Part 1 Cells in Tooth Development, Craniofacial Morphogenesis, and Regeneration: From Cells to Tissues to Organs

1. Craniofacial Muscle Development	3
Inbal Michailovici, Tamar Eigler, and Eldad Tzahor	
1. Head Muscle Formation and Heterogeneity: Extraocular Muscles, Pharyngeal Mesoderm, and Neck Muscles	4
2. Overlap Between Cardiac and Pharyngeal Muscle Progenitors	10
3. FGF-ERK Signaling During Myogenesis	14
4. Head Muscle Regeneration	19
References	22
2. Mandible and Tongue Development	31
Carolina Parada and Yang Chai	
1. Early Development of the Mandibular Arch	32
2. Mandibular Bone Development	35
3. Tongue Development	41
4. Evolution of the Mandible and Tongue	47
5. Mechanical Relationship Between the Mandible and Tongue	49
6. Stem Cells in Mandible and Tongue Regeneration	51
7. Conclusion	52
References	52
3. Cellular and Molecular Mechanisms of Palatogenesis	59
Yu Lan, Jingyue Xu, and Rulang Jiang	
1. Introduction	60
2. Regulation of Palatal Shelf Growth and Patterning	62
3. Proper Periderm Differentiation Is Critical for Normal Palatogenesis	66
4. Palatal Fusion: Formation and Dissolution of the Intershelf Epithelial Seam by Cell Convergence and Extrusion	72

5. Concluding Remarks	76
Acknowledgments	77
References	78
4. Genetic Influences on Temporomandibular Joint Development and Growth	85
Robert J. Hinton, Junjun Jing, and Jian Q. Feng	
1. Introduction	86
2. Normal Morphogenesis and Cell Biology of the TMJ	89
3. Genes That Affect Mandibular Condylar Cartilage	91
4. Genes Affecting the Mandibular Fossa	99
5. Genes Affecting the Articular Disc and Joint Cavitation	102
6. Discussion	104
Acknowledgments	106
References	106
5. Regulatory Mechanisms Driving Salivary Gland Organogenesis	111
Belinda R. Hauser and Matthew P. Hoffman	
1. Introduction	112
2. Regulation of Branching Morphogenesis	112
3. SMG Innervation	119
4. Stem/Progenitor Cells	121
5. Conclusion	126
Acknowledgments	128
References	128
6. The Development of the Calvarial Bones and Sutures and the Pathophysiology of Craniosynostosis	131
Mamoru Ishii, Jingjing Sun, Man-Chun Ting, and Robert E. Maxson	
1. Introduction	132
2. Early Development	132
3. Calvarial Suture Development and the Pathophysiology of Craniosynostosis	139
Acknowledgments	150
References	150
7. Tissue Interactions Regulating Tooth Development and Renewal	157
Anamaria Balic and Irma Thesleff	
1. Introduction	158
2. Epithelial-Mesenchymal Tissue Interactions Regulating Tooth Initiation and Morphogenesis	160

3. Epithelial–Mesenchymal Interactions Regulating Dentin and Enamel Formation	169
4. Epithelial–Mesenchymal Interactions Regulating Stem Cells in Continuously Growing Mouse Incisors	174
5. Concluding Remarks	179
Acknowledgments	179
References	179
8. Stem Cells in Tooth Development, Growth, Repair, and Regeneration	187
Tian Yu, Ana Angelova Volponi, Rebecca Babb, Zhengwen An, and Paul T. Sharpe	
1. Stem Cells in Tooth Development	188
2. Stem Cells in Dentin Repair: Tertiary Dentinogenesis	194
3. The Continuously Growing Incisor	197
Acknowledgments	205
References	205
9. Development and Integration of the Ear	213
Jennifer C. Fuchs and Abigail S. Tucker	
1. Function and Anatomy of the Mammalian Ear	214
2. Development of the Pharyngeal Apparatus	217
3. Development of the Middle Ear	220
4. Development of the External Ear	221
5. Development of the Inner Ear	223
6. Mechanism and Defects of Integration During Development	224
7. Conclusion	228
References	229
Part 2	
Craniofacial Patterning and Signaling Mechanisms	
10. Zebrafish Craniofacial Development: A Window into Early Patterning	235
Lindsey Mork and Gage Crump	
1. Zebrafish Craniofacial Anatomy	236
2. Imaging Craniofacial Development	245
3. Genetic Analyses of Craniofacial Development	250
4. Future Directions	257
5. Conclusions	259
References	259

