Section I

Preparation and Genomic Analyses of Single Cells from Natural Populations

1. In-Solution Fluorescence <i>In Situ</i> Hybridization and Fluorescence-Activated Cell Sorting for Single Cell and Population Genome Recovery	3
Mohamed F. Haroon, Connor T. Skennerton, Jason A. Steen, Nancy Lachner, Philip Hugenholz, and Gene W. Tyson	
1. Introduction	4
2. Technical Protocols and Considerations	6
3. Case Study: Targeted Isolation of Anaerobic Methanotrophic Archaea for Single Cell and Population Genomics	15
4. Summary	17
Acknowledgments	17
References	18
2. Whole Cell Immunomagnetic Enrichment of Environmental Microbial Consortia Using rRNA-Targeted Magneto-FISH	21
Elizabeth Trembath-Reichert, Abigail Green-Saxena, and Victoria J. Orphan	
1. Introduction	22
2. Methods	24
3. Results and Discussion	33
4. Summary	41
Acknowledgments	41
References	42
3. Coupling FACS and Genomic Methods for the Characterization of Uncultivated Symbionts	45
Anne Thompson, Shellie Bench, Brandon Carter, and Jonathan Zehr	
1. Introduction	46
2. Fluorescence-Activated Cell Sorting	48

3. Metagenomic Sequencing of Uncultured Symbiont Populations	51
4. Determining Host Identity and Metabolism	55
References	58
4. Optofluidic Cell Selection from Complex Microbial Communities for Single-Genome Analysis	61
Zachary C. Landry, Stephen J. Giovanonni, Stephen R. Quake, and Paul C. Blainey	
1. Introduction	62
2. Optical Tweezing for Cell Isolation	64
3. Optical Hardware Setup	70
4. Microfluidics Configuration and Setup	78
5. Procedure for Sorting and Amplifying Single Cells	80
6. Software	83
7. Performance and Limitations	85
Acknowledgments	88
References	88
5. Quantifying and Identifying the Active and Damaged Subsets of Indigenous Microbial Communities	91
Corinne Ferrier Maurice and Peter James Turnbaugh	
1. Introduction	92
2. Flow Cytometry and Fluorescent Dyes	93
3. Experimental Procedures	95
4. Experimental Validation	99
5. Troubleshooting	103
Acknowledgment	106
References	106
Section II	
Microbial Community Genomics—Sampling, Metagenomic Library Preparation, and Analysis	
6. Preparation of BAC Libraries from Marine Microbial Populations	111
Gazalah Sabehi and Oded Béjà	
1. Introduction	111
2. BAC Library Construction Procedures	112
References	121

7. Preparation of Fosmid Libraries and Functional Metagenomic Analysis of Microbial Community DNA 123

Asunción Martínez and Marcia S. Osburne

1. Introduction 124
2. General Considerations: Genomic Library Vector and Host 125
3. Construction of Fosmid Environmental Libraries 128
4. General Considerations for Working with Fosmids 131
5. Functional Screens 133
6. Conclusions 139
- References 139

8. Preparation of Metagenomic Libraries from Naturally Occurring Marine Viruses 143

Sergei A. Solonenko and Matthew B. Sullivan

1. On the Importance of Environmental Viruses and Viral Metagenomics 144
2. The DNA Viral Metagenomic Sample-to-Sequence Pipeline 147
3. The Library Preparation Process 149
4. Conclusions 159
- Acknowledgments 160
- References 160

Section III

Microbial Community Transcriptomics—Sample Preparation, cDNA Library Construction, and Analysis

9. Preparation and Metatranscriptomic Analyses of Host–Microbe Systems 169

Jarrad T. Hampton-Marcell, Stephanie M. Moormann, Sarah M. Owens, and Jack A. Gilbert

1. Introduction 170
2. Materials 171
3. Components 172
4. Experiments 175
5. Sequencing and Data Analysis 184
- Acknowledgments 185
- References 185

10. Preparation of Microbial Community cDNA for Metatranscriptomic Analysis in Marine Plankton 187

Frank J. Stewart

1. Introduction 188

2. Sample Collection and RNA Preservation	192
3. RNA Extraction and Standardization	198
4. rRNA Depletion	201
5. RNA Amplification and cDNA Synthesis	209
6. Summary	212
Acknowledgments	213
References	213
11. Sequential Isolation of Metabolites, RNA, DNA, and Proteins from the Same Unique Sample	219
Hugo Roume, Anna Heintz-Buschart, Emilie EL Muller, and Paul Wilmes	
1. Introduction	220
2. Sampling and Sample Preprocessing	222
3. Sample Processing and Small Molecule Extraction	226
4. Sequential Biomacromolecular Isolation	228
5. Quality Control	230
6. Outlook	235
References	235
12. Use of Internal Standards for Quantitative Metatranscriptome and Metagenome Analysis	237
Brandon M. Satinsky, Scott M. Gifford, Byron C. Crump, and Mary Ann Moran	
1. Introduction	238
2. Method Overview	241
3. DNA Template and Vector Design for Internal RNA Standards	242
4. mRNA Standard Preparation	244
5. DNA Standard Preparation	247
6. Internal Standard Addition	247
7. Internal Standard Recoveries and Quantification	248
8. Dataset Normalization Using Internal Standards	248
Acknowledgments	249
References	250
13. Sample Processing and cDNA Preparation for Microbial Metatranscriptomics in Complex Soil Communities	251
Lilia C. Carvalhais and Peer M. Schenk	
1. Introduction	252
2. Working with RNA	253
3. Sampling	254

