Chapter 1 Steps in Metagenomics: Let's Avoid Garbage in and Garbage Out 1

Jacques Izard

Why Metagenomics?	1
It all Starts with the Study Design	2
Have a Statistical Analysis Plan in Place Before Starting	4
Metadata is Needed to Provide Context to the Analysis	8
Sampling: The Basis of Good Results.....	9
Sample Storage	10
Sample Extraction	11
Choosing the Right Platform	13
Data Storage and Data Analysis.....	16
Data and Publication	17
Let's Talk About the Status Quo.....	18
Acknowledgments.....	19
References.....	19

Chapter 2 Long-Read, Single Molecule, Real-Time (SMRT) DNA Sequencing for Metagenomic Applications..... 25

Brett Bowman, Mincheol Kim, Yong-Joon Cho and Jonas Korlach

Full-Length 16S rRNA Gene Sequencing.....	27
Discussion.....	32
References.....	36

Chapter 3 Ribosomal RNA Removal Methods for Microbial Transcriptomics..... 39

Shaomei He

Introduction.....	39
Size Selection by Gel Electrophoresis.....	40

Denaturing High-Performance Liquid Chromatography	42
5' Phosphate-Dependent Exonuclease Digestion	42
RNase H Digestion.....	43
Subtractive Hybridization with rRNA-Specific Probes.....	44
Biased 3' Polyadenylation against rRNA	47
Selective Priming in cDNA Synthesis.....	47
cDNA Library Normalization	49
Combination of Methods	50
Conclusions and Perspectives.....	51
References.....	51
 Chapter 4 High-Throughput Sequencing as a Tool for Exploring the Human Microbiome.....	 55
<i>Mathieu Almeida and Mihai Pop</i>	
Introduction.....	55
Organizing Metagenomic Reads by Mapping onto Reference Genomes	56
Taxonomic Classification/Binning	58
Structuring Metagenomic Short Reads into a Gene Catalog by <i>De Novo</i> Assembly	59
Clustering Metagenomic Gene Catalogs	61
Advanced Metagenomic Analyses.....	62
Conclusion.....	62
References.....	63
 Chapter 5 Computational Tools for Taxonomic Microbiome Profiling of Shotgun Metagenomes.....	 67
<i>Matthias Scholz, Adrian Tett and Nicola Segata</i>	
Introduction.....	67
Taxonomic Profiling with Shotgun Metagenomics.....	68
Assembly-Based Taxonomic Profiling of Microbiome	69
Compositional Approaches for Metagenomic Binning	71
Mapping-Based Recruitment of Metagenomic Reads.....	72
Marker-Based Taxonomic Profiling	73

Profiling Large Metagenomic Cohorts: A Case Study	74
Conclusions and Outlook	76
Acknowledgments.....	77
References.....	77
Chapter 6 Hypothesis Testing of Metagenomic Data.....	81
<i>Patricio S. La Rosa, Yanjiao Zhou, Erica Sodergren, George Weinstock and William D. Shannon</i>	
Introduction.....	81
Metagenomic data	83
Compare Diversity Across Groups	84
Compare a Taxon of Interest Across Groups.....	86
Compare the Frequency of all Taxa Across Groups	90
Discussion and Future Research	94
References.....	96
Chapter 7 Longitudinal Microbiome Data Analysis.....	97
<i>Georg K. Gerber</i>	
Introduction.....	97
Examples	99
Computational Methods for Analyzing Microbiome Time-Series Data	102
Conclusion.....	109
References.....	110
Chapter 8 Metagenomics for Bacteriology	113
<i>Erika del Castillo and Jacques Izard</i>	
Healthy Hosts and Microbiomes.....	113
What About Disease?.....	114
Food, Biotransformation, and Life	115
Some Practical Usage of the Microbiomes	116
Our Societal Choices Influence the Microbiomes.....	117
Diving into a Detailed View of the Scales Involved.....	118
What would Help to Further the Leap?	120

Acknowledgments.....	128
References.....	128
Chapter 9 Toward the Understanding of the Human Virome.....	135
<i>Nadim J. Ajami and Joseph F. Petrosino</i>	
Introduction.....	135
Virome Characterization Workflow	136
Recent Virome Studies	137
Interaction of the Virome with the Human Host	137
Concluding Remarks	140
References.....	140
Chapter 10 Promises and Prospects of Microbiome Studies.....	145
<i>Maria C. Rivera and Jacques Izard</i>	
Microbiome During Development and Disease	147
Therapeutic Potential of Microbiota Modifications.....	149
Challenges Ahead: Human Microbiome Information in the Health Care System	150
Ethical Considerations of Microbiome Research	151
Citizen Scientist, Crowdsourced Research, and the Microbiome.....	153
Metagenomics, Agriculture, and Food Microbiology	154
Summary	156
Acknowledgments.....	157
References.....	157
Glossary.....	161
Index.....	167
