

CONTENTS

Contributors	vii
Preface	ix
1. Occurrence of Halogenated Alkaloids	1
Gordon W. Gribble	
I. Introduction	1
II. Occurrence	2
III. Summary	141
References	142
2. Biosynthesis of Halogenated Alkaloids	167
Karl-Heinz van Pée	
I. Introduction	168
II. Pyrroles	168
III. Indole-derived Alkaloids	180
IV. Indolocarbazoles	188
V. Formation of New Halogenated Alkaloids by Pathway Modifications	195
VI. Halogenating Enzymes Involved in Alkaloid Biosynthesis	200
VII. Conclusions	206
Acknowledgments	207
References	207
3. Polyhalogenated Alkaloids in Environmental and Food Samples	211
Walter Vetter	
I. Introduction	212
II. Polyhalogenated 1,1'-Dimethyl-2,2'-Bipyrroles and Related Compounds	214
III. Polyhalogenated 1'-Methyl-1,2'-Bipyrroles	229
IV. Tetrabromo-1-Methylpyrrole and Related Polybrominated Pyrroles	240
V. Brominated Indoles and 1-Methylindoles	245
VI. Analysis of Polyhalogenated Alkaloids	250
VII. Physicochemical Properties of Polyhalogenated Alkaloids	266
VIII. Bioactivity of Polyhalogenated Alkaloids	268
IX. Final Remarks and Conclusions	271
References	272
Cumulative Index of Titles	277
Subject Index	287
