

CONTENTS

Contributors	ix
Preface	xi
1. Haem-Based Sensors: A Still Growing Old Superfamily	1
Francesca Germani, Luc Moens, and Sylvia Dewilde	
1. Introduction and Background: Why <i>Haem-Based</i> Sensors?	2
2. Functions of the Haem-Based Sensors	3
3. The Evolution of the Globins	28
4. Conclusions and Future Perspectives	29
References	30
2. The Diversity of 2/2 (Truncated) Globins	49
Alessandra Pesce, Martino Bolognesi, and Marco Nardini	
1. Introduction	50
2. Fold and Fold Variation in 2/2Hb Groups I, II, III	52
3. The Haem Environment	54
4. Tunnels and Cavities Through 2/2Hb Protein Matrix	60
5. Proposed Functions for the 2/2Hb Family	66
6. Conclusions	71
References	72
3. Protoglobin: Structure and Ligand-Binding Properties	79
Alessandra Pesce, Martino Bolognesi, and Marco Nardini	
1. Introduction	80
2. Overall Structure	82
3. The Two-Tunnel System	85
4. The Haem Environment	87
5. Biochemical and Functional Characterisation	90
6. Conclusions	93
References	94
4. The Globins of <i>Campylobacter jejuni</i>	97
Mariana Tinajero-Trejo and Mark Shepherd	
1. Overview	99
2. NO and RNS in Biology	100

3. Oxygen and Reactive Oxygen Species in Biology	107
4. Respiratory Metabolism of <i>Campylobacter</i>	108
5. <i>Campylobacter</i> Single-Domain Globin, Cgb: Functional and Structural Characterisation	111
6. <i>Campylobacter</i> Truncated Globin, Ctb: Functional and Structural Characterisation	120
7. Control of Globin Expression	123
8. Integrated Response Involving Cgb and Ctb	131
9. Conclusions	132
Acknowledgements	133
References	133
5. Haemoglobins of Mycobacteria: Structural Features and Biological Functions	147
Kelly S. Davidge and Kanak L. Dikshit	
1. Introduction: Discovery of Haemoglobins in Mycobacteria	148
2. Co-occurrence of Multiple Hbs in Mycobacteria	149
3. trHbs of Mycobacteria: Small Hbs with Novel Characteristics	152
4. Conventional and Novel FlavoHbs of Mycobacteria	173
5. Biological Functions of trHbs and FlavoHbs	182
6. Concluding Remarks	189
References	189
6. The Globins of Cyanobacteria and Algae	195
Eric A. Johnson and Juliette T.J. Lecomte	
1. Overview	196
2. Historical Perspective	199
3. Phylogeny	204
4. Physiological Characterization	217
5. <i>In Vitro</i> Characterization	226
6. Needs and Opportunities	254
References	262
7. The Dos Family of Globin-Related Sensors Using PAS Domains to Accommodate Haem Acting as the Active Site for Sensing External Signals	273
Shigetoshi Aono	
1. Introduction	275
2. General Properties of PAS Domains	276

3. Single-Component Systems for Transcriptional Regulation	276
4. Two-Component Systems for Transcriptional Regulation	281
5. Haem-Containing PAS Family for the Regulation of Diguanylate Cyclases and Phosphodiesterases	298
6. Haem-Containing PAS Family for Chemotaxis Regulation	307
7. Conclusion	316
References	317
8. The Globins of Cold-Adapted <i>Pseudoalteromonas haloplanktis</i> TAC125: From the Structure to the Physiological Functions	329
Daniela Giordano, Daniela Coppola, Roberta Russo, Mariana Tinajero-Trejo, Guido di Prisco, Federico Lauro, Paolo Ascenzi, and Cinzia Verde	
1. The Polar Environments	331
2. Phylogeny and Biogeography of Cold-Adapted Marine Microorganisms	334
3. The Role of Temperature in Evolutionary Adaptations	337
4. Bacterial Globins	340
5. The Antarctic Marine Bacterium <i>Pseudoalteromonas haloplanktis</i> TAC125: A Case Study	348
6. <i>P. haloplanktis</i> TAC125 Globins	358
7. Conclusion and Perspectives	372
Acknowledgements	374
References	374
9. Microbial Eukaryote Globins	391
Serge N. Vinogradov, Xavier Bailly, David R. Smith, Mariana Tinajero-Trejo, Robert K. Poole, and David Hoogewijs	
1. Overview	393
2. Historical Perspective	394
3. Globin Nomenclature	395
4. Microbial Eukaryote Globins	397
5. Phylogenetic Relationships	406
6. Globin Function	420
7. Conclusion	434
Acknowledgements	434
References	436
Author Index	447
Subject Index	483
