

CONTENTS

Contributors	xiii
Preface	xix

Section I Compartments

1. Monitoring Phosphatidylinositol 3-Phosphate in Multivesicular Endosome Biogenesis	3
Catherine Sem Wegner, Kay Oliver Schink, Harald Stenmark, and Andreas Brech	
1. Introduction	4
2. Localization of PtdIns3P and EGFR	5
3. Correlative Light and Electron Microscopy of MVEs	16
4. Concluding Remarks	21
Acknowledgments	22
References	22
2. Methods to Discriminate the Distribution of Acidic Glycohydrolases Between the Endosomal-Lysosomal Systems and the Plasma Membrane	25
Alessandro Magini, Alice Polchi, Brunella Tancini, Lorena Urbanelli, Manlio Di Cristina, Roberta Mannucci, Ildo Nicoletti, and Carla Emiliani	
1. Introduction	27
2. Purification of Lipid Microdomains from Cell Membranes and Glycohydrolases Activity Determination	28
3. Discrimination of Cell Surface Lipid Microdomain-Associated Glycohydrolases from the Intracellular Counterparts	31
4. Immunology Capture of Lipid Microdomains Containing Glycohydrolases	35
5. <i>In Vivo</i> Assay of Cell Surface Glycohydrolases	35
6. Fluorescence Microscopy Analysis of Hex Intracellular Trafficking	38
7. Summary	43
Acknowledgment	44
References	44

3. Visualizing of Signaling Proteins on Endosomes Utilizing Knockdown and Reconstitution Approach	47
Myoungkun Jeoung and Emilia Galperin	
1. Introduction	48
2. Description of Methods	49
3. Conclusions	61
Acknowledgments	62
References	62
4. Virus-Induced Signaling Influences Endosome Trafficking, Virus Entry, and Replication	65
David J. Marchant, Leanne Bilawchuk, Gordon Nish, and Richard G. Hegele	
1. Introduction	66
2. Isolation of Fibroblasts from Wild-Type or MyD88 ^{-/-} Mice and Purification of Virus	66
3. Screening Assays for the Determination of Principal Host Kinases Involved During Virus Replication	68
4. Virus-Host Cell Receptor Interactions and Kinase Activation	70
5. Detection of Virus-Induced Cell Signaling and Virus Entry into Endosomes Using Immunofluorescence Confocal Microscopy	73
6. Summary	75
References	75
5. Methods to Evaluate Zinc Transport into and out of the Secretory and Endosomal-Lysosomal Compartments in DT40 Cells	77
Taiho Kambe	
1. Introduction	78
2. Intracellular Zinc Transporters Localized to the Secretory and Endosomal-Lysosomal Compartments Play Crucial Roles	79
3. Establishment of DT40 Cells Deficient in Zinc Transporters Genes	82
4. Experimental Procedures Used in Studies of DT40 Cells Deficient in Zinc Transport	84
5. Functional Analysis of Zinc Mobilization into or out of the Secretory and Endosomal-Lysosomal Compartments	86
6. Concluding Remarks	89
Acknowledgment	89
References	89

6. Interactions Between Endosomal Maturation and Autophagy: Analysis of ESCRT Machinery During <i>Caenorhabditis elegans</i> Development	93
Marion Manil-Ségalen, Emmanuel Culetto, Renaud Legouis, and Christophe Lefebvre	
1. Introduction	94
2. Strains and Reagents	95
3. Fluorescent-Tagged Protein Construction and Transgenesis	98
4. Analysis of Developmental Phenotypes in ESCRT Mutants	100
5. Analysis of Vesicular Compartments	104
6. Analysis of Autophagy	110
7. Methods to Visualize Amphisome, the Fusion Organelle Between Endosomes and Autophagosomes	114
8. Conclusions	116
Acknowledgments	116
References	116
7. Assessment of Cation Trapping by Cellular Acidic Compartments	119
François Marceau, Caroline Roy, and Johanne Bouthillier	
1. Introduction	120
2. Quinacrine Uptake by Cells	123
3. Macroautophagic Accumulation in Cells That Have Accumulated Cations	128
4. Summary	129
Acknowledgments	130
References	130
8. Signaling Initiated by the Secretory Compartment	133
Carmen Ruggiero, Jorge Cancino, Monica Giannotta, and Michele Sallese	
1. Introduction	134
2. ER-to-Golgi Traffic-Synchronization Protocols	136
3. Read-Outs for Traffic-Generated Signaling	141
4. KDEL Signaling	147
5. The KDEL Transduction Machinery	149
6. Conclusions	151
Acknowledgments	151
References	152

9. Image-Based and Biochemical Assays to Investigate Endosomal Protein Sorting	155
Sophia Y. Breusegem and Matthew N.J. Seaman	
1. Introduction	156
2. Antibody-Uptake Assays	157
3. Detailed Characterization of Endosomes	169
4. Endosome Recruitment and/or Association	171
5. Summary	177
Acknowledgments	177
References	177
 Section II	
Transport and Transfer	
10. Cytokines, Polarity Proteins, and Endosomal Protein Trafficking and Signaling—The Sertoli Cell Blood-Testis Barrier System <i>In Vitro</i> as a Study Model	181
Xiang Xiao, Elissa W.P. Wong, Pearl P.Y. Lie, Dolores D. Mruk, Chris K.C. Wong, and C. Yan Cheng	
1. Introduction	182
2. Endocytosis Assay	184
3. Materials	187
4. Buffers	187
5. Methods	188
6. Cell Staining to Assess Endocytosis	190
7. Results	190
8. Summary	191
Acknowledgments	192
References	192
 11. Methods of Analysis of the Membrane Trafficking Pathway from Recycling Endosomes to Lysosomes	195
Takahide Matsui and Mitsunori Fukuda	
1. Introduction	196
2. Degradation of TfR in Lysosomes	197
3. Screening Methods for Rab Proteins Involved in Lysosomal Degradation of TfR	200
4. Effect of Rab12 Knockdown on an EGFR Endocytic Pathway and a Tf Recycling Pathway	203

