

CONTENTS

<i>Contributors</i>	ix
<i>Preface</i>	xiii
1. Viruses and Prions of <i>Saccharomyces cerevisiae</i>	1
Reed B. Wickner, Tsutomu Fujimura, and Rosa Esteban	
1. Introduction	2
2. L-A Virus and the Killer Satellite dsRNAs	3
3. Biology of the <i>S. cerevisiae</i> dsRNA Viruses	12
4. Yeast Narnaviruses: 20S and 23S RNAs	13
5. Yeast Prions	20
6. Biology of Yeast Prions	26
7. Prospects	26
Acknowledgments	28
References	28
2. Multiplexed Interactions: Viruses of Endophytic Fungi	37
Xiaodong Bao and Marilyn J. Roossinck	
1. Introduction	37
2. Classification of Fungal Endophytes	38
3. Viruses of Fungal Endophytes	40
4. Roles of Viruses in Endophytic Fungi	48
5. Practical Roles for Endophyte Viruses	53
6. Summary	54
Acknowledgments	54
References	54
3. 3D Structures of Fungal Partitiviruses	59
Max L. Nibert, Jinghua Tang, Jiatao Xie, Aaron M. Collier, Said A. Ghabrial, Timothy S. Baker, and Yizhi J. Tao	
1. Introduction to Partitiviruses	60
2. Partitivirus Capsid Structures	63
3. Partitivirus RdRp and dsRNA Structures	70
4. Comparisons with Other Bisegmented dsRNA Viruses	74
5. Comparisons with Other Fungal Viruses with Encapsidated dsRNA Genomes	77
6. Proposed Revisions to Partitivirus Taxonomy	79

Acknowledgments	81
References	81
4. Chrysovirus Structure: Repeated Helical Core as Evidence of Gene Duplication	87
José R. Castón, Daniel Luque, Josué Gómez-Blanco, and Said A. Ghabrial	
1. Introduction	88
2. dsRNA Virus Core Proteins	90
3. <i>Penicillium chrysogenum</i> Virus Capsid Structure	92
4. <i>Cryphonectria nitschkei</i> Chrysovirus Capsid Structure	95
5. Comparison of Chrysovirus and Totivirus CPs: Evolutionary Relationships	99
6. dsRNA Organization Within the Capsid	101
7. Conclusions and Prospects	104
Acknowledgments	104
References	105
5. Hypovirus Molecular Biology: From Koch's Postulates to Host Self-Recognition Genes that Restrict Virus Transmission	109
Angus L. Dawe and Donald L. Nuss	
1. Introduction	110
2. Molecular Characterization of Hypovirulence-Associated dsRNAs	110
3. The <i>Hypoviridae</i>	113
4. Technical Challenges of Mycovirus Research: Development of the Hypovirus Experimental System and Completion of Koch's Postulates	115
5. Hypovirus Translation and Gene Expression	117
6. Impact of Hypovirus Infection on the Fungal Host	121
7. Fungal Antiviral Defense Mechanisms	128
8. Concluding Remarks	138
References	140
6. The Family <i>Narnaviridae</i>: Simplest of RNA Viruses	149
Bradley I. Hillman and Guohong Cai	
1. Introduction	150
2. Discovery and Early Work on the <i>Narnaviridae</i> with Emphasis on Selected Systems	151
3. Early Work Leading to Description of Mitoviruses	152
4. Relationships Among Members of the <i>Narnaviridae</i>	158
5. Population Biology of Members of the <i>Narnaviridae</i>	164

6. Other Genome Features and Molecular Manipulation of Members of the <i>Narnaviridae</i>	166
7. Conclusions and Future Directions	169
References	170
7. Viruses of the White Root Rot Fungus, <i>Rosellinia necatrix</i>	177
Hideki Kondo, Satoko Kanematsu, and Nobuhiro Suzuki	
1. Introduction	178
2. Viruses of <i>R. necatrix</i>	186
3. Expansion of Host Ranges of <i>R. necatrix</i> -Infecting Viruses	199
4. Conclusions and Prospects	203
Acknowledgments	206
References	206
8. Viruses of the Plant Pathogenic Fungus <i>Sclerotinia sclerotiorum</i>	215
Daohong Jiang, Yanping Fu, Li Guoqing, and Said A. Ghabrial	
1. Introduction	216
2. Mycoviruses of <i>S. sclerotiorum</i>	218
3. The Interaction Between Mycovirus and <i>S. sclerotiorum</i>	238
4. Coinfection of <i>S. sclerotiorum</i> with Multiple Mycoviruses	240
5. The Potential Use of Mycoviruses to Control <i>Sclerotinia</i> Diseases	241
6. Conclusions and Prospects	242
Acknowledgments	243
References	244
9. Viruses of Botrytis	249
Michael N. Pearson and Andrew M. Bailey	
1. Introduction	250
2. Molecular Characterization and Phylogenetic Relationships of Botrytis Viruses	254
3. Effects of Viruses on Botrytis	259
4. Virus Transmission	264
5. Conclusions and Future Research	267
References	269
10. Insight into Mycoviruses Infecting <i>Fusarium</i> Species	273
Won Kyong Cho, Kyung-Mi Lee, Jisuk Yu, Moonil Son, and Kook-Hyung Kim	
1. Introduction	274
2. Isolation and Characterization of dsRNA Mycoviruses Infecting <i>Fusarium</i> Species	275

3. Diversity of Fusarium Mycoviruses Based on Genome Organization	277
4. Identification of Fungal Host Factors by Proteomics and Transcriptomics	281
5. Transmission of Fusarium Mycovirus by Protoplast	283
6. Future Directions for Research on Mycovirus–Host Interactions	285
Acknowledgments	285
References	285
11. Viruses of <i>Helminthosporium (Cochliobius) victoriae</i>	289
Said A. Ghabrial, Sarah E. Dunn, Hua Li, Jiatao Xie, and Timothy S. Baker	
1. Introduction	290
2. Historical Perspectives	291
3. Viruses of <i>H. victoriae</i>	293
4. Host Genes Upregulated by Virus Infection	306
5. HV190S Capsid Structure	314
6. Concluding Remarks	320
Acknowledgments	321
References	321
12. Phytophthora Viruses	327
Guohong Cai and Bradley I. Hillman	
1. Introduction to Oomycetes—Phylogeny, Habitats, and Properties	328
2. History of Oomycete Virus Research	330
3. Properties of Four Viruses of <i>P. infestans</i>	333
4. Transmission of Phytophthora Viruses	344
5. Molecular Manipulations of Phytophthora Viruses	345
6. Conclusions, Future Directions, and Closing Remarks	345
References	346
Index	351
<i>Color plate section at the end of the book</i>
