

CONTENTS

<i>Contributors</i>	ix
1. Studies with <i>Listeria monocytogenes</i> Lead the Way	1
Emil R. Unanue and Javier A. Carrero	
2. Interactions of <i>Listeria monocytogenes</i> with the Autophagy System of Host Cells	7
Grace Y. Lam, Mark A. Czuczman, Darren E. Higgins, and John H. Brumell	
1. Introduction	8
2. Phagosome Escape	9
3. Autophagy and <i>L. monocytogenes</i>	12
4. Conclusion	15
References	16
3. Virulence Factors That Modulate the Cell Biology of <i>Listeria</i> Infection and the Host Response	19
Serge Mostowy and Pascale Cossart	
1. Introduction	20
2. The Cell Biology of <i>Listeria</i> Infection	20
3. Bacterial Interaction with Host Defenses	24
4. Conclusions and Perspectives	27
References	28
4. Dendritic Cells in <i>Listeria monocytogenes</i> Infection	33
Brian T. Edelson	
1. Introduction	34
2. DCs in Establishment of Lm Infection	36
3. DC Cytokine Production During Lm Infection	41
4. DCs as Antigen-Presenting Cells During Lm Infection	43
5. Conclusions	44
Acknowledgments	45
References	45

5. Probing CD8 T Cell Responses with <i>Listeria monocytogenes</i> Infection	51
Stephanie A. Condotta, Martin J. Richer, Vladimir P. Badovinac, and John T. Harty	
1. Introduction	52
2. Recombinant <i>L. monocytogenes</i> as a Versatile Vehicle to Probe Antigen-specific CD8 T Cell Responses	53
3. Primary CD8 T Cell Responses	56
4. Memory CD8 T Cell Responses	61
5. Surrogate Markers to Track Antigen-specific CD8 T Cell Responses	71
6. Future Directions	71
7. Conclusion	74
Acknowledgments	74
References	74
6. <i>Listeria monocytogenes</i> and Its Products as Agents for Cancer Immunotherapy	81
Patrick Guirnalda, Laurence Wood, and Yvonne Paterson	
1. The Challenge of Tumor Immunotherapy	82
2. The Biology of <i>L. monocytogenes</i>	83
3. The Pleiotropic Effects of <i>Listeria</i> in Tumor Immunotherapy	96
4. The Use of <i>Listeria</i> to Target Tumor Vasculature	98
5. <i>Listeria</i> as a Vector for cDNA and mRNA Delivery	101
6. <i>Listeria</i> Virulence Factors as Protein Carriers	103
7. Direct Tumor Killing by <i>Listeria</i>	106
8. Challenges in Moving <i>Listeria</i> -Based Tumor Immunotherapy into the Clinic	107
Acknowledgment	111
References	111
7. Monocyte-Mediated Immune Defense Against Murine <i>Listeria monocytogenes</i> Infection	119
Natalya V. Serbina, Chao Shi, and Eric G. Pamer	
1. Monocytes and the Discovery of <i>Listeria monocytogenes</i>	120
2. Monocyte Populations Circulating in the Mouse Bloodstream	121
3. CCR2-Mediated Monocyte Recruitment	121
4. Myeloid Cells in Defense Against <i>L. monocytogenes</i>	122
5. Ly6C ^{hi} Monocytes and TipDCs During <i>L. monocytogenes</i> Infection	122
6. The Role of CCL2 and CCL7 in Monocyte Recruitment	123
7. CCL2 Expression During <i>L. monocytogenes</i> Infection	125
8. <i>L. monocytogenes</i> Infection Increases Monocytopoiesis	125

9. Type I Interferon Effects on CCL2 Expression	126
10. CCR2-Deficient Ly6C ^{hi} Monocytes are Retained in the Bone Marrow	127
11. Ly6C ^{hi} Monocyte Recruitment to Infected Tissues	128
12. Monocyte Emigration From the Bone Marrow	129
13. Conclusions	131
References	131
8. Innate Immune Pathways Triggered by <i>Listeria monocytogenes</i> and Their Role in the Induction of Cell-Mediated Immunity	135
Chelsea E. Witte, Kristina A. Archer, Chris S. Rae, John-Demian Sauer, Joshua J. Woodward, and Daniel A. Portnoy	
1. Introduction	136
2. Innate Immune Responses to <i>L. monocytogenes</i>	139
3. Identification of Bacterial Mutants that Induce Diminished or Enhanced Induction of the Cytosolic Surveillance Pathway and/or Inflammasome Activation	141
4. Relationship Between Innate and Acquired Immunity	149
5. Conclusions and Future Prospects	151
Acknowledgments	151
References	151
9. Mechanisms and Immunological Effects of Apoptosis Caused by <i>Listeria monocytogenes</i>	157
Javier A. Carrero and Emil R. Unanue	
1. Introduction: Apoptosis Following Infection With <i>L. monocytogenes</i>	158
2. Modulation of <i>In vivo</i> Apoptotic Lesion Formation Following Infection	161
3. Induction of Lymphocyte Apoptosis by LLO	163
4. Induction of Cell Death in Dendritic Cells or Macrophages Following Infection with <i>L. monocytogenes</i> or Treatment with LLO	165
5. Increased Resistance to Infection in Type I Interferon-Deficient Mice and its Relationship with Cell Death	167
6. Increased Resistance to Infection in Lymphocyte-Deficient Mice	168
7. Concluding Remarks	169
Acknowledgments	171
References	171
Index	175
Contents of Recent Volumes	181
