

Contents

List of Contributors	xiii
Preface	xvii
Section One Overview	1
1 Introduction to Transgenic Animal Technology	3
<i>Carl A. Pinkert</i>	
I. Introduction	3
II. Historical Background	3
III. Applications and Overview of Text	7
References	11
Section Two Transgenic Animal Production Focusing on the Mouse Model	15
2 DNA Microinjection, Embryo Handling, and Germplasm Preservation	17
<i>H. Greg Polites, Larry W. Johnson and Carl A. Pinkert</i>	
I. Introduction	17
II. General Methods	17
III. Summary	59
Acknowledgments	61
References	61
Appendix	64
3 Factors Affecting Transgenic Animal Production	71
<i>Paul A. Overbeek</i>	
I. Introduction	71
II. Getting Started	71
III. Troubleshooting	90
IV. Transgenic Phenomenology	95

V. Summary	104
Acknowledgments	104
References	104
4 Gene Targeting in Embryonic Stem Cells, I: History and Methodology	109
<i>L. Philip Sanford and Tom Doetschman</i>	
I. Stem Cells of the Mouse Embryo	109
II. Gene Targeting in ESCs	115
III. Methods	126
References	131
5 Gene Targeting in Embryonic Stem Cells, II: Conditional Technologies	141
<i>Daniel J. Ledbetter, James G. Thomson, Jorge A. Piedrahita and Edmund B. Rucker III</i>	
I. Introduction	141
II. Conditional Modeling: A Brief History	142
III. Recombinase Systems in ES Cell Modification	143
IV. Methods	152
Abbreviations	160
References	160
6 Retrovirus-Mediated Gene Transfer	167
<i>Bon Chul Koo, Mo Sun Kwon and Teoan Kim</i>	
I. Retroviruses	167
II. Strategies of Retrovirus Vector Systems	168
III. Problems in the Use of Retrovirus Vectors in Gene Transfer	179
IV. Methods	182
Acknowledgments	189
References	189
7 Nuclear Transfer Technologies	195
<i>Yoko Kato and Yukio Tsunoda</i>	
I. Introduction and Discussion	195
II. Materials and Equipment	199
III. Preparation of Microtools	202
IV. Nuclear Transfer of Preimplantation Embryos	205

V. Nuclear Transfer of Embryonic Stem Cells and Somatic Cells	217
Acknowledgments	224
References	224
8 Gene Editing	229
David A. Dunn and Carl A. Pinkert	
I. Introduction	229
II. Sequence Modifications in Genome Editing	229
III. Approaches to Genome Editing	231
IV. Online Resources	239
V. Commercial Resources	241
VI. Summary	242
References	243
Section Three Production of Transgenic Laboratory and Domestic Animal Species	249
9 Production of Transgenic Rats	251
Philip Iannaccone and Vasiliy Galat	
I. Introduction	251
II. Importance of Rats	251
III. Contributions from Transgenic Rats	253
IV. Production	254
V. Summary	267
Acknowledgments	267
References	267
10 Production of Transgenic Rabbits	275
Tatiana Flisikowska, Alexander Kind and Angelika Schnieke	
I. Introduction—Rabbits in Biomedicine	275
II. Overview of Methods for Producing Genetically Modified Rabbits	277
III. Materials and Methods	283
IV. Conclusion	298
References	298

11 Production of Transgenic Fish	305
<i>Rex A. Dunham and Richard N. Winn</i>	
I. Introduction	305
II. Discussion	305
III. Methods of Gene Transfer	306
IV. Establishing and Maintaining Transgenic Lineages	320
V. Gene Knockout	323
VI. Performance of Transgenic Aquaculture-Generated Species of Fish	325
VII. Care and Containment of Transgenic Fish	327
VIII. Future of Transgenic Fish	328
References	328
12 Production of Transgenic Poultry	335
<i>James N. Petitte and Paul E. Mozdziak</i>	
I. Introduction and Discussion	335
II. Methods	341
III. Summary	355
Acknowledgments	355
References	355
13 Production of Transgenic Nonhuman Primates	359
<i>Anthony W.S. Chan</i>	
I. Introduction	359
II. Methods	365
III. Summary	376
Acknowledgments	378
References	378
14 Nuclear Transfer Technology in Cattle, Sheep, and Swine	387
<i>Satoshi Akagi, Kazutsugu Matsukawa and Akira Onishi</i>	
I. Introduction	387
II. Protocol for Bovine NT	388
III. Protocol for Porcine NT	393
IV. Protocol for Ovine NT	395
V. Summary	396
References	397

