

CONTENTS

<i>Contributors</i>	ix
<i>Preface</i>	xiii
<i>Volumes in Series</i>	xv

1. FCS in STED Microscopy: Studying the Nanoscale of Lipid Membrane Dynamics	1
Veronika Mueller, Alf Honigsmann, Christian Ringemann, Rebecca Medda, Günter Schwarzmann, and Christian Eggeling	
1. Introduction	2
2. STED-FCS of Lipid Membrane Dynamics	5
3. Lipid Membrane Dynamics	18
4. Conclusions	29
Acknowledgments	33
References	33
2. Analyzing Förster Resonance Energy Transfer with Fluctuation Algorithms	39
Suren Felekyan, Hugo Sanabria, Stanislav Kalinin, Ralf Kühnemuth, and Claus A. M. Seidel	
1. Introduction	40
2. FRET and FCS	50
3. Filtered FCS	62
4. Applications	72
5. Discussion	75
Acknowledgments	80
References	80
3. Fluorescence Fluctuation Spectroscopy Approaches to the Study of Receptors in Live Cells	87
David M. Jameson, Nicholas G. James, and Joseph P. Albanesi	
1. Introduction	88
2. Selected FFS Studies	90
3. Choice of Fluorophores: General Considerations	97
4. Cells: General Considerations	105
5. Summary	109

Acknowledgments	109
References	109
4. Studying the Protein Corona on Nanoparticles by FCS	115
G. Ulrich Nienhaus, Pauline Maffre, and Karin Nienhaus	
1. Introduction	116
2. Sample Preparation	118
3. Experimental Procedures	120
4. Data Analysis	124
5. Protein Corona Formation Measured by FCS	126
6. Conclusions	133
Acknowledgments	133
References	134
5. Studying Antibody–Antigen Interactions with Fluorescence Fluctuation Spectroscopy	139
Sergey Y. Tetin, Qiaoqiao Ruan, and Joseph P. Skinner	
1. Introduction	140
2. Binding Model and Experimental Considerations	142
3. Studying Antibodies with FFS	144
4. Instrumentation	161
Acknowledgments	164
References	164
6. Fluorescence Fluctuation Approaches to the Study of Adhesion and Signaling	167
Alexia I. Bachir, Kristopher E. Kubow, and Alan R. Horwitz	
1. Introduction	168
2. A Fluorescence Fluctuation Toolbox	171
3. Experimental Implementation	177
4. Applications	191
5. Conclusion	198
References	198
7. Interactions in Gene Expression Networks Studied by Two-Photon Fluorescence Fluctuation Spectroscopy	203
Nathalie Declerck and Catherine A. Royer	
1. Introduction	204
2. <i>In Vitro</i> Interactions Between Proteins and Nucleic Acids Using Fluctuation Approaches	204

3. FFM in Live Bacterial Cells	214
4. Conclusions and Perspectives	227
References	228
8. Studying Ion Exchange in Solution and at Biological Membranes by FCS	231
Jerker Widengren	
1. Introduction	232
2. Ion Exchange Monitoring by FCS—Basic Approach	235
3. Monitoring of Local Ion Concentrations and Exchange in Solution	238
4. Monitoring of Proton Exchange at Biological Membranes by FCS	241
5. Approach for Ion Exchange Monitoring Incorporating Dual Color Fluorescence Cross Correlation Spectroscopy (FCCS)	246
6. Conclusions	249
Acknowledgments	249
References	250
9. Fluctuation Analysis of Activity Biosensor Images for the Study of Information Flow in Signaling Pathways	253
Marco Vilela, Nadia Halidi, Sebastien Besson, Hunter Elliott, Klaus Hahn, Jessica Tytell, and Gaudenz Danuser	
1. Introduction	254
2. Activity Biosensors	256
3. Extracting Activity Fluctuations in a Cell Shape Invariant Space	261
4. Correlation Analysis of Activity Fluctuations for Pathway Reconstruction	263
5. Outlook	274
Acknowledgment	275
References	275
10. Probing the Plasma Membrane Organization in Living Cells by Spot Variation Fluorescence Correlation Spectroscopy	277
Cyrille Billaudeau, Sébastien Mailfert, Tomasz Trombik, Nicolas Bertaux, Vincent Rouger, Yannick Hamon, Hai-Tao He, and Didier Marguet	
1. Introduction	278
2. Optical Setups for Sizing the Excitation Volume	280
3. General Considerations for svFCS Acquisition	284
4. Measurements on Living Cells	287
5. svFCS Data Analysis and Curve Fitting	291
6. The Nature of the Molecular Constraints on Lateral Diffusion	295
