Preface

xvii

1. Adipocyte-Specific Transgenic and Knockout Models

1

Sona Kang, Xingxing Kong, and Evan D. Rosen

1. Introduction

1

2. Loss-of-Function Strategies in Adipocytes *In Vivo*

3

3. Gain-of-Function Strategies in Adipocytes *In Vivo*

9

References

13

2. Imaging White Adipose Tissue with Confocal Microscopy

17

Gabriel Martinez-Santibañez, Kae Won Cho, and Carey N. Lumeng

1. Introduction

18

2. Materials for Imaging Adipose Tissue

24

3. Methods

25

4. Summary

28

Acknowledgments

28

References

28

3. Isolation and Study of Adipocyte Precursors

31

Christopher D. Church, Ryan Berry, and Matthew S. Rodeheffer

1. Introduction

32

2. Adipose Tissue Depots and Cell Populations

33

3. Digestion of Whole WAT for Isolation of SVF

33

4. Flow Cytometry and FACS

36

5. Primary Adipocyte Precursor Cell Culture and Differentiation

41

6. Digestion of Whole WAT for Isolation of Mature Adipocytes

43

Acknowledgments

45

References

45

4. Imaging of Adipose Tissue

47

Ryan Berry, Christopher D. Church, Martin T. Gericke, Elise Jeffery,

Laura Colman, and Matthew S. Rodeheffer

1. Introduction

48

2. Imaging of Whole Mounted Adipose Tissue

48

3. Imaging of Sectioned Adipose Tissue	53
Acknowledgments	72
References	72
5. Adipose Tissue Angiogenesis Assay	75
Raziel Rojas-Rodriguez, Olga Gealekman, Maxwell E. Kruse, Brittany Rosenthal, Kishore Rao, SoYun Min, Karl D. Bellve, Lawrence M. Lifshitz, and Silvia Corvera	
1. Introduction	76
2. Materials	77
3. Methods	79
4. Method Limitations	90
Acknowledgment	90
References	91
6. Quantifying Size and Number of Adipocytes in Adipose Tissue	93
Sebastian D. Parlee, Stephen I. Lentz, Hiroyuki Mori, and Ormond A. MacDougald	
1. Introduction	94
2. Technical Aspects	96
3. Future Challenges and Conclusions	114
Acknowledgments	119
References	119
7. Use of Osmium Tetroxide Staining with Microcomputerized Tomography to Visualize and Quantify Bone Marrow Adipose Tissue <i>In Vivo</i>	123
Erica L. Scheller, Nancy Troiano, Joshua N. VanHoutan, Mary A. Boussein, Jackie A. Fretz, Yougen Xi, Tracy Nelson, Griffin Katz, Ryan Berry, Christopher D. Church, Casey R. Doucette, Matthew S. Rodeheffer, Ormond A. MacDougald, Clifford J. Rosen, and Mark C. Horowitz	
1. Introduction	124
2. Materials	129
3. Methods	131
4. Summary	137
Acknowledgments	137
References	137

8. Brown Adipose Tissue in Humans: Detection and Functional Analysis Using PET (Positron Emission Tomography), MRI (Magnetic Resonance Imaging), and DECT (Dual Energy Computed Tomography)	141
Magnus Borgia, Kirsi A. Virtanen, Thobias Romu, Olof Dahlqvist Leinhard, Anders Persson, Pirjo Nuutila, and Sven Enerbäck	
1. Introduction	142
2. Positron Emission Tomography	143
3. Magnetic Resonance Imaging	147
4. Dual Energy Computed Tomography	150
References	156
9. Analyzing the Functions and Structure of the Human Lipodystrophy Protein Seipin	161
M.F. Michelle Sim, Md Mesbah Uddin Talukder, Rowena J. Dennis, J. Michael Edwardson, and Justin J. Rochford	
1. Introduction	162
2. Technical Aspects	163
3. Discussion	173
References	174
10. Differentiation of Human Pluripotent Stem Cells into Highly Functional Classical Brown Adipocytes	177
Miwako Nishio and Kumiko Saeki	
1. Introduction	178
2. Experimental Components and Considerations	179
3. Notes with Troubleshooting	195
References	197
11. Analysis and Measurement of the Sympathetic and Sensory Innervation of White and Brown Adipose Tissue	199
Cheryl H. Vaughan, Eleen Zarebidaki, J. Christopher Ehlen, and Timothy J. Bartness	
1. Introduction	200
2. Surgical Denervation of WAT and BAT Nerves	202
3. Chemical Denervation of Adipose Tissue Using 6-Hydroxy-Dopamine	207
4. Local Sensory Denervation of Adipose Tissue Using Capsaicin	209
5. Assessment of Sympathetic Denervation Using NETO or Content as Measured by HPLC-EC	211

6. Assessment of Sensory Denervation Using CGRP ELISA	218
7. Expression of Data	220
Acknowledgments	220
References	221
12. Measurement and Manipulation of Human Adipose Tissue Blood Flow Using Xenon Washout Technique and Adipose Tissue Microinfusion	227
Richard Sotornik and Jean-Luc Ardilouze	
1. Introduction	228
2. AT 133 Xenon Washout—Principle of the Method	229
3. AT Microinfusion—Principle of the Method	230
4. Materials	231
5. Procedure	232
6. Calculations	236
7. Other Techniques Used in ATBF Measurement	237
8. Conclusion	239
Acknowledgments	239
References	240
13. Isolation and Quantitation of Adiponectin Higher Order Complexes	243
Joseph M. Rutkowski and Philipp E. Scherer	
1. Introduction	244
2. Sample Collection and Preparation	246
3. Gel Fractionation by FPLC	247
4. Western Blot Analysis	251
5. Complex Distribution Quantitation and Presentation	254
6. Comparison to Other Techniques	256
7. Concluding Remarks	258
Acknowledgments	258
References	258
14. Genome-Wide Profiling of Transcription Factor Binding and Epigenetic Marks in Adipocytes by ChIP-seq	261
Ronni Nielsen and Susanne Mandrup	
1. Introduction	261
2. Technical Aspects	262
3. Future Challenges	277

Acknowledgments	277
References	277
15. Analysis and Isolation of Adipocytes by Flow Cytometry	281
Susan M. Majka, Heidi L. Miller, Karen M. Helm, Alistaire S. Acosta, Christine R. Childs, Raymond Kong, and Dwight J. Klemm	
1. Introduction	282
2. Preparation of Adipocytes by Collagenase Digestion of Adipose Tissue	286
3. Staining of Single Cell Suspensions from Adipose Tissue for Flow Cytometry Analysis	287
4. Analysis and Sorting of Adipocytes by Flow Cytometry	291
5. Summary	294
Acknowledgment	295
References	295
16. Flow Cytometry Analyses of Adipose Tissue Macrophages	297
Kae Won Cho, David L. Morris, and Carey N. Lumeng	
1. Introduction	298
2. Materials	299
3. Methods	302
4. Discussion	310
Acknowledgments	313
References	313
Author Index	315
Subject Index	335

Kae Won Cho

Department of Pediatrics and Communicable Diseases, University of Michigan Medical
School, Ann Arbor, Michigan, USA

Christopher G. Church

Section of Cardiovascular Medicine, and Yale Stem Cell Center, Yale University School of
Medicine, New Haven, Connecticut, USA

Lauree Coleman

Section of Cardiovascular Medicine, Yale University School of Medicine, New Haven,
Connecticut, USA
