CONTRIBUTORS TO VOLUME 61	xi
PREFACE	xv
CONTENTS OF VOLUMES 35-60	xxi

Field Trials with Lignin-Modified Transgenic Trees

GILLES PILATE, ANNABELLE DEJARDIN
AND JEAN-CHARLES LEPLÉ

I. Introduction: Lignin a Major Wood Polymer	2
II. Evaluation of Lignin-Modified Transgenic Trees Grown in the Greenhouse versus in the Field.	6
III. Evaluation of Potential Effects of Lignin-Modified Transgenic Trees on the Environment.	23
IV. Synthesis, Conclusion and Prospects	25
References	30

Lignification and Lignin Manipulations in Conifers

ARMIN WAGNER, LLOYD DONALDSON AND JOHN RALPH

I. Introduction	38
II. Lignification in Conifers	40
III. Lignin Manipulations in Conifers	47
IV. Conclusion	64
Acknowledgments	65
References	66

Molecular Biology of Lignification in Grasses

MICHAEL J. HARRINGTON, MAREK MUTWIL, YVES BARRIÈRE
AND RICHARD SIBOUT

I. Introduction	78
II. Spatio-Temporal Deposition of Lignins in Grasses	80
III. Lignin Biosynthesis and Genetically Engineered Plants	84
IV. <i>Brown-Midrib</i> Mutants with Unknown Loci	93
V. QTL and Breeding	94
VI. Network and Co-expression Data of Lignin Genes	95

VII. Conclusion	102
Acknowledgements	103
References	103

Cytochrome P450s in Lignin Biosynthesis

ANNETTE ALBER AND JÜRGEN EHLTING

I. Introduction	114
II. Cytochrome P450 Hydroxylases in Monolignol Biosynthesis	117
III. Concluding Remarks	134
References	135

Role of Plant Laccases in Lignin Polymerization

SERGE BERTHET, JOHANNE THEVENIN, DAVY BARATINY,
NATHALIE DEMONT-CAULET, ISABELLE DEBEAUJON,
PRZEMYSŁAW BIDZINSKI, JEAN-CHARLES LEPLÉ, RUDY HUIS,
SIMON HAWKINS, LEONARDO-D GOMEZ, CATHERINE
LAPIERRE AND LISE JOUANIN

I. Introduction	146
II. Plant Laccases Are Multicopper Oxidases Showing Broad <i>In Vitro</i> Substrate Specificity	147
III. Towards the Functional Identification of Plant Laccases Through Functional Genomics	148
IV. Transcriptional Regulation of Plant Laccases	161
V. Conclusion and Perspectives	166
Acknowledgements	167
References	167

Transcriptional Regulation of the Lignin Biosynthetic Pathway Revisited: New Players and Insights

JACQUELINE GRIMA-PETTENATI, MARÇAL SOLER, EDUARDO
LEAL O. CAMARGO AND HUA WANG

I. Introduction	174
II. Phenylpropanoid and Lignin Biosynthetic Genes Contain AC-Rich <i>Cis</i> -Regulatory Elements	175
III. MYB TFs and the Regulation of the Lignin Pathway	177
IV. The NAC-Mediated Regulation of the SW	187
V. Other TF Families Regulating Lignin Biosynthesis	192
VI. The Specific Regulation of the Syringyl Pathway	193
VII. Combinatorial Transcriptional Complexes	194
VIII. Environmental Regulation of the Lignin Biosynthetic Pathway	196

IX. Hormonal Control and Regulation of Lignin Biosynthesis	198
X. Concluding Remarks	200
Acknowledgments	210
References	210

Lignins and Abiotic Stresses

MIREILLE CABANE, DANY AFIF AND SIMON HAWKINS

I. Introduction	220
II. Response to Abiotic Stresses	224
III. Lignin role in Response to Abiotic Stresses	246
IV. Regulation of the Response	247
V. Concluding Remarks	249
References	249

Fungal Strategies for Lignin Degradation

JEAN-CLAUDE SIGOILLOT, JEAN-GUY BERRIN, MATHIEU BEY,
LAURENCE LESAGE-MEESSEN, ANTHONY LEVASSEUR, ANNE
LOMASCOLO, ERIC RECORD AND EVA UZAN-BOUKHRIS

I. Introduction: The Lignin-Degrading Fungi and Their Features	264
II. Main Enzymes of Lignin Degradation: Type, Structure and Reactions	268
III. Predicting Lignocellulolytic Enzymes Using Phylogenetic Inference Strategy ..	286
IV. Recombinant Production of Ligninases in Fungal Hosts	291
V. Conclusion: Recent Trends in Fungal Lignocellulosics Degradation Studies ...	294
References	295

Evolutionary History of Lignins

ESTHER NOVO-UZAL, FEDERICO POMAR, LAURA V. GÓMEZ
ROS, JOSE M. ESPÍNEIRA AND ALFONSO ROS BARCELÓ

I. Introduction	312
II. Lignin Occurrence in the Different Phylogenetic Groups	318
III. Evolutionary View of S Lignin Biosynthetic Pathway and Transcriptional Regulation	336
IV. Conclusion	339
Acknowledgements	340
References	341