5. Concluding Remarks	205
Acknowledgments	205
References	205
12. Measurement of Intercellular Transfer to Signaling Endosomes	207
Kristopher D. Marjon and Jennifer M. Gillette	
1. Introduction	208
2. Labeling of Transferred Signals	209
3. Measuring ICT Using Fluorescence Techniques	214
4. Signaling Endosomes	216
5. Experimental Example: ICT to SARA-Positive Signaling Endosomes	217
6. Summary	218
References	219
13. Liposome-Based Assays to Study Membrane-Associated Protein Networks	223
Christian Niehage, Christoph Stange, Mihaela Anitei, and Bernard Hoflack	
1. Introduction	224
2. Isolation of Core Machineries Required for Carrier Biogenesis on Synthetic Membranes	226
3. Identification of Core Machineries by Mass Spectrometry-Based, Label-Free Quantitative Proteomics	234
4. Visualization of Protein Dynamics on Giant Unilamellar Vesicles by Fluorescence Microscopy	238
5. Summary	241
Acknowledgments	242
References	242
14. Mouse Models of PI(3,5)P₂ Deficiency with Impaired Lysosome Function	245
Guy M. Lenk and Miriam H. Meisler	
1. Introduction	246
2. Design of Mouse Models	247
3. A Spontaneous Null Mutation of <i>Fig4</i> : The <i>Pale Tremor</i> Mouse	249
4. Tissue-Specific <i>Fig4</i> Transgenes: Neurons Versus Astrocytes	251
5. Conditional Knockout of <i>Fig4</i> in Neurons	251
6. The Human Disease Mutation FIG4-I41T in Transgenic Mice	252
7. A Spontaneous Missense Mutation of <i>Vac14</i> in the <i>ingls</i> Mouse	252
8. A Null Gene-Trap Allele of <i>Vac14</i>	253

9. A Hypomorphic Gene-Trap Allele of <i>Pikfyve</i> (<i>Fab1</i>)	253
10. A Conditional Knockout of <i>Pikfyve</i>	254
11. Genetic Interactions: <i>Fig4</i> , <i>Vac14</i> , and <i>Mtmr2</i>	254
12. Genetic Effects of Strain Background	255
13. Future Applications of Mouse Models of PI(3,5)P ₂ Deficiency	255
Acknowledgments	257
References	257

15. Monitoring Endosomal Trafficking of the G Protein-Coupled Receptor Somatostatin Receptor 3 261

Cristy Tower-Gilchrist, Melanie L. Styers, Bradley K. Yoder, Nicolas F. Barbari, and Elizabeth Sztul

1. Introduction	262
2. Development of Cell Lines Stably Expressing SSTR3	264
3. Live Imaging of SSTR3 and RABS in Mammalian Kidney Cells	269
4. Dynamics of SSTR3 Transit Relative to RABS	272
5. Effects of Dominant Negative Rabs on SSTR3 Trafficking	276
6. Summary	278
Acknowledgments	278
References	278

Section III Proteins

16. Genetic Circuitry Modulating Notch Signals Through Endosomal Trafficking 283

Kazuya Hori, Anindya Sen, and Spyros Artavanis-Tsakonas

1. Introduction	284
2. Genetic Screen Using the Exelixis Collection	285
3. Notch Localization in Endosomes	289
4. Optical Approaches	292
5. Ubiquitination Status of Notch	295
6. Conclusion	297
Acknowledgments	297
References	297

17. Monitoring Notch/Delta Endosomal Trafficking and Signaling in *Drosophila* 301

Sylvain Loubéry and Marcos González-Gaitán

1. Introduction	302
2. Antibody Uptake Assays to Monitor Notch and Delta Trafficking	305

3. Correlative Imaging of Dividing SOP Cells and of Their Progeny	313
4. Concluding Remarks	318
Acknowledgements	319
References	320
18. Toll-Interacting Protein Pathway: Degradation of an Ubiquitin-Binding Protein	323
Miho Shimizu, Asami Oguro-Ando, Eri Ohoto-Fujita, and Yoriko Atomi	
1. Introduction	324
2. Expression of GFP-htt Protein and RFP-Tollip and How to Count Aggregation	325
3. Cytoskeleton-Dependent Transport of Tollip to htt ^{PQ} -Aggresome	327
4. Determinants of Early-/Late Endosomal Localization in the Cells	328
5. Summary	328
Acknowledgment	329
References	329
19. Measuring Interactions of FERM Domain-Containing Sorting Nexin Proteins with Endosomal Lipids and Cargo Molecules	331
Rajesh Ghai, Mehdi Mobli, and Brett M. Collins	
1. Introduction	332
2. Secondary Structure-Based Domain Classification	333
3. Production of Recombinant PX-FERM Proteins	335
4. Measuring Interactions of PX-FERM Proteins with Phosphoinositide Lipids and Peptide Cargo Motifs by Isothermal Titration Calorimetry	338
5. Analysis of SNX17 PX Domain-PI3P Interactions by Nuclear Magnetic Resonance Spectroscopy	341
6. Summary	347
Acknowledgments	347
References	347
