

CONTENTS

Contributors	xiii
Preface	xix

Section I

Polymer Dynamics

1. Actin Filament Dynamics Using Microfluidics	3
Marie-France Carlier, Guillaume Romet-Lemonne, and Antoine Jégou	
1. Introduction	4
2. Key Technical Aspects of the Microfluidic Method	5
3. Assets for the Study of Actin Dynamics	10
4. Perspectives	13
References	15
2. Bacterial Actin-Like Proteins: Purification and Characterization of Self-Assembly Properties	19
Natalie A. Petek and R. Dyche Mullins	
1. Introduction	20
2. Conclusion	33
Acknowledgments	33
References	33
3. Quantitative Analysis of Microtubule Self-assembly Kinetics and Tip Structure	35
Louis S. Prah, Brian T. Castle, Melissa K. Gardner, and David J. Odde	
1. Introduction	36
2. Tip-Tracking Algorithm Walkthrough	39
3. <i>In Vivo</i> Tip-Tracking Protocol	41
4. TipTracker Optimization Using Fixed Cells	47
5. Considerations for <i>In Vitro</i> Assays and Other Filament Systems	47
Acknowledgments	50
References	50

Section II

Polymer Nucleation and Regulation**4. Biochemical Reconstitution of the WAVE Regulatory Complex 55**

Baoyu Chen, Shae B. Padrick, Lisa Henry, and Michael K. Rosen

1. Introduction	56
2. Overview of the <i>In Vitro</i> Reconstitution Method	59
3. Key Reagents	61
4. Reconstitution of the WAVE/Abi/HSPC300 Trimer	61
5. Reconstitution of the Sra1/Nap1 Dimer	65
6. Reconstitution of the WRC Pentamer	68
Acknowledgments	70
References	70

5. Rotational Movement of Formins Evaluated by Using Single-Molecule Fluorescence Polarization 73

Hiroaki Mizuno and Naoki Watanabe

1. Introduction	74
2. Theoretical Concepts and Optics for Single-Molecule Fluorescence Polarization	75
3. Proteins	80
4. Observation of Rotational Movement of TMR-F-Actin	84
5. Limiting Axial Rotation of F-Actin Using Biotinylated Actin	88
6. Data Analysis	92
7. Perspectives	93
Acknowledgments	93
References	93

6. Single-Molecule Studies of Actin Assembly and Disassembly Factors 95

Benjamin A. Smith, Jeff Gelles, and Bruce L. Goode

1. Introduction	96
2. Protein Tags, Labeling, and Tethering	98
3. Labeling and Surface Confinement of Actin Filaments	99
4. Slide Surface Treatment	100
5. Requirements for Single-Molecule Detection	101
6. Microscope Considerations	101
7. Imaging Actin Filaments and Single Molecules	103

8. Dual-Color TIRF Imaging of Actin-Regulatory Mechanisms	106
9. Measuring Kinetics of Single-Molecule Interactions with Actin Filaments	108
10. Coordination of Multiple Actin-Regulatory Factors from Multicolor Imaging	112
Acknowledgments	114
References	114
7. Assaying Microtubule Nucleation by the γ-Tubulin Ring Complex	119
Yuk-Kwan Choi and Robert Z. Qi	
1. Introduction	120
2. γ TuRC Isolation	121
3. Electron Microscopy	124
4. Microtubule Nucleation	125
5. Summary	126
Acknowledgments	128
References	128
8. Reconstituting Dynamic Microtubule Polymerization Regulation by TOG Domain Proteins	131
Jawdat Al-Bassam	
1. Introduction	132
2. Methods	134
3. Conclusion	146
Acknowledgments	147
References	147
9. Generation of Differentially Modified Microtubules Using <i>In Vitro</i> Enzymatic Approaches	149
Annapurna Vemu, Christopher P. Garnham, Duck-Yeon Lee, and Antonina Roll-Mecak	
1. Introduction	150
2. Purification and Characterization of Unmodified Microtubules	153
3. Purification of Tubulin Modification Enzymes: α -TAT, TTL7, and TTL	154
4. Generation of Differentially Modified Tubulin and Microtubules	157
5. Conclusions	163
References	164

Section III

Molecular Motor Ensembles on Natural and Engineered Cargoes

10. Engineering Defined Motor Ensembles with DNA Origami	169
Brian S. Goodman and Samara L. Reck-Peterson	
1. Introduction	170
2. Building the DNA Origami Structure	171
3. Covalent Attachment of Oligonucleotides to Motor Proteins	176
4. Forming the Motor-DNA Origami Complex	181
5. Single-Molecule Motility Analysis of Motor-DNA Origami Complexes	182
6. Data Analysis Considerations	185
7. Summary and Future Directions	185
Acknowledgments	186
References	187
11. Construction and Analyses of Elastically Coupled Multiple-Motor Systems	189
Arthur Rogers, Pamela E. Constantinou, D. Kenneth Jamison, Jonathan W. Driver, and Michael R. Diehl	
1. Introduction	190
2. Synthetic Strategy: A Modular Plug-and-Play Approach	191
3. Two-Motor Biophysical Assays	197
4. Concluding Remarks and Future Perspectives	202
Acknowledgments	202
References	203
12. Reconstitution of Cortical Dynein Function	205
Sophie Roth, Liedewij Laan, and Marileen Dogterom	
1. Introduction	206
2. Reconstitution of Cortical Dynein Function in 1D Geometries	207
3. Reconstitution of Cortical Dynein Function in 2D Geometries	215
4. Reconstitution of Cortical Dynein Function in 3D Geometries	219
5. Discussion and Perspectives	226
Acknowledgments	228
References	228