4. RNA Extraction of Complex Soil Communities	255
5. Assessing RNA Quality and Quantity	256
6. Soil Samples with Low Microbial Biomass	258
7. Removing Inhibitors	258
8. rRNA Subtraction/mRNA Enrichment	259
9. mRNA Amplification	261
10. cDNA Synthesis	262
11. Current State and Future Prospects	263
References	263

Section IV

Microbial Community Proteomics—Sampling, Sample Preparation, Spectral Analysis, and Interpretation

14. Sample Preparation and Processing for Planktonic Microbial Community Proteomics	271
Robert M. Morris and Brook L. Nunn	
1. Introduction	272
2. Sample Collection	273
3. Sample Preparation	278
4. Extracting and Digesting Proteins	281
5. Mass Spectrometry	283
References	286
15. Sample Handling and Mass Spectrometry for Microbial Metaproteomic Analyses	289
Ryan S. Mueller and Chongle Pan	
1. Introduction	290
2. Experimental Considerations and Options	291
3. Generalized Procedure	295
Acknowledgment	299
References	300
16. Molecular Tools for Investigating Microbial Community Structure and Function in Oxygen-Deficient Marine Waters	305
Alyse K. Hawley, Sam Kheirandish, Andreas Mueller, Hilary T.C. Leung, Angela D. Norbeck, Heather M. Brewer, Ljiljana Pasa-Tolic, and Steven J. Hallam	
1. Introduction	306
2. Exploring Oxygen Minimum Zone Community Structure	307

3. Detecting Oxygen Minimum Zone Proteins	314
Acknowledgments	325
References	325

Section V

Microbial Community Informatics: Computational Platforms, Comparative Analyses, and Statistics

17. Assembling Full-Length rRNA Genes from Short-Read Metagenomic Sequence Datasets Using EMIRGE	333
Christopher S. Miller	
1. Introduction: The Utilitarian Small Subunit rRNA Gene in Microbial Ecology	334
2. Overview of the EMIRGE algorithm	337
3. EMIRGE Outputs: Reconstructed Sequences with Estimated Abundances	342
4. Practical Considerations When Running EMIRGE	343
5. Choosing a Candidate Database of rRNA Genes	347
6. Conclusions and Future Outlook	348
References	348
18. Computational Methods for High-Throughput Comparative Analyses of Natural Microbial Communities	353
Sarah P. Preheim, Allison R. Perrotta, Jonathan Friedman, Chris Smilie, Ilana Brito, Mark B. Smith, and Eric Alm	
1. Introduction	354
2. Sequencing Terminology	355
3. Sequence Processing	356
4. Community Analysis	362
5. Summary	368
References	368
19. Advancing Our Understanding of the Human Microbiome Using QIIME	371
José A. Navas-Molina, Juan M. Peralta-Sánchez, Antonio González, Paul J. McMurdie, Yoshiki Vázquez-Baeza, Zhenjiang Xu, Luke K. Ursell, Christian Lauber, Hongwei Zhou, Se Jin Song, James Huntley, Gail L. Ackermann, Donna Berg-Lyons, Susan Holmes, J. Gregory Caporaso, and Rob Knight	
1. Introduction	372
2. QIIME as Integrated Pipeline of Third-Party Tools	373

3. PCR and Sequencing on Illumina MiSeq	375
4. QIIME Workflow for Conducting Microbial Community Analysis	377
5. Other Features	427
6. Recommendations	438
7. Conclusions	438
Acknowledgments	439
References	439
20. Disentangling Associated Genomes	445
Daniel B. Sloan, Gordon M. Bennett, Philipp Engel, David Williams, and Howard Ochman	
1. Introduction	446
2. Sequencing	446
3. Data Analysis and Genome Assembly	451
4. Postassembly Analysis	457
5. Summary	460
Acknowledgments	461
References	461
21. Microbial Community Analysis Using MEGAN	465
Daniel H. Huson and Nico Weber	
1. Introduction	465
2. Taxonomic Analysis	468
3. Functional Analysis	470
4. Sequence Alignment	474
5. Comparison of Samples	477
6. Conclusion	483
References	484
22. A Metagenomics Portal for a Democratized Sequencing World	487
Andreas Wilke, Elizabeth M. Glass, Daniela Bartels, Jared Bischof, Daniel Braithwaite, Mark D'Souza, Wolfgang Gerlach, Travis Harrison, Kevin Keegan, Hunter Matthews, Renzo Kottmann, Tobias Paczian, Wei Tang, William L. Trimble, Pelin Yilmaz, Jared Wilkening, Narayan Desai, and Folker Meyer	
1. Introduction	488
2. Pipeline and Technology Platform	489
3. Web Interface	495
4. How to Drill Down Using the Workbench	510

5. MG-RAST Downloads	515
6. Discussion	519
7. Future Work	521
Acknowledgments	521
References	521
23. A User's Guide to Quantitative and Comparative Analysis of Metagenomic Datasets	525
Chengwei Luo, Luis M. Rodriguez-R, and Konstantinos T. Konstantinidis	
1. Introduction	526
2. How to Assemble a Metagenomic Dataset	528
3. How to Determine the Fraction of the Community Captured in a Metagenome	533
4. How to Identify the Taxonomic Identity of a Metagenomic Sequence	535
5. How to Determine Differentially Abundant Genes, Pathways, and Species	538
6. Limitations and Perspectives for the Future	540
Acknowledgments	542
References	542
