Preface

xiii

1. Nucleic Acid Adjuvants: Toward an Educated Vaccine **1**

Jasper G. van den Boorn, Winfried Barchet, and Gunther Hartmann

1. A Short Vaccination History	2
2. The Immune System as Sensory Tissue	5
3. Why Some Vaccines Just Do Not Work	8
4. Synergizing Innate Immune Stimuli	12
5. Therapeutic Vaccination: Just a Shot Away?	16
6. Toward the Integrated Response: Cross-Priming of Cytotoxic T Cell Immunity	18
7. Conclusion	21
Acknowledgments	22
References	22

2. Structure-Based Design for High-Hanging Vaccine Fruits **33**

Jaap W. Back and Johannes P. M. Langedijk

1. Targets for Structural Vaccinology	34
2. Stabilizing Antigens	37
3. Engineering Immunogenicity and Immunodominance	38
4. Focus on Domains	39
5. Focus on Minimal Antigenic Site	41
6. Natural Scaffolds	43
7. Concluding Remarks	46
Acknowledgments	46
References	46

3. Mechanisms of Peptide Vaccination in Mouse Models: Tolerance, Immunity, and Hyperreactivity **51**

Thorald van Hall and Sjoerd H. van der Burg

1. Introduction	52
2. Once Upon a Time	53
3. Rules of Engagement	55

4. Vaccine-Induced Hyper Reactivity	65
5. The Hallmarks of Peptide Vaccination	68
Acknowledgments	69
References	69
 4. Experience with Synthetic Vaccines for Cancer and Persistent Virus Infections in Nonhuman Primates and Patients	 77
Esther D. Quakkelaar and Cornelis J. M. Melief	
1. Introduction	78
2. Vaccination of Cancer Patients	79
3. Vaccination Against HIV-1	80
4. Vaccination Strategies	80
5. Synthetic Long Peptide Vaccine	83
6. Immune Escape	85
7. Clinical Studies with Peptide Vaccines in Cancer Patients	87
8. Synthetic Peptide Vaccination in Nonhuman Primates	92
9. Long Peptides as Prophylactic Vaccines	94
10. Improvement of Long Peptide Vaccination by Combination of Synthetic Vaccines with Other Cancer Treatment Modalities	94
11. Immunopharmacology	96
12. Hurdles to Successful Therapeutic Vaccination	96
13. Conclusions and Perspective	97
Acknowledgments	97
References	97
 5. Malaria Vaccine Development Using Synthetic Peptides as a Technical Platform	 107
Giampietro Corradin, Nora Céspedes, Antonio Verdini, Andrey V. Kajava, Myriam Arévalo, and Sócrates Herrera	
1. Introduction	108
2. Peptide Synthesis	112
3. Preerythrocytic <i>P. falciparum</i> Synthetic Vaccines	121
4. Erythrocytic Synthetic Vaccines	126
5. <i>P. vivax</i> Synthetic Vaccine	129
6. Future Developments	133
Acknowledgments	137
References	137

6. Enhancing Cancer Immunotherapy by Intracellular Delivery of Cell-Penetrating Peptides and Stimulation of Pattern-Recognition Receptor Signaling	151
Helen Y. Wang and Rong-Fu Wang	
1. Introduction	152
2. Adoptive Cell Therapy: History and Recent Progresses	153
3. APC-Based Vaccines: The First FDA Approved Drug for Prostate Cancer	155
4. Tumor Antigens Recognized by Tumor-Reactive T Cells	156
5. Current Progresses of Synthetic Peptide Vaccines	161
6. Enhancing Antitumor Immunity by Intracellular Delivery of Peptides into DCs	162
7. Enhancing Immune Responses and Blocking Immune Suppression by Stimulation of Innate Immune Receptors	163
8. Conclusions	165
Acknowledgments	166
References	166
 7. TLR Ligand–Peptide Conjugate Vaccines: Toward Clinical Application	 177
Gijs G. P. Zom, Selina Khan, Dmitri V. Filippov, and Ferry Ossendorp	
1. Introduction	178
2. Targeting and DC Maturation	179
3. Synthetic Peptide Vaccination	184
4. Conjugation of Antigen to TLR Ligands	185
5. Future Directions	192
References	196
 8. Behavior and Function of Tissue-Resident Memory T cells	 203
Silvia Ariotti, John B. Haanen, and Ton N. Schumacher	
1. Introduction	204
2. Regulation of Tissue-Resident Memory T Cells	205
3. Potential Functions of Tissue-Resident Memory T Cells	209
4. Tissue-Resident Memory T Cells and Vaccination	211
5. Concluding remarks	213
References	214

9. Rational Design of Vaccines: Learning from Immune Evasion Mechanisms of Persistent Viruses and Tumors	217
Ramon Arens	
1. Immune Evasion by Persistent Viruses and Tumors	218
2. Immune Evasion of Antigen Presentation Pathways	220
3. Immune Evasion of Costimulatory Pathways	223
4. Immune Evasion and the Interferon System	225
5. Immune Evasion and Induction of Inhibitory Cytokines	227
6. Immune Evasion and Chemokines	228
7. Coping With Immune Evasion: Implications for Rational Design of Vaccines and Immunotherapy	231
8. Future Prospects	234
Acknowledgments	235
References	235
<i>Index</i>	245
<i>Contents of Recent Volumes</i>	251
