

CONTENTS

<i>Contributors</i>	vii
<i>In Memoriam</i>	ix
1. Regulation of Retroviral Polyadenylation	1
Eva-Maria Schrom, Rebecca Moschall, Anita Schuch, and Jochen Bodem	
1. Cellular Polyadenylation	3
2. Retroviral Long Terminal Repeats	4
3. Retroviruses with the Poly(A) Signal Located in the U3 Region	5
4. Retroviruses Encoding the Poly(A) Signal in the R Region	12
5. Conclusions	19
Acknowledgments	20
References	20
2. Open Questions About Giant Viruses	25
Jean-Michel Claverie and Chantal Abergel	
1. Background	26
2. The Traditional View: Viruses Started Small, Got Bigger	35
3. Genome Reduction: A Neutral Ratchet Wheel Generating the Diversity of Large DNA Viruses	38
4. Speculation on the Nature of the Giant Virus Ancestor	49
Acknowledgments	52
References	53
3. Assembly and Budding of Negative-Strand RNA Viruses	57
Douglas S. Lyles	
1. Introduction	58
2. Virion Structure: The Final Product	60
3. Steps in Assembly of Virus Budding Sites	63
4. Role of Membrane Microdomains in Assembly of Envelope Glycoproteins	64
5. Assembly of Viral Matrix Proteins	68
6. Selection of Nucleocapsids	70
7. Late Budding Functions and Virus Release	73
8. Back to the Beginning: How is Assembly Initiated?	77
9. Perspectives for the Future	82
References	82

4. Arthropod-Borne Flaviviruses and RNA Interference: Seeking New Approaches for Antiviral Therapy	91
Mayra Diossa-Toro, Silvio Urcuqui-Inchima, and Jolanda M. Smit	
1. Introduction	92
2. The RNA Interference Mechanism and its Antiviral Effects	93
3. Arthropod-Borne Flaviviruses	96
4. RNAi and the Mosquito Vector	102
5. The Interplay Between Arthropod-Borne Flaviviruses and the Endogenous Host Cell RNAi Pathway	103
6. Conclusions and Challenges	104
Acknowledgments	106
References	106
