
3. Immunological Tolerance During Fetal Development: From Mouse to Man	73
Jeff E. Mold and Joseph M. McCune	
1. A Brief Overview About Central and Peripheral Tolerance	74
2. The Birth of Immunological Tolerance	78
3. The Case of Tolerance to Noninherited Maternal Alloantigens	79
4. Microchimerism as a Consequence of Normal Human Pregnancy	80
5. Immunological Tolerance and Development of the Adaptive Immune System	85
6. Lymphocyte Ontogeny in the Human Fetus	92

7. Immunological Tolerance <i>In Utero</i>	94
8. Gene Expression Patterns in Fetal and Adult T Cell Lineages	100
9. Conclusions: A Model for the Generation of Peripheral Tolerance in Human Beings	101
References	103
 4. Mapping Lupus Susceptibility Genes in the NZM2410 Mouse Model	 113
Laurence Morel	
1. Introduction: The NZM2410 Mouse Model	114
2. Genetic Analysis of NZM2410 Crosses	116
3. Congenic Dissection and QTL Locus Validation	118
4. The NZW MHC Locus Contribution to Lupus Pathogenesis	120
5. Genetic Reconstitution of the NZM2410 Model: The BcN/ImJ Strain	122
6. <i>Sle1</i> Susceptibility Genes	123
7. <i>Sle2</i> Susceptibility Genes	126
8. <i>Sle3</i> Susceptibility Genes	129
9. Concluding Remarks	131
References	132
 5. Functional Heterogeneity in the Basophil Cell Lineage	 141
Mark C. Siracusa, Elia D. Tait Wojno, and David Artis	
1. Introduction	142
2. Basophil Development	143
3. Basophil Activation and Effector Functions: The Traditional View	146
4. Emerging Functions of Basophils	147
5. Functional Heterogeneity in Basophil Populations	151
6. Future Challenges	155
7. Summary	156
Acknowledgments	156
References	156
 6. An Emerging Role of RNA-Binding Proteins as Multifunctional Regulators of Lymphocyte Development and Function	 161
Martin Turner and Daniel J. Hodson	
1. Introduction	162
2. Sequence-Specific RNA-Binding Proteins	163
3. Role of RBP in Lymphocyte Development	164
4. Roles for RBP in Lymphocyte Activation	168
5. RBP: Effectors of Signal Transduction Pathways	174
6. Perspective and Conclusion	176

Acknowledgments	177
References	177
7. Active and Passive Anticytokine Immune Therapies: Current Status and Development	187
Hélène Le Buanec, Armand Bensussan, Martine Bagot, Robert C. Gallo, and Daniel Zagury	
1. Introduction	188
2. Rationale for Anticytokine Ab Therapy	192
3. Requirements for the Use of Anticytokine Ab Therapy in Humans	199
4. Passive AC Ab Therapies	202
5. Active AC Ab Therapy	209
6. Conclusion	216
Acknowledgment	216
References	217
