Preface

xiii

1. Molecular and Cellular Regulation of Skeletal Myogenesis

1

Glenda Comai and Shahragim Tajbakhsh

1. Introduction 2
2. Molecular Features of the Mrfs 3
3. Skeletal Muscle Development 7
4. Mrfs as Transdifferentiation Factors 24
5. Induction of Muscle-Specific Gene Expression 33
6. Genome-Wide Studies and the Paradox of Excess Binding Sites for the Mrfs 37
7. Molecular Evolution and Conservation in Other Species 45
8. Conclusions and Perspectives 47
- Acknowledgments 54
- References 54

2. Proneural bHLH Genes in Development and Disease

75

Carol Huang, Jennifer A. Chan, and Carol Schuurmans

1. Introduction to Proneural Genes 76
2. Proneural Functions of the *Neurogenin* Genes in Development 81
3. *Atoh1/Atoh7* Proneural Functions in Development 93
4. *Ascl1* Proneural Functions in Development 96
5. Proneural Genes in Human Disease 101
- References 110

3. The *Hand2* Gene Dosage Effect in Developmental Defects and Human Congenital Disorders

129

Masaru Tamura, Takanori Amano, and Toshihiko Shiroishi

1. Introduction 130
2. Cloning of *Hand* Genes and Their Expression Patterns 132
3. Developmental Functions of *Hand2* 134
4. Gene Dosage Effect of *Hand2* in Mouse Embryogenesis 140
5. Disruption of *Hand2* Dosage Causes Human Diseases 142
6. Future Perspectives 146

Acknowledgments	147
References	147
4. E Proteins in Lymphocyte Development and Lymphoid Diseases	153
Ian Belle and Yuan Zhuang	
1. Introduction	154
2. E Proteins	155
3. E Proteins in Lymphocyte Development	157
4. E Proteins in B Cell Development	160
5. E Protein Roles in Mature B Cells	164
6. E Protein Roles in T Cell Development	165
7. Roles of E Proteins in Mature T Cells	169
8. E Proteins in Lymphoid Diseases	170
9. Conclusion	178
Acknowledgments	179
References	179
5. Id Proteins: Small Molecules, Mighty Regulators	189
Flora Ling, Bin Kang, and Xiao-Hong Sun	
1. Introduction	190
2. The Structure and Function of Id Proteins	190
3. Regulation of Id Gene Expression	192
4. Id Proteins in Stem Cell Maintenance	193
5. Id Proteins in Vasculogenesis	196
6. Id Proteins in Cancer	198
7. Id Proteins in the Immune System	202
8. Id Proteins in Adipogenesis	206
9. Concluding Remarks	208
References	208
6. E(spl): Genetic, Developmental, and Evolutionary Aspects of a Group of Invertebrate Hes Proteins with Close Ties to Notch Signaling	217
Christos Delidakis, Maria Monastirioti, and Srivathsa S. Magadi	
1. E(spl): From a Spontaneous Dominant Mutation to a Group of Core Developmental Regulators	219
2. E(spl) Proteins—Where Did They All Come From?	223
3. Regulation of E(spl) Genes	225
4. Functions of E(spl) Proteins in <i>Drosophila</i>	231
5. E(spl) Function in Other Species	248

6. Closing Remarks	250
Acknowledgments	251
References	251
7. Expression Dynamics and Functions of Hes Factors in Development and Diseases	263
Taeko Kobayashi and Ryoichiro Kageyama	
1. Introduction	264
2. Hes Family Members and Protein Structures	264
3. Hes General Functions	266
4. Roles of Hes Factors in Various Tissues	267
5. Hes Functions in the Central Nervous System	269
6. Hes1 Oscillation and Cell Proliferation in Cultured Cells	272
7. Hes1 Oscillation in ES and NS Cells	275
8. Conclusions and Perspectives	279
References	280
8. Hey bHLH Transcription Factors	285
David Weber, Cornelia Wiese, and Manfred Gessler	
1. Introduction	286
2. Notch Signaling and Crosstalk with Other Pathways	287
3. Interaction Partners of Hey Proteins	290
4. Downstream Targets of Hey Proteins	293
5. Hey Proteins in Heart Development and Disease	294
6. Hey Proteins in Vascular Development	298
7. Control of Myogenesis and Muscle Stem Cells	301
8. Bone Development and Homeostasis	302
9. Hey Proteins Control Neural Development	304
10. Hey Functions in Ear Development	305
11. Immune Functions of Hey Proteins	305
12. Hey Genes in Cancer	306
13. Conclusion	307
References	308
9. Stra13 and Sharp-1, the Non-Grouchy Regulators of Development and Disease	317
Jin Rong Ow, Yong Hua Tan, Yu Jin, Avinash G. Bahirvani, and Reshma Taneja	
1. Introduction	318
2. Mechanisms of Transcriptional Repression	318

3. Embryonic and Adult Tissue Expression	320
4. Roles in Differentiation and Development	322
5. Deregulation of Stra13 and Sharp-1 in Cancer	326
6. Conclusion	330
References	331
10. DEC1/STRA13/SHARP2 and DEC2/SHARP1 Coordinate Physiological Processes, Including Circadian Rhythms in Response to Environmental Stimuli	339
Yukio Kato, Takeshi Kawamoto, Katsumi Fujimoto, and Mitsuhide Noshiro	
1. Introduction	340
2. Structures of DEC1 and DEC2	341
3. Tissue Distribution and Circadian Expression of <i>Dec1</i> and <i>Dec2</i>	345
4. Role of DEC1 and DEC2 in Molecular Clocks	347
5. Mechanisms of DEC1 and DEC2 Actions	352
6. Regulatory Factors for <i>Dec1</i> and <i>Dec2</i> Expression	355
7. Perspectives	364
Acknowledgments	365
References	365
Index	373
