Preface

xiii

1. Fungal Genomics: Sequencing and Annotation

1

Alan Kuo, Brian Bushnell, and Igor V. Grigoriev

1. Introduction	2
2. What Is Genome Assembly, and How to Do It	3
3. What Is Annotation, and Why Do It	14
4. What to Do with the Annotation Once You've Got It	26
5. Genomics of Plant-Microbe Interactions: What's Next?	42
6. Conclusion	45
Acknowledgements	45
References	45

2. Exploring the Transcriptome of Mycorrhizal Interactions

53

Annegret Kohler and Emilie Tisserant

1. Introduction	54
2. Microarrays Versus Deep Sequencing	55
3. Dual Transcriptomics of Plant-Fungus Interaction: Monitoring Both Partners at the Same Time	57
4. Combination of Transcriptomics and Microdissection	61
5. Bioinformatic Tools for RNA-Seq Data Analysis	62
6. Mycorrhizal Transcriptomes in the Genome Era	65
7. Outlook	70
Acknowledgements	70
References	72

3. Evolutionary and Adaptive Role of Transposable Elements in Fungal Genomes

79

Jonathan Grandaubert, Marie-Helene Balesdent, and Thierry Rouxel

1. Introduction	80
2. TEs and Speciation in Fungi	93
3. TEs and Adaptation to Host Plant and Plant Disease Resistance	94
4. Concluding Remarks	100
Acknowledgements	101
References	101

4. The Genomics of Powdery Mildew Fungi: Past Achievements, Present Status and Future Prospects	109
Stéphane Hacquard	
1. General Introduction	110
2. Biology of Powdery Mildew Infection	111
3. Genomic insights into the Obligate Biotrophic Lifestyle	113
4. Comparative Genomics of Powdery Mildew Isolates: Insights into Their Reproductive Mode and Their Evolutionary Origin	121
5. Powdery Mildew Effector Research in the Genomic Area	124
6. Transcriptomics of Powdery Mildew Fungi	130
7. Future Challenges in Powdery Mildew Research	133
Acknowledgements	136
References	136
 5. Functional Genomics of Smut Fungi: From Genome Sequencing to Protein Function	 143
Gunther Doehlemann, Jan Schirawski, and Jörg Kämper	
1. Introduction	144
2. The <i>U. maydis</i> Genome	147
3. Effector Clusters of <i>U. maydis</i>	152
4. Genome Comparison of Smut Fungi	154
5. Organ Specificity in the <i>U. maydis</i> : Maize Interaction	160
6. Functional Effector Biology	161
7. Adaptation to the Host Environment	164
8. Summary and Future Perspectives	165
Acknowledgements	169
References	169
 6. Advancing Knowledge on Biology of Rust Fungi Through Genomics	 173
Sébastien Duplessis, Guus Bakkeren, and Richard Hamelin	
1. Introduction	174
2. Rust Fungi in the Genomics Era	176
3. Rust Transcriptomics	185
4. Rust Secretome, Effectors, and Avirulent Genes	197
5. Population Genomics: From Genomes to Landscapes	199
6. Coming Up Next in Rust Genomics	202
Acknowledgements	204
References	205

7. Truffle Phylogenomics: New Insights into Truffle Evolution and Truffle Life Cycle	211
Thibaut Payen, Claude Murat, and Gregory Bonito	
1. Introduction	212
2. Truffle Diversity and Phylogeography	213
3. Harnessing Genomes to Unravel the Black Périgord Truffle Life Cycle	217
4. Comparative Genomic in Pezizomycetes	224
5. Concluding Remarks	229
Acknowledgements	230
References	230
8. The Natural Histories of Species and Their Genomes: Asymbiotic and Ectomycorrhizal <i>Amanita</i> Fungi	235
Jaqueline Hess and Anne Pringle	
1. Introduction	236
2. The Fungi and Their Genomes	239
3. Ecological Genomics of Asymbiotic and ECM <i>Amanita</i> Species	245
4. Unanswered Questions: Range Expansions and Genomic Architectures	253
Acknowledgements	253
References	254
9. Genomics of Arbuscular Mycorrhizal Fungi: Out of the Shadows	259
Mathilde Malbreil, Emilie Tisserant, Francis Martin, and Christophe Roux	
1. Introduction	260
2. Toward the Genome of <i>Rhizophagus Irregularis</i> DAOM197198	265
3. The Biology of <i>Rhizophagus Irregularis</i> from Its Gene Repertoire	270
4. Conclusion and Perspectives	279
Acknowledgements	281
References	281
10. Genomes of Plant-Associated Clavicipitaceae	291
Christopher L. Schardl, Carolyn A. Young, Neil Moore, Nicholas Krom, Pierre-Yves Dupont, Juan Pan, Simona Florea, Jennifer S. Webb, Jolanta Jaromczyk, Jerzy W. Jaromczyk, Murray P. Cox, and Mark L. Farman	
1. Introduction	292
2. Sequenced Genomes of the Clavicipitaceae	299
3. Alkaloid Gene Loci	309
4. Future Perspectives	321
Acknowledgments	322
References	322

11. Genomics, Lifestyles and Future Prospects of Wood-Decay and Litter-Decomposing Basidiomycota	329
Taina K. Lundell, Miia R. Mäkelä, Ronald P. de Vries, and Kristiina S. Hildén	
1. Introduction: Plant and Soil Organic Matter	330
2. Wood and Litter Decay and Fungal Lifestyles	334
3. Fungal Enzymes in Degradation of Plant Lignocellulose Carbohydrates: Genomic View	343
4. Lignin Breakdown and Lignin-Modifying Enzymes	351
5. <i>Phanerochaete chrysosporium</i> and Wood Decay	356
6. Conclusions and Outlook	361
References	364
12. <i>Heterobasidion annosum</i> s.l. Genomics	371
Mårten Lind, Jan Stenlid, and Åke Olson	
1. Introduction	372
2. Intraspecific Interactions	374
3. Hybridisation	377
4. Genomics	380
5. Genome Secrets	385
6. Future Prospects	392
Acknowledgements	392
References	392
13. Speciation Genomics of Fungal Plant Pathogens	397
Eva H. Stukenbrock	
1. Fungal Speciation	398
2. The Genetics of Speciation: A Population Genetics Perspective	399
3. The Genomics of Speciation	407
4. Speciation in Plant Pathogenic Fungi: Examples from Genome Studies	411
5. Experimental Evolution and the Identification of "Dobzhansky-Muller Incompatibilities": Integrating Experimental, Genomic and Transcriptomic Approaches in Model Fungi	416
6. Conclusions: Species and Species Dynamics of Fungal Plant Pathogens	417
7. Future Perspectives	419
Acknowledgements	420
References	420
<i>Author Index</i>	425
<i>Subject Index</i>	461