11. Regulation of Jaw Length During Development, Disease, and Evolution	271
Richard A. Schneider	
1. Introduction: On Being the Right Jaw Size During Development and Evolution	272
2. Part 1: Early Determinants of Jaw Length	277
3. Part 2: Determinates of Jaw Length During Skeletal Differentiation	281
4. Part 3: Determinates of Jaw Length During Late-Stage Growth	285
References	288
12. Facial Morphogenesis: Physical and Molecular Interactions Between the Brain and the Face	299
Ralph Marcucio, Benedikt Hallgrímsson, and Nathan M. Young	
1. Introduction	300
2. Relationship Between the Brain and the Face	301
3. Implications for Structural Diseases of the Face	309
4. The Role of Brain-Face Interactions in Generating Evolutionary Variation	313
5. Conclusions	314
References	314
13. Developmental Plasticity of Patterned and Regenerating Oral Organs	321
J. Todd Streebman, Ryan F. Bloomquist, and Teresa E. Fowler	
1. Introduction and Background	322
2. The Continuum of Oral Organ Patterning and Regeneration	323
3. The Plasticity of Stem-Based Organ Regeneration	327
4. Cichlids Combine the Features of Renewing and Replacing Oral Organ Systems	329
Acknowledgments	331
References	331
14. Regulating Craniofacial Development at the 3' End: MicroRNAs and Their Function in Facial Morphogenesis	335
Andre L. P. Tavares, Kristin B. Artinger, and David E. Clouthier	
1. Introduction	336
2. Craniofacial Development: Cell Types and Tissue Interactions	337
3. miRNA Biogenesis, Structure, and Function	339
4. <i>miR-140</i> : The First Individual miRNA Associated with Facial Morphogenesis	342
5. miRNA Function in Craniofacial Development—Lessons from Deletion of <i>Dicer1</i>	344

6. The <i>miR-17~92</i> Family: Complex and Compensating Actions During Vertebrate Development	348
7. miRNA Regulation of Bone and Cartilage Development	350
8. miRNAs and Odontogenesis	350
9. miRNAs and Salivary Gland Development	357
10. miRNAs: A Potential Tool for Correcting Craniofacial Defects	359
11. Summary	360
References	363
15. Transcription Factors in Craniofacial Development: From Receptor Signaling to Transcriptional and Epigenetic Regulation	377
Yongchao Gou, Tingwei Zhang, and Jian Xu	
1. Introduction	378
2. Signaling Pathways Regulating Craniofacial Development	378
3. Families of Transcription Factors	381
4. Questions for the Future	395
References	395
Part 3	
Disease Models, Human Genetics, Genomics and Dynamic Imaging	
16. Mouse Models of Rare Craniofacial Disorders	413
Annita Achilleos and Paul A. Trainor	
1. Introduction	414
2. Ribosomopathies	416
3. Oligopathies	429
4. Syngnathia	443
5. Conclusions and Perspectives	445
Acknowledgments	447
References	447
17. From Bench to Bedside and Back: Improving Diagnosis and Treatment of Craniofacial Malformations Utilizing Animal Models	459
Alice F. Goodwin, Rebecca Kim, Jeffrey O. Bush, and Ophir D. Klein	
1. Models to Uncover Genetics of Cleft Lip and Palate	460
2. Treacher Collins: Proof of Concept of a Nonsurgical Therapeutic for a Craniofacial Syndrome	467
3. RASopathies: Understanding and Developing Treatment for Syndromes of the RAS Pathway	468

4. Craniosynostosis: Pursuing Genetic and Pharmaceutical Alternatives to Surgical Treatment	473
5. XLHED: Developing Treatment Based on Knowledge Gained from Mouse and Canine Models	477
6. Concluding Thoughts	481
Acknowledgments	481
References	481

18. Signaling Pathways in Craniofacial Development: Insights from Rare Skeletal Disorders **493**

Cynthia L. Neben and Amy E. Merrill

1. Rare Skeletal Disorders and Their Classification	494
2. Building the Skeleton	495
3. Signaling Pathways in Skeletal Development and Their Associated Skeletal Disorders	497
4. Hedgehog	497
5. Parathyroid Hormone-Related Protein	501
6. WNT	503
7. NOTCH	505
8. Transforming Growth Factor Beta Superfamily	507
9. Fibroblast Growth Factor	512
10. Future Directions	517
Acknowledgments	526
References	526

19. Clinical and Genomic Approaches for the Diagnosis of Craniofacial Disorders **543**

Pedro A. Sanchez-Lara

1. Introduction	544
2. Clinical Evaluation and Dysmorphology	544
3. Chromosomal Aberrations	550
4. Evolution of Copy Number Detection	550
5. Single-Candidate Gene and Panel-Based Testing	553
6. Next-Generation Sequencing	554
7. Whole-Exome Sequencing and Whole-Genome Sequencing	555
8. Future Perspectives	557
References	557

20. Morphometrics, 3D Imaging, and Craniofacial Development	561
Benedikt Hallgrímsson, Christopher J. Percival, Rebecca Green, Nathan M. Young, Washington Mio, and Ralph Marcucio	
1. Introduction	562
2. Morphometrics and Morphospaces	564
3. Approaches to Morphometrics	567
4. Landmarks and Homology	576
5. Quantifying Variation	579
6. 3D Imaging for Morphometrics	586
7. Future Directions—Integrating Molecular and Anatomical Imaging	588
Acknowledgments	591
References	591
21. Imaging the Cell and Molecular Dynamics of Craniofacial Development	599
Lie A. Trinh and Scott E. Fraser	
1. Introduction	600
2. Challenge of Temporal and Spatial Scales in Imaging of Craniofacial Development	601
3. Perspective	620
References	621
Index	631
