

CONTENTS

Contributors

1. Control of Actin Dynamics by Allosteric Regulation of Actin Binding Proteins

Marc D. H. Hansen, Adam V. Kwiatkowski

1. Introduction	ix
2. Vinculin	1
3. Ezrin, Radixin, and Moesin	3
4. N-WASP	8
5. Zyxin	11
6. Summary	13
References	18

2. Dynamics and Regulation of Epithelial Adherens Junctions: Recent Discoveries and Controversies

Andrei I. Ivanov, Nayden G. Naydenov

1. Introduction	27
2. Molecular Composition of Epithelial AJs	28
3. Regulation of AJs by Vesicle Trafficking	29
4. Regulation of AJs by the Cytoskeleton	40
5. AJs and Human Diseases	55
6. Conclusions	68
Acknowledgments	76
References	77

3. Regulation of Cilium Length and Intraflagellar Transport

Joost R. Broekhuis, Weng Y. Leong, Gert Jansen

1. Introduction	101
2. Cilia and Intraflagellar Transport	102
3. Cilium Assembly and Disassembly	103
4. Regulation of Cilium Length and IFT	109
5. Conclusions and Perspectives	110
References	123

4. Cellular and Molecular Biology of Airway Mucins**139**

Erik P. Lillehoj, Kosuke Kato, Wenju Lu, Kwang C. Kim

1. Introduction	141
2. Mucus, Mucins, and COPD	145
3. Structure of Airway Mucins	157
4. Mucin Secretion	161
5. Physiologic Role of MUC1 Mucin in the Airways	168
6. Concluding Remarks	184
Acknowledgments	184
References	184

5. Extracellular Hsp90 (eHsp90) as the Actual Target in Clinical Trials: Intentionally or Unintentionally**203**

Wei Li, Fred Tsen, Divya Sahu, Ayesha Bhatia, Mei Chen,

Gabriele Multhoff, David T. Woodley

1. Introduction	204
2. Hsp90 α versus Hsp90 β	206
3. eHsp90, but Not Intracellular Hsp90 Chaperone: Difference in Physiology and Pathophysiology	209
4. eHsp90 as an Unconventional Promotility Factor	215
5. eHsp90 in Blood Circulation in Normal and Cancer Patients	221
6. Hsp90 versus eHsp90: Related but not the Same Molecule Any More	223
7. eHsp90: Actual Target from Day One?	226
8. Conclusions and Perspectives	229
Acknowledgments	229
References	230

6. New Insights into the Mechanism for Chromosome Alignment in Metaphase**237**

Yige Guo, Christine Kim, Yinghui Mao

1. Introduction	238
2. Initial Spindle Microtubule Capture by Kinetochore	238
3. Conversion from Lateral Binding to End-on Attachment	241
4. Stable End-on Kinetochore-Microtubule Attachment	242
5. Chromosome Congression and Oscillation at Metaphase Plate	247
6. Kinetochore-Microtubule Attachment Error Correction	249
7. Conclusions	254
Acknowledgments	254
References	254

7. New Insights into the Developmental Mechanisms of Coronary Vessels and Epicardium	263
Yuji Nakajima, Kyoko Imanaka-Yoshida	
1. Introduction	264
2. Developmental Anatomy of Coronary Vessels	265
3. Signals Regulating PE Formation	268
4. Epicardium Formation	271
5. Epicardial EMT	273
6. Formation of Subepicardial Coronary Plexus	279
7. Arterial and Venous Differentiation during Coronary Vessel Development	285
8. Vascular Wall Development	291
9. Coronary Vessel Pathology	297
10. Concluding Remarks	300
Acknowledgments	301
References	301
8. New Insights into Roles of Tubulobulbar Complexes in Sperm Release and Turnover of Blood-Testis Barrier	319
A. Wayne Vogl, J'Nelle S. Young, Min Du	
1. Introduction	320
2. Tubulobulbar Complex Structure	320
3. Functions	340
4. Regulation	346
5. Experimental Models	347
6. Conclusion and Future Directions	348
References	351
9. Role of microRNA-138 as a Potential Tumor Suppressor in Head and Neck Squamous Cell Carcinoma	357
Yi Jin, Dan Chen, Robert J. Cabay, Anxun Wang, David L. Crowe, Xiaofeng Zhou	
1. Introduction	358
2. Background	359
3. MicroRNA-138 Deregulation in HNSCC and its Functional Relevance	366
4. Biological Processes Regulated by microRNA-138	378
5. Conclusion	379
Acknowledgments	381
References	381
Index	387