15 Alternative Methods for Transgenesis in Domestic Animal Species	399
<i>Michael J. Martin and Carl A. Pinkert</i>	
I. Introduction and Discussion	399
II. Methods	405
III. Alternative Methods for the Production of Transgenic Swine	415
IV. Summary	419
References	419
Section Four Molecular Biology, Analyses and Enabling Technologies	429
16 Analysis of Phenotype	431
<i>Cory F. Brayton, Colin McKerlie and Steve Brown</i>	
I. Introduction	431
II. Methods for Robust, Relevant, and Reproducible Phenotyping	434
III. Conclusions	446
References	449
17 Design of Vectors for Optimizing Transgene Expression	489
<i>Louis-Marie Houdebine</i>	
I. Introduction	489
II. Basic Vectors	492
III. Vectors Using Long Genomic DNA Fragments	495
IV. Gene Targeting	498
V. Specific Inhibition Gene Expression	501
VI. Relations between Vectors and Gene Transfer Techniques	504
VII. Conclusion	507
References	507
18 Analysis of Transgene Integration	513
<i>Cristina Vicente-García, Almudena Fernández and Lluís Montoliu</i>	
I. Introduction	513
II. Chromosomal Position Effects	514
III. Promoting the Integration at Selected Genomic Regions	516
IV. Discussion	525

V. Conclusion and Perspectives	526
Acknowledgments	527
References	527
19 PCR Optimization for Detection of Transgene Integration	533
<i>Michael H. Irwin, Wendy K. Pogozelski and Carl A. Pinkert</i>	
I. Introduction	533
II. Discussion	533
III. Summary	540
References	540
20 Analysis of Transgene Expression	543
<i>Michael H. Irwin and Carl A. Pinkert</i>	
I. Introduction	543
II. Analyses of Steady-State Levels of Transgenic RNA Transcripts	545
III. Analyses of Steady-State Levels of Transgenic Protein Products	552
IV. Conclusion	561
Acknowledgment	562
References	562
21 Compound Transgenics: Recombinase-Mediated Gene Stacking	565
<i>Benjamin P. Beaton and Kevin D. Wells</i>	
I. Introduction	565
II. Gene-Stacking Strategy	568
III. Materials and Methods	569
IV. Summary	577
V. Notes	577
References	578
22 Assisted Reproductive Technologies and Embryo Culture Methods for Farm Animals	581
<i>Robert A. Godke, Marina Sansinena and Curtis R. Youngs</i>	
I. Introduction	581
II. Assisted Reproductive Technologies	582

III. Embryo Culture Systems	601
IV. Embryo Coculture Systems	605
V. The Use of Embryo Culture Systems	613
VI. Additional Assisted Reproductive Technologies	616
VII. Summary and Future Direction	619
References	621
23 Modifying Mitochondrial Genetics	639
<i>Carl A. Pinkert, Michael H. Irwin, Kumiko Takeda and Ian A. Trounce</i>	
I. Introduction	639
II. Methods	645
Acknowledgments	651
References	652
24 Databases, Internet Resources, and Genetic Nomenclature	657
<i>Anna V. Anagnostopoulos and Janan T. Eppig</i>	
I. Introduction	657
II. Transgenic, Targeted, and Gene Trap Mutation Databases and Online Resources	658
III. Standardized Nomenclature for Transgenic, Targeted, and Gene Trap Mutation Animals	676
Acknowledgments	683
References	683
Appendix	686
Glossary	691
