

CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xv</i>
1. How Adhesion Forms the Early Mammalian Embryo	1
Melanie D. White and Nicolas Plachta	
1. The Mouse Preimplantation Embryo as a Model of Adhesion in Mammalian Development	1
2. Adhesion Regulates Cell Shape	5
3. Adhesion Controls Cell Polarity	7
4. Adhesion Determines Cell Fate	7
5. Emerging Technologies to Study Adhesion	9
6. Questions for the Future	11
References	13
2. Regulation of Cell Adhesion and Cell Sorting at Embryonic Boundaries	19
François Fagotto	
1. Introduction	20
2. A Short History of Tissue Separation	22
3. Adhesion and Contractility of Embryonic Tissues	27
4. Molecular Base of Separation in Vertebrates: Ephrins-Eph Signaling	37
5. Homophilic Contact Molecules at Embryonic Boundaries	44
6. Regulation of Tension and Adhesion by Contact Cues	50
7. Conclusions	54
Acknowledgments	56
References	56
3. Active Tension: The Role of Cadherin Adhesion and Signaling in Generating Junctional Contractility	65
Rashmi Priya and Alpha S. Yap	
1. Introduction	66
2. The Contractile Apparatus: Actomyosin	67
3. Cadherins and Biogenesis of the Junctional Actin Cytoskeleton	74
4. Regulation of Cortical Signaling by Cadherin Adhesion	78

5. Closing Comments	92
Acknowledgments	92
References	92
4. Integration of Cell–Cell Adhesion and Contractile Actomyosin Activity During Morphogenesis	103
Katja Röper	
1. Introduction	104
2. Molecular Interplay Between Cadherin Adhesion Receptors and the Actomyosin Cytoskeleton	105
3. Integration of Adhesion and Contractility During Morphogenesis	110
4. Role of Tension-Sensing in Adherens Junctions in Regulating Cell Shape and Morphogenesis	119
5. Summary	122
Acknowledgments	122
References	123
5. Nuclear Signaling from Cadherin Adhesion Complexes	129
Pierre D. McCrea, Meghan T. Maher, and Cara J. Gottardi	
1. β -Catenin, a Dual-Function Adhesion/Transcriptional Coactivator Protein	131
2. Cadherins as Stoichiometric Inhibitors of Wnt/ β -Catenin Signaling	133
3. The Cadherin–Catenin Complex as Both a Potentiator and an Attenuator of Wnt/ β -Catenin Signaling	137
4. Cadherin Signaling and Stem Cell Behavior	140
5. β -Catenin "Release" from Cortical Endosomes and Nuclear Signaling	141
6. The Other Catenins	142
7. Nuclear Signaling Functions of the Actin-Binding Protein, α -Catenin	146
8. Cadherin Nuclear Signaling via RTKs	148
9. Cadherin Nuclear Signaling by Small GTPases and NF κ B	153
10. Cadherin Nuclear Signaling via Proteolysis	157
11. Protocadherin Signaling to the Nucleus	161
12. Atypical Cadherin Nuclear Signaling	163
13. Cadherin Nuclear Signaling via the Hippo Pathway	164
14. Stem Cell Maintenance via Cadherin Nuclear Signaling	165
15. Desmosomal Cadherin Nuclear Signaling	168
16. Conclusions	170
Acknowledgments	172
References	172

6. Nectins and Nectin-Like Molecules in Development and Disease	197
Kenji Mandai, Yoshiyuki Rikitake, Masahiro Mori, and Yoshimi Takai	
1. Introduction	198
2. Physical Properties	199
3. Functional Properties	205
4. Development	209
5. Diseases	216
6. Conclusions and Perspectives	221
Acknowledgments	222
References	222
7. Anchors and Signals: The Diverse Roles of Integrins in Development	233
Aidan P. Maartens and Nicholas H. Brown	
1. Introduction	234
2. Integrins in Choices of Life and Death: Animal Lethal, not Always Cell Lethal	241
3. Integrins and Cell Fate Choices	245
4. Integrins in Single and Collective Cell Migration: Beyond the Fibroblast Model	250
5. Building Tissues and Organs: Snags and Anchors	256
6. Integrins in Epithelia: Cell Polarity and Division Orientation	258
7. Outlook	260
Acknowledgments	261
References	261
8. Epithelial-Mesenchymal Transitions: From Cell Plasticity to Concept Elasticity	273
Pierre Savagner	
1. Back to the Origins: Defining EMT	274
2. EMT is a Morphogenic Developmental Process, or is it?	276
3. Controlling EMT or Being Controlled by EMT	282
4. Revisiting EMT in Cancer	286
5. Are Cancer Cells Reactivating an Embryonic Process or Barely Surviving?	289
6. EMT With or Without Cadherins: A Cancer Metastable Phenotype	290
7. Conclusion	292
References	292

