

CONTENTS

<i>Contributors</i>	ix
1. Mechanisms of Reovirus Bloodstream Dissemination	1
Karl W. Boehme, Caroline M. Lai, and Terence S. Dermody	
1. Introduction	2
2. Dynamics of Reovirus Infection in the Intestine and Lung	8
3. Hematogenous Spread of Reovirus	10
4. Neural Dissemination of Reovirus	18
5. Function of Hematogenous and Neural Spread in Reovirus Pathogenesis	19
6. Unanswered Questions and Future Directions	24
Acknowledgments	28
References	28
2. Molecular Biology and Epidemiology of Dianthoviruses	37
Tetsuro Okuno and Chuji Hiruki	
1. Introduction	38
2. Dianthoviruses	39
3. Economic Importance of Diseases Caused by Dianthoviruses	40
4. Molecular Biology of Dianthovirus	41
5. Transmission Studies and Epidemiology	59
6. Effects on Environment	61
7. Concluding Remarks and Perspectives	62
Acknowledgments	65
References	65
3. Viral and Nonviral Elements in Potexvirus Replication and Movement and in Antiviral Responses	75
Mi-Ri Park, Jang-Kyun Seo, and Kook-Hyung Kim	
1. Introduction	76
2. Elements That Regulate Potexvirus Replication	80
3. Elements That Regulate Potexvirus Movement	86
4. Elements Involved in Antiviral Responses	97
5. Conclusions	101
<i>Acknowledgments</i>	103
References	103

4. Influenza Virus Transcription and Replication	113
Jaime Martín-Benito and Juan Ortín	
1. Introduction	114
2. Molecular Biology of Influenza Virus Transcription and Replication	114
3. Structural Elements of the Influenza Virus Transcription–Replication Machine	116
4. Mechanisms of Influenza Virus Transcription and Replication	124
5. Role of Host Cell Factors	127
6. Outlook	128
Acknowledgments	129
References	129
5. The Molecular Biology of Iarviruses	139
Vicente Pallas, Frederic Aparicio, Mari C. Herranz, Jesus A. Sanchez-Navarro, and Simon W. Scott	
1. Introduction	140
2. Virion and Genome Structure	141
3. Taxonomy and Genetic Diversity	143
4. Genome Expression	149
5. CP–RNA Interaction and Genome Activation	159
6. Virus Movement Within and Among Plants	161
7. Host Responses	165
8. Synergy Among Iarviruses	168
9. Some Conclusions and Many Questions	169
Acknowledgments	170
References	170
6. Genetic Variation and HIV-Associated Neurologic Disease	183
Satinder Dahiya, Bryan P. Irish, Michael R. Nonnemacher, and Brian Wigdahl	
1. Introduction	184
2. Overview of HIV-1 CNS Pathogenesis	184
3. Clinical Diagnoses of HIV-1 CNS Infection	188
4. The Evolution and Adaptation of HIV-1 and the Establishment of Molecular Diversity	192
5. Molecular Diversity of HIV-1 <i>Env</i> and Neurologic Disease	195
6. Genetic Diversity Within HIV-1 <i>Tat</i> , <i>Vpr</i> , and the <i>LTR</i> , and Its Contribution to the Onset and Severity of HIV-1-Associated Neurological System Disease	199
7. Sequence Variation of Specific Transcription Factor-Binding Sites Within the HIV-1 <i>LTR</i> and Its Correlation with Nervous System Disease	207

8. Host Genetic Determinants of HIV-1 Infection and CNS Disease	213
9. Conclusion	215
Acknowledgments	222
References	222
Index	241
