Section I

H₂O₂ Regulation of Cell Signaling

1. The Biological Chemistry of Hydrogen Peroxide 3

Christine C. Winterbourn

1. Introduction	4
2. Chemical Properties	4
3. Antioxidant Defenses Against H ₂ O ₂	11
4. Kinetics and Identification of Biological Targets for H ₂ O ₂	13
5. Transmission of Redox Signals Initiated by H ₂ O ₂	15
6. Diffusion Distances and Compartmentalization	17
7. Biological Detection of H ₂ O ₂	19
8. Conclusion	20
References	21

2. Reactive Oxygen Species in the Activation of MAP Kinases 27

Yong Son, Sangduck Kim, Hun-Taeg Chung, and Hyun-Ock Pae

1. Introduction	28
2. Reactive Oxygen Species	29
3. Mitogen-Activated Protein Kinases	33
4. Roles of ROS in MAPK Activation	39
5. Summary	44
Acknowledgment	45
References	45

3. Hydrogen Peroxide Signaling Mediator in the Activation of p38 MAPK in Vascular Endothelial Cells 49

Rosa Bretón-Romero and Santiago Lamas

1. Introduction	50
2. Materials and Methods	51
References	58

4. <i>In Vivo</i> Imaging of Nitric Oxide and Hydrogen Peroxide in Cardiac Myocytes	61
Juliano L. Sartoretto, Hermann Kalwa, Natalia Romero, and Thomas Michel	
1. Introduction	62
2. Isolation and Culture of Adult Mouse Ventricular Cardiac Myocytes	63
3. Live Cell Imaging of Cardiac Myocytes	65
4. Imaging Intracellular NO with Cu ₂ (FL2E) Dye	66
5. Production and <i>In Vivo</i> Expression of Lentivirus Expressing the HyPer2 H ₂ O ₂ Biosensor	68
6. Imaging Intracellular H ₂ O ₂ in Cardiac Myocytes and Endothelial Cells Expressing HyPer2	76
Acknowledgments	77
References	77
5. Methods for Studying Oxidative Regulation of Protein Kinase C	79
Rayudu Gopalakrishna, Thomas H. McNeill, Albert A. Elhiani, and Usha Gundimeda	
1. Introduction	80
2. Materials	83
3. Direct Oxidative Modification of PKC Isoenzymes by H ₂ O ₂	85
4. Indirect Cellular Regulation of PKC Isoenzymes by Sublethal Levels of H ₂ O ₂	88
5. H ₂ O ₂ -Induced Signaling in GTPγS-Induced Preconditioning for Cerebral Ischemia	90
6. Summary	95
Acknowledgments	95
References	95
6. p66Shc, Mitochondria, and the Generation of Reactive Oxygen Species	99
Mirella Trinei, Enrica Migliaccio, Paolo Bernardi, Francesco Paolucci, Piergiuseppe Pelicci, and Marco Giorgio	
1. Introduction	100
2. The P66 Gene and Protein	100
3. The Mitochondrial Function of p66Shc	101
4. Preparation of Recombinant p66Shc Protein	102
5. Mitochondrial Swelling Assay	104
6. Mitochondrial ROS Formation by p66Shc	105
7. Conclusions: Role of p66Shc ROS	107
Acknowledgments	108
References	108

7. Detecting Disulfide-Bound Complexes and the Oxidative Regulation of Cyclic Nucleotide-Dependent Protein Kinases by H_2O_2 111

Joseph R. Burgoyne and Philip Eaton

- 1. Introduction 112
- 2. Experimental Considerations and Procedures 121
- 3. Summary 124
- Acknowledgments 125
- References 125

8. Redox Regulation of Protein Tyrosine Phosphatases: Methods for Kinetic Analysis of Covalent Enzyme Inactivation 129

Zachary D. Parsons and Kent S. Gates

- 1. Introduction 130
- 2. Rate Expressions Describing Covalent Enzyme Inactivation 133
- 3. Ensuring That the Enzyme Activity Assay Accurately Reflects the Amount of Active Enzyme 134
- 4. Assays for Time-Dependent Inactivation of PTPs 139
- 5. Analysis of the Kinetic Data 142
- 6. Obtaining an Inactivation Rate Constant from the Data 150
- 7. Summary 152
- References 152

