

CONTENTS

<i>Contributors</i>	ix
<i>Preface</i>	xi
1. The Maternal-to-Zygotic Transition in <i>C. elegans</i>	1
Scott Robertson and Rueyling Lin	
1. Introduction	2
2. Components of the MZT	5
3. Major Regulators/Events That Coordinate the MZT	26
4. Concluding Remarks	31
Acknowledgments	34
References	34
2. Regulation and Function of Maternal Gene Products During the Maternal-to-Zygotic Transition in <i>Drosophila</i>	43
John D. Laver, Alexander J. Marsolais, Craig A. Smibert, and Howard D. Lipshitz	
1. Introduction	44
2. Overview of Oogenesis and Early Embryogenesis	45
3. Maternal Factors During Oocyte Maturation	48
4. Maternal Factors During Egg Activation and Early Embryogenesis	50
5. The Maternal-to-Zygotic Transition in Primordial Germ Cells	72
6. Conclusions and Future Prospects	76
Acknowledgments	76
References	77
3. Transcriptional Activation of the Zygotic Genome in <i>Drosophila</i>	85
Melissa M. Harrison and Michael B. Eisen	
1. Introduction	86
2. Activating Transcription of the Zygotic Genome	87
3. Mechanisms Regulating Transcriptional Activation During the MZT	92
4. Chromatin Dynamics During the MZT	98
5. The Role of <i>cis</i> -Regulatory Elements in Regulating Zygotic Transcription	101
6. Concluding Remarks	105
References	106

4. Coordinating Cell Cycle Remodeling with Transcriptional Activation at the <i>Drosophila</i> MBT	113
Shelby A. Blythe and Eric F. Wieschaus	
1. Introduction	114
2. What Happens at the MBT?	115
3. Mechanisms for Timing Zygotic Genome Activation	132
4. Concluding Remarks	143
Acknowledgment	143
References	144
 5. Germ Line Versus Soma in the Transition from Egg to Embryo	 149
S. Zachary Swartz and Gary M. Wessel	
1. The Big Picture	150
2. Are METs Universal?	153
3. General Activation of the Embryonic Genome	154
4. Activation of Regionally Specific Gene Regulatory Networks	158
5. Loss of Cleavage Synchrony: A Cause or Effect of Embryonic Control?	158
6. Degradation of the Maternally Supplied Transcriptome	160
7. Separating the Soma from the Germ Line: A Critical Fork in the Road	162
8. Different Roads Lead to a Conserved Germ Line Program	163
9. PGC Specification by Induction	164
10. PGC Specification by Preloading	167
11. Evolutionary Transition of PGC Segregation in the Echinoderms	169
12. Putting Your Germ Cells in the Freezer: Possible Advantages for Preloaded Specification	173
13. Are METs Different Between the Germ Line and Soma? Transcriptional Repression in PGCs	175
14. Differential Stability of mRNA in the Germ Line and Soma	178
15. METs Are Delayed in PGCs	181
16. A Continuum of Maternal and Embryonic Contributions to Development	182
References	183
 6. The Maternal-to-Zygotic Transition During Vertebrate Development: A Model for Reprogramming	 191
Valeria Yartseva and Antonio J. Giraldez	
1. Introduction	192
2. Mechanisms of Maternal mRNA Clearance During the MZT	195

3. Consequences of Failure of Maternal mRNA Clearance	212
4. MZT Connection to Other Transitions and Reprogramming	216
5. Concluding Remarks	220
Acknowledgments	222
References	222
7. Building the Future: Post-transcriptional Regulation of Cell Fate Decisions Prior to the <i>Xenopus</i> Midblastula Transition	233
Michael D. Sheets	
1. Introduction	234
2. Regulation of Maternal mRNAs in the <i>Xenopus</i> Embryo	240
3. miRNA Regulation of mRNAs During Early <i>Xenopus</i> Development	244
4. Translational Control of mRNAs Encoding Cell Fate Determinants	245
5. Regulation of Maternal Proteins in the <i>Xenopus</i> Embryo	252
6. Regulated Proteolysis and the Control of Maternal Signaling Pathways	255
7. The <i>Xenopus</i> Maternal Proteome	258
8. The Maternal Phosphoproteome	259
9. Metabolism and Metabolomics	261
10. Conclusions	262
Acknowledgments	262
References	262
8. The <i>Xenopus</i> Maternal-to-Zygotic Transition from the Perspective of the Germline	271
Jing Yang, Tristan Agüero, and Mary Lou King	
1. Introduction	272
2. Germ-Plasm RNAs and Cytoskeletal Dynamics: Stage VI Oocyte	274
3. Germ Plasm and Cytoskeletal Dynamics: Oocyte Maturation/Fertilization	276
4. Maternal Determinants for Two Lineages Inherited by the Same Blastomeres: A Dilemma	280
5. Mechanisms for Protecting the Germline During the MZT	282
6. PGCs are Transcriptionally Repressed at the MBT	285
7. How Does the Germline Escape the MBT?	286
8. RNA Degradation During the MZT	287
9. Stability of Germline RNAs and Proteins	289
10. The PGC Late-Gastrula Transition	293
Acknowledgments	295
References	296

9. Sculpting the Transcriptome During the Oocyte-to-Embryo Transition in Mouse	305
Petr Svoboda, Vedran Franke, and Richard M. Schultz	
1. Introduction	306
2. Overview of Significant Events During OET	308
3. The OET: The Mother of All Transcriptome Remodeling	310
Acknowledgments	339
References	339
10. The Maternal-to-Zygotic Transition in Flowering Plants: Evidence, Mechanisms, and Plasticity	351
Célia Baroux and Ueli Grossniklaus	
1. Seed Development: A Largely Maternal Affair	352
2. Emancipation of the Plant Embryo	355
3. Progressive Zygotic Gene Activation	357
4. Mechanisms of Zygotic Genome Activation	359
5. The Dynamics of the Maternal-to-Zygotic Transition Vary Depending on Plant Species and Genetic Background	362
6. Biological Functions of the Maternal-to-Zygotic Transition in Plants	363
7. Unresolved Questions and Outlook	365
Acknowledgments	367
References	367
11. The Maternal-to-Zygotic Transition in Higher Plants: Available Approaches, Critical Limitations, and Technical Requirements	373
Peng Zhao and Meng-Xiang Sun	
1. Zygote Development and Embryogenesis in Angiosperms	374
2. The MZT During Early Angiosperm Embryogenesis	376
3. Studies on the MZT During Embryogenesis and Technical Limitations	377
4. Current Techniques Used to Study the MZT in Higher Plants	384
5. Conclusions and Perspectives	394
Acknowledgments	395
References	395
Index	399
