1. High-Resolution ^1H -NMR Spectroscopy and Beyond to Explore Plant Metabolome

1

Dominique Rolin, Catherine Deborde, Mickael Maucourt, Cécile Cabasson, Florence Fauvelle, Daniel Jacob, Cécile Canlet, and Annick Moing

1. Introduction 2
2. NMR Signals: Measurable Properties 6
3. Metabolomics NMR Fingerprinting for Discriminating Plant Metabolomes 23
4. Metabolomics NMR Profiling and Spectra Annotation 31
5. Application of ^1H -NMR Profiling 36
6. New Challenges for ^1H -NMR Metabolomics 43
7. Concluding Remarks 48
- References 49

2. Application of LC-MS and LC-NMR Techniques for Secondary Metabolite Identification

67

Tristan Richard, Hamza Tamsamani, Emma Cantos-Villar, and Jean-Pierre Monti

1. Introduction 68
2. Principal Secondary Metabolites in Plants 69
3. Hyphenated Chromatographic Techniques in Metabolite Identification 75
4. LC-NMR Techniques 79
5. Combination of LC-MS and LC-NMR in Metabolite Profiling 91
6. Conclusion 94
- References 95

3. Fast and Ultrafast Quantitative 2D NMR: Vital Tools for Efficient Metabolomic Approaches

99

Patrick Giraudeau and Serge Akoka

1. Introduction 100
2. Why Quantitative 2D NMR? 102
3. Fast Conventional 2D NMR Approaches for Quantitative Analysis of Complex Mixtures 111

4. Going Faster	129
5. Conclusion	148
Acknowledgements	149
References	149
4. Liquid Chromatography Coupled to Mass Spectrometry-Based Metabolomics and the Concept of Biomarker	159
Samia Boudah, Alain Paris, and Christophe Junot	
1. Introduction	160
2. LC/MS-Based Metabolomics for Biomarker Discovery	170
3. Conclusion and Perspectives	203
Acknowledgements	204
References	204
5. Potential of Fourier Transform Mass Spectrometry for High-Throughput Metabolomics Analysis	219
Sandra Alves, Estelle Rathahao-Paris, and Jean Claude Tabet	
1. Introduction	220
2. Definition of Some Concepts Used in Mass Spectrometry	224
3. Principle of Fourier Transform Mass Spectrometers	237
4. Ion Production for Metabolite Analysis	251
5. FT-MS Applications for Complex Mixture Analysis	263
6. Metabolite Identification from HRMS Data	272
7. Conclusion	290
Acknowledgements	292
References	292
6. Exploring Metabolome with GC/MS	303
Cyril Jousse and Estelle Pujos-Guillot	
1. Introduction	304
2. Sample Extraction for Metabolomic Analysis	306
3. GC/MS Profiling	307
4. Data Processing	314
5. Quantification	317
6. Applications	318
7. Conclusion	323
References	324

7. The Lipid World Concept of Plant Lipidomics	331
Laetitia Fouillen, Benoit Colsch, and René Lessire	
1. Introduction	332
2. The Diversity of Plant Lipids	333
3. Lipid Extraction	340
4. Sample Storage	343
5. Principles of MS Lipid Analysis	343
6. Plant Lipid Analyses	356
7. Conclusion	365
Acknowledgements	365
References	365
8. Isotope Ratio Mass Spectrometry Technique to Follow Plant Metabolism: Principles and Applications of $^{12}\text{C}/^{13}\text{C}$ Isotopes	377
Jaleh Ghashghaie and Guillaume Tcherkez	
1. Stable Isotopes at Natural Abundance	378
2. Definitions	379
3. Basics of Photosynthetic $^{12}\text{C}/^{13}\text{C}$ Discrimination	383
4. Practical Aspects of EA-IRMS Measurements	384
5. Compound-Specific IRMS Analyses	388
6. Major Advances in Metabolic Patterns Provided by IRMS Techniques	393
7. Conclusions and Perspectives	401
References	402
9. High-Throughput Biochemical Phenotyping for Plants	407
Guillaume Ménard, Benoit Biais, Duyen Prodhomme, Patricia Ballias, Johann Petit, Daniel Just, Christophe Rothan, Dominique Rolin, and Yves Gibon	
1. Introduction	408
2. Biochemical Phenotyping in Medicine, Agro Industry and Agriculture	411
3. Solutions for a Microplate Pipeline Dedicated to Plant Biochemical Phenotyping	420
4. Example of HT Biochemical Screen	426
5. Concluding Remarks	432
Acknowledgements	434
References	434

10. Two Computational Simplex Approaches to Graphical Highlighting Metabolic Phenotypes and Their Functional Origins: Correspondence Analysis and Weighted Metabolic Profiles Analysis	441
Nabil Semmar	
1. Introduction	442
2. Geometrical and Numerical Bases of Simplex Space	445
3. CA: Principle and Method	447
4. Weighted Metabolic Profiles Analysis	471
5. Application Example Combining CA and WMPA	480
References	489
11. Strategies for Data Handling and Statistical Analysis in Metabolomics Studies	493
Marianne Defernez and Gwénaëlle Le Gall	
1. Introduction	494
2. General Characteristics of the Data	495
3. NMR Data Recording and Preprocessing: The Necessary Steps Prior to Statistical Analyses	499
4. LC/MS Data Recording and Preprocessing: The Necessary Steps Prior to Statistical Analyses	504
5. GC/MS Data Recording and Preprocessing: The Necessary Steps Prior to Statistical Analyses	518
6. Data Pretreatment	526
7. Basic Methods for Statistical Analysis: Possible Approaches	529
8. Reproducibility and Experimental Issues	532
9. Supervised Methods for Classification Problems: Potential for Statistical Bias	538
References	541
12. Qualitative Modelling of Metabolic Networks	557
Fabien Jourdan	
1. Introduction	558
2. Reconstruction, Storage and Sharing	561
3. Graph Formalism for Network Mining	569
4. Visualization of Metabolic Networks	578
5. Conclusion	584
References	585

13. Modelling Metabolic Networks—The Theories of Metabolism 593

Jean-Pierre Mazat and Bertrand Beauvoit

1. Which Rate Equations for the Reactions of a Metabolic Network? 594
2. The Structure of Metabolic Network: The Stoichiometry Matrix 600
3. The Steady State 604
4. The Structure of Metabolic Network: The Elementary Flux Modes (efms) 608
5. Metabolic Control Analysis 612
6. Softwares and Tools for Kinetic Modelling 615
7. Conclusion: Protocol for the Study of Metabolic Networks at Steady State 616