13. Reconstitution of Microtubule-Dependent Organelle Transport	231
Pradeep Barak, Ashim Rai, Alok Kumar Dubey, Priyanka Rai, and Roop Mallik	
1. Introduction	232
2. Isolation and Motility of LBPs from <i>Dictyostelium</i>	234
3. Isolation and Motility of LDs from Rat Liver	238
4. Conclusions	245
Acknowledgments	246
References	246
14. Reconstituting the Motility of Isolated Intracellular Cargoes	249
Adam G. Hendricks, Yale E. Goldman, and Erika L. F. Holzbaur	
1. Introduction	250
2. Isolation of Neuronal Transport Vesicles	250
3. Isolation of Latex Bead Compartments	253
4. <i>In Vitro</i> Motility Assays	256
5. Imaging and Analysis	257
6. Troubleshooting	259
7. Comparison to Measurements in Living Cells	259
8. Outlook	260
Acknowledgments	260
References	260

Section IV

Building Higher Order Networks and Interactions

15. Reconstitution of Contractile Actomyosin Arrays	265
Michael Murrell, Todd Thoresen, and Margaret Gardel	
1. Introduction	266
2. Reagents	267
3. Reconstituted Actomyosin Bundles	268
4. Biomimetic Cortex	272
5. Future Directions	278
Acknowledgment	281
References	281

16. Directed Actin Assembly and Motility	283
Rajaa Boujemaa-Paterski, Rémi Galland, Cristian Suarez, Christophe Guérin, Manuel Théry, and Laurent Blanchoin	
1. Introduction	284
2. Reconstitution of Actin-Based Motility in a G-Actin-Buffered Medium	285
3. Assembly of Branched Actin Networks on a Wide Range of Geometries	289
4. Reconstitution of 3D Connections of Structured Actin Networks	294
5. Concluding remarks	298
Acknowledgments	298
References	298
17. <i>In Vitro</i> Reconstitution of Dynamic Microtubules Interacting with Actin Filament Networks	301
Magdalena Preciado López, Florian Huber, Ilya Grigoriev, Michel O. Steinmetz, Anna Akhmanova, Marileen Dogterom, and Gijsje H. Koenderink	
1. Introduction	302
2. Experimental Methods	305
3. Outlook	316
4. Reagents and Stocks	316
Acknowledgments	317
References	318
18. Measuring Kinetochore-Microtubule Interaction <i>In Vitro</i>	321
Jonathan W. Driver, Andrew F. Powers, Krishna K. Sarangapani, Sue Biggins, and Charles L. Asbury	
1. Introduction	322
2. The Leap to <i>In Vitro</i> : Purification of Intact, Functional Kinetochores	323
3. The Assays	327
4. Summary	335
Acknowledgments	336
References	336
19. Micropattern-Guided Assembly of Overlapping Pairs of Dynamic Microtubules	339
Franck J. Fourniol, Tai-De Li, Peter Bieling, R. Dyché Mullins, Daniel A. Fletcher, and Thomas Surrey	
1. Introduction	340
2. Reagents and Equipment	341

3. Glass Treatment and Surface Chemistry	346
4. Microtubule Overlap Assay on Micropattern	353
5. Discussion	358
Acknowledgments	359
References	359

Section V

Cell Extract Systems

20. WAVE Regulatory Complex Activation 363

Peter J. Hume, Daniel Humphreys, and Vassilis Koronakis

1. Introduction	364
2. Generating Phospholipid Bilayer-Coated Silica Microspheres	365
3. Preparation of Brain Extract	368
4. Assay of WAVE-Dependent Motility by Phospholipid-Coated Microspheres	370
5. Reconstituting Activation of WRC by Cooperating Arf and Rac1 GTPases	372
6. Concluding Remarks	377
Acknowledgments	378
References	378

21. Dissecting Principles Governing Actin Assembly Using Yeast Extracts 381

Alphée Michelot and David G. Drubin

1. Introduction	382
2. Yeast Culture and Extract Preparation	383
3. Surface Protein Activation	388
4. Actin Assembly from Yeast Extracts	389
5. Deducing Protein Functions with Mutant Strains	393
6. Perspectives	395
Acknowledgments	395
References	396

22. Xenopus Egg Cytoplasm with Intact Actin 399

Christine M. Field, Phuong A. Nguyen, Keisuke Ishihara,
Aaron C. Groen, and Timothy J. Mitchison

1. Introduction	400
2. Actin-Intact Extract Preparation	401
3. Cell Cycle-Regulated Actomyosin Contractility	411
4. Cell-Free Reconstitution of I-Phase Aster Growth and Interaction	412
Acknowledgments	413
References	414

23. Glycogen-Supplemented Mitotic Cytosol for Analyzing <i>Xenopus</i> Egg Microtubule Organization	417
Aaron C. Groen, Phuong A. Ngyuen, Christine M. Field, Keisuke Ishihara, and Timothy J. Mitchison	
1. Introduction	418
2. Development of the Cytosol System	420
3. Preparation of Glycogen-Supplemented Cytosol	421
4. Assay of Ran-Promoted Microtubule Assembly	423
5. Self-Organization of Spindle-Like Microtubule Arrays	424
6. Antibody-Based Fluorescent Probes	428
7. Future Directions	430
Acknowledgments	432
References	432
24. Spindle Assembly on Immobilized Chromatin Micropatterns	435
Céline Pugieux, Serge Dmitrieff, Katarzyna Tarnawska, and François Nédélec	
1. Introduction	436
2. Overview of the Method	437
3. Preparative Steps	437
4. Patterning	440
5. Spindle Arrays	442
6. Analysis	443
7. Conclusions	447
Acknowledgments	448
References	448