Section II

H_2O_2 in the Redox Regulation of Transcription and Cell-Surface Receptors

9. Activation of Nrf2 by H_2O_2 : *De Novo* Synthesis Versus Nuclear Translocation 157

Gonçalo Covas, H. Susana Marinho, Luísa Cyrne, and Fernando Antunes

- 1. Introduction 158
- 2. Experimental Conditions and Considerations 159
- 3. Pilot Experiments 163
- 4. Experimental H_2O_2 Exposure 164
- 5. Data Handling and Analysis 166
- 6. Summary 170
- Acknowledgments 170
- References 170

10. H₂O₂ in the Induction of NF-κB-Dependent Selective Gene Expression	173
Luísa Cyrne, Virginia Oliveira-Marques, H. Susana Marinho, and Fernando Antunes	
1. Introduction	174
2. Experimental Components and Considerations	175
3. Pilot Experiments	179
4. Steady-State Titration Experiments	181
5. NF- κ B Family Protein Levels	182
6. NF- κ B-Dependent Gene Expression	184
7. Summary	187
Acknowledgments	187
References	187
11. Detection of H₂O₂-Mediated Phosphorylation of Kinase-Inactive PDGFRα	189
Hetian Lei and Andrius Kazlauskas	
1. Construction of Kinase-Dead PDGFR α	190
2. Characterization of the Kinase-Inactive Receptor	191
3. Detection of H ₂ O ₂ -Mediated Phosphorylation of Kinase-Inactive PDGFR α	192
4. Implication	194
Acknowledgment	194
References	194
 Section III	
H₂O₂ and Regulation of Cellular Processes	
12. Genetic Modifier Screens to Identify Components of a Redox-Regulated Cell Adhesion and Migration Pathway	197
Thomas Ryan Hurd, Michelle Gail Leblanc, Leonard Nathaniel Jones, Matthew DeGennaro, and Ruth Lehmann	
1. Introduction	198
2. Mutations in a <i>D. melanogaster</i> Gene Encoding a Peroxiredoxin Cause Germ Cell Adhesion and Migration Defects	199
3. Dominant Modifier Screens	200
4. Conducting a Dominant Modifier Screen to Identify Missing Components of a Redox-Regulated Germ Cell Migration Pathway	201
5. Limitations to Dominant Modifiers Screens	211

6. Concluding Remarks	212
Acknowledgments	213
References	213
13. Investigating the Role of Reactive Oxygen Species in Regulating Autophagy	217
Spencer B. Gibson	
1. Introduction	218
2. Regulation of Autophagy	218
3. ROS and Autophagy	220
4. Mechanisms for ROS Regulation of Autophagy	221
5. Methods for the Detection of Autophagy	225
6. Consideration When Using Oxidative Stress and Detecting ROS Under Autophagy Conditions	229
7. Conclusions	231
Acknowledgment	231
References	232
14. H₂O₂: A Chemoattractant?	237
Balázs Enyedi and Philipp Niethammer	
1. Introduction	238
2. The Zebrafish Tail Fin Wounding Assay	242
3. Measuring H ₂ O ₂ Signals in Zebrafish	246
4. Imaging H ₂ O ₂ Production by Wide-Field Microscopy	248
5. Imaging H ₂ O ₂ Production by Confocal Microscopy	249
Acknowledgments	253
References	253
15. Measuring Mitochondrial Uncoupling Protein-2 Level and Activity in Insulinoma Cells	257
Jonathan Barlow, Verena Hirschberg, Martin D. Brand, and Charles Affourtit	
1. Introduction	258
2. Tissue Culture	258
3. UCP2 Protein Detection	259
4. UCP2 Protein Knockdown	260
5. UCP2 Activity	261
Acknowledgments	267
References	267

16. Effects of H₂O₂ on Insulin Signaling the Glucose Transport System in Mammalian Skeletal Muscle	269
Erik J. Henriksen	
1. Introduction	270
2. <i>In Vitro</i> Exposure to H ₂ O ₂	271
3. Effects of H ₂ O ₂ on the Glucose Transport System in Isolated Skeletal Muscle	274
4. Summary	275
References	276
17. Monitoring of Hydrogen Peroxide and Other Reactive Oxygen and Nitrogen Species Generated by Skeletal Muscle	279
Malcolm J. Jackson	
1. Introduction	280
2. Monitoring Extracellular ROS Using Microdialysis Techniques	284
3. Assessment of Intracellular ROS Activities	290
4. Concluding Remarks	296
Acknowledgments	297
References	297
<i>Author Index</i>	301
<i>Subject Index</i>	323
