

CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xv</i>
1. Mechanisms of Pluripotency <i>In Vivo</i> and <i>In Vitro</i>	1
Eszter Posfai, Oliver H. Tam, and Janet Rossant	
1. Introduction	2
2. Phases of Lineage Restriction	4
3. First Lineage Specification—ICM Versus TE Cell Fate	5
4. Second Lineage Specification—EPI Versus PE Cell Fate	10
5. Maintenance of Early Cell Lineages—Relevance to Pluripotent Stem Cells	15
6. Growth Factor Signaling Requirements in EPI-Derived Stem Cells: <i>In Vivo</i> Similarities and Differences	17
7. Concluding Remarks	25
Acknowledgments	28
References	28
2. Hematopoietic Stem Cell Development: An Epigenetic Journey	39
Sean M. Cullen, Allison Mayle, Lara Rossi, and Margaret A. Goodell	
1. Introduction	40
2. Principles of Epigenetic Regulation	42
3. Epigenetic Regulation of Hematopoiesis	50
4. Role of Epigenetic Regulators in Hematopoietic Malignancies	62
5. Conclusions	67
Acknowledgments	68
References	68
3. Intestinal Stem Cells and Their Defining Niche	77
David Wei-Min Tan and Nick Barker	
1. The Mammalian Small Intestine	78
2. Intestinal Stem Cells	79
3. Characterizing Stem Cell Behavior During Homeostasis and Disease	89
4. Reconciling the Opposing ISC Models	90
5. The Stem Cell Niche	92
6. Studying ISCs <i>Ex Vivo</i>	99
7. Conclusion	100

Acknowledgments	101
References	101

4. Epithelial Stem Cells in Adult Skin **109**

Ana Mafalda Baptista Tadeu and Valerie Horsley

1. Introduction	109
2. Stem Cells in the Interfollicular Epidermis	111
3. Stem Cells in the Pilosebaceous Unit	114
4. Stem Cells in the Sweat Gland	116
5. Components of Adult Stem Cell Niches in the Skin	117
6. Stem Cells in Epithelial Skin Cancers	121
7. Concluding Remarks	124
Acknowledgments	124
References	125

5. The Mammary Stem Cell Hierarchy **133**

Naiyang Fu, Geoffrey J. Lindeman, and Jane E. Visvader

1. Introduction	134
2. Identification of Adult Mouse MaSCs	135
3. The Isolation of Distinct Mammary Luminal Progenitor Cells	140
4. <i>In Vivo</i> Lineage Tracing in the Mammary Gland	141
5. Evidence for the Existence of Fetal MaSCs	144
6. Elucidation of a Functionally Analogous Epithelial Hierarchy in Human Breast	145
7. Control of MaSCs by Steroid Hormones	146
8. Molecular Regulators of the Mammary Epithelial Hierarchy	147
9. Implications of the Differentiation Hierarchy for Breast Cancer	153
10. Concluding Remarks	155
Acknowledgments	155
References	155

6. Satellite Cells: The Architects of Skeletal Muscle **161**

Natasha C. Chang and Michael A. Rudnicki

1. Introduction	161
2. Embryonic Origin of Satellite Cells	165
3. Adult Satellite Cells: A Heterogeneous Population of Stem Cells and Committed Progenitors	168
4. Age and Disease-Related Decline in Satellite Cell Function	172
5. Satellite Cell Transplantation Therapy	173

6. Concluding Remarks	176
Acknowledgments	177
References	177
7. Neural Stem Cell of the Hippocampus: Development, Physiology Regulation, and Dysfunction in Disease	183
Chiara Rolando and Verdon Taylor	
1. Introduction	184
2. Origin of Adult Hippocampal Neural Stem Cells: Embryonic Development of the DG	185
3. Adult Hippocampal Neurogenesis: Heterogeneous Neurogenic NSCs and Niche	193
4. Adult DG NSC in Epilepsy, Aging, and Depression	196
5. Conclusions	200
Acknowledgments	201
References	201
8. Lung Stem and Progenitor Cells in Tissue Homeostasis and Disease	207
Kristen T. Leeman, Christine M. Fillmore, and Carla F. Kim	
1. Introduction	208
2. Endogenous Lung Stem and Progenitor Cells	211
3. The Others: Lung Mesenchymal Stromal Cells and Lung Endothelial Progenitor Cells	215
4. Directing Differentiation: Embryonic Stem Cells and Induced Pluripotent Stem Cells	216
5. MSCs: Potential Role of Cell-Based Therapy in Lung Disease	218
6. Stem Cells in Lung Cancer	220
7. Future Directions	224
Acknowledgments	226
References	226
9. Spermatogonial Stem Cell Functions in Physiological and Pathological Conditions	235
Qi-En Yang and Jon M. Oatley	
1. Introduction	236
2. Spermatogenesis and SSC Biology	237
3. Origin of SSC Pool	241
4. Molecular Mechanisms Regulating Maintenance of the SSC Pool	245

5. TGCT Formation	254
6. Concluding Remarks	259
References	260
10. The Origin, Biology, and Therapeutic Potential of Facultative Adult Hepatic Progenitor Cells	269
Soona Shin and Klaus H. Kaestner	
1. Introduction	270
2. Conditions That Activate HPC Proliferation	271
3. Origins and Markers for HPCs	273
4. The Contribution of HPCs to Liver Regeneration	281
5. Signaling Pathways and Niches That Regulate the Behavior of HPCs	282
6. Cell Therapy	285
7. Concluding Remarks	287
Acknowledgments	287
References	287
11. Nephron Progenitor Cells: Shifting the Balance of Self-Renewal and Differentiation	293
Raphael Kopan, Shuang Chen, and Melissa Little	
1. Introduction	294
2. Setting the Scene: The Developing Urinary System of the Mammal	296
3. The Nephrogenic Niche	297
4. A Subdivision Within the Nephron Progenitor Population: Evidence for More Than One State	298
5. Roles Played by the CM	305
6. Balancing Self-Renewal and Differentiation: Signals from the Stroma	314
7. Influences from Other Cellular Compartments	317
8. Transcriptional Regulation of the CM	317
9. Renal Hypoplasia: Time to Reassess What We Know	318
10. Cessation of Nephrogenesis	320
11. Conclusion	322
Acknowledgments	322
References	322
12. Adult Stem Cell Niches: Cellular and Molecular Components	333
Amélie Rezza, Rachel Sennett, and Michael Rendl	
1. Introduction	334
2. Cellular Organization of Adult SC Niches	335

3. Molecular Regulators of Adult SC Niches	348
4. SC Niche Dysfunction in Aging and Cancer	356
5. Concluding Remarks	358
Acknowledgments	359
References	359
13. Cancer Stem Cells, Pluripotency, and Cellular Heterogeneity: A WNTer Perspective	373
Yaser Atlasi, Leendert Looijenga, and Riccardo Fodde	
1. Cancer Stem Cells: An Overview	374
2. Control of (Cancer) Stemness by Signaling Pathways: The Embryonic/Germ Cell Connection	383
3. Conclusions and Future Perspective	393
Acknowledgments	396
References	396
14. Cellular Mechanisms of Somatic Stem Cell Aging	405
Yunjoon Jung and Andrew S. Brack	
1. Introduction	406
2. Molecular Players of Cellular Aging	409
3. Extrinsic Regulation of Aged Cellular and Tissue Homeostasis	415
4. Aging in Tissue-Specific Stem Cells	416
5. Discussion and Concluding Comments	427
Acknowledgments	429
References	429
Index	439