9. Embryonic Cell–Cell Adhesion: A Key Player in Collective Neural Crest Migration	301
Elias H. Barriga and Roberto Mayor	
1. Introduction	302
2. Cell–Cell Adhesion During Neural Crest Cell Directional Collective Migration	309
3. Concluding Remarks	316
Acknowledgments	316
References	316
 10. VE-cadherin in Vascular Development: A Coordinator of Cell Signaling and Tissue Morphogenesis	 325
Anne Karine Legendijk and Benjamin M. Hogan	
1. Vascular Cell Adhesion	326
2. VE-cadherin as a Physical Adaptor	327
3. Modulation of VE-cadherin by Kinases, Phosphatases, and Small GTPases	328
4. VE-cadherin in Vessel Development and Morphogenesis	332
5. VE-cadherin and Vascular Signaling During Angiogenesis and Morphogenesis	333
6. Conclusions	343
Acknowledgments	344
References	344
 11. Adhesion in Mammary Development: Novel Roles for E-Cadherin in Individual and Collective Cell Migration	 353
Eliah R. Shamir and Andrew J. Ewald	
1. Introduction	354
2. Cell–Cell Adhesion in Mammary Development: The Major Players	355
3. Cell–Cell Adhesion in Breast Cancer	366
4. Can a Migratory Single Cell or Cell Cluster Be “Epithelial”?	372
Acknowledgments	376
References	376
 12. Cell Adhesion in Epidermal Development and Barrier Formation	 383
Kaelyn D. Sumigra and Terry Lechler	
1. Introduction	384
2. Development of the Stratified Epidermis	384
3. Adherens Junctions	386
4. Desmosomes	394

5. Tight Junctions	399
6. Junctional Crosstalk in Epidermal Function	402
References	404
13. Cadherin-Based Transsynaptic Networks in Establishing and Modifying Neural Connectivity	415
Lauren G. Friedman, Deanna L. Benson, and George W. Huntley	
1. Introduction	415
2. The Cadherin Superfamily	417
3. Functional Units of Adhesion and Signaling: Intra- and Inter-CAM Family Cross talk	423
4. Developmental Phases of Circuit Assembly: Evolving Roles of the Cadherin-Based Adhesive Network	426
5. Beyond Development: What Does the Cadherin-Catenin Transsynaptic Network Contribute to Brain Function Throughout Life?	437
6. Cadherin-Based Transsynaptic Networks in Pathophysiology of Brain Circuits	445
7. Conclusions	449
Acknowledgments	450
References	450
14. Cell-Cell Interactions Driving Kidney Morphogenesis	467
Alexander N. Combes, Jamie A. Davies, and Melissa H. Little	
1. Introduction	468
2. Cell-Cell Interactions Within the Developing Ureteric Epithelium	472
3. The Nephrogenic Niche—Balancing Self-Renewal and Differentiation	477
4. Mediators of CM Integrity, Identity, and Morphology	479
5. Differential Cell-Cell Adhesion in Nephron Formation, Fusion, Patterning, and Segmentation	483
6. The Adhesion-Cytoskeleton-Signaling Axis in Kidney Tubulogenesis	486
7. Formation of the Glomerular Filter	488
8. <i>In Vitro</i> Self-Organization Generates Kidney Organoids	491
9. Self-Organization in Directed Differentiation to Kidney	495
10. Application of Cell-Cell and Cell-Matrix Interactions Kidney Tissue Engineering	496
11. Conclusion	497
Acknowledgments	498
References	498
