Section I

Investigating Solution Chemistry, Structure, and Nucleation

1. Development of Accurate Force Fields for the Simulation of Biomineralization	3
Paolo Raiteri, Raffaella Demichelis, and Julian D. Gale	
1. Introduction	4
2. Force Field Selection and Refinement	7
3. The Mineral-Aqueous Interface	14
4. Organics in Geochemical Systems	18
5. Summary	19
Acknowledgments	19
References	19
2. The Integration of Ion Potentiometric Measurements with Chemical, Structural, and Morphological Analysis to Follow Mineralization Reactions in Solution	25
Wouter J.E.M. Habraken	
1. Introduction	26
2. Ion Potentiometric Measurements	29
3. Combination of Ion Potentiometric Measurements with other Analysis Techniques	35
4. Comparison with Standard Analyses	41
5. Summary	42
References	42
3. Investigating the Early Stages of Mineral Precipitation by Potentiometric Titration and Analytical Ultracentrifugation	45
Matthias Kellermeier, Helmut Cölfen, and Denis Gebauer	
1. Introduction	46
2. Equipment	48

3. Experimental Procedures	49
4. Data Evaluation	54
5. Conclusions and Outlook	66
References	67
 4. Replica Exchange Methods in Biomineral Simulations	 71
Adam F. Wallace	
1. Introduction	72
2. Monte Carlo Sampling	73
3. Replica Exchange MD	77
4. Application of REMD to Early Stage Mineralization	83
5. Summary	89
References	89
 5. SAXS in Inorganic and Bioinspired Research	 95
Tomasz M. Stawski and Liane G. Benning	
1. Introduction	96
2. General Considerations: How Does SAXS/WAXS Work and When It Is Applicable?	96
3. What Happens in a Solution When Ions Meet and How Do We Quantify it?	99
4. SAXS Data Processing and Interpretation	105
5. Case Studies	111
6. Outlook	122
Acknowledgments	124
References	124
 6. <i>In Situ</i> Solution Study of Calcium Phosphate Crystallization Kinetics	 129
Haihua Pan, Shuqin Jiang, Tianlan Zhang, and Ruikang Tang	
1. Introduction	130
2. Solution Preparation and Experimental Considerations	132
3. <i>In Situ</i> Experiments	135
4. Data Handling/Processing	138
5. Summary	141
References	141

Section II**Probing Structure and Dynamics at Surfaces and Interfaces**

7. Design, Fabrication, and Applications of <i>In Situ</i> Fluid Cell TEM	147
Dongsheng Li, Michael H. Nielsen, and James J. De Yoreo	
1. Introduction	147
2. Fluid Cell Design	150
3. Cell Fabrication and Assembly	153
4. TEM Operation	154
5. Effects of the Electron Beam on Reactions in the Fluid Cell	160
6. Conclusions	161
Acknowledgments	162
References	162
8. X-ray Absorption Spectroscopy for the Structural Investigation of Self-Assembled-Monolayer-Directed Mineralization	165
Jonathan R.I. Lee, Michael Bagge-Hansen, Trevor M. Willey, Robert W. Meulenberg, Michael H. Nielsen, Ich C. Tran, and Tony van Buuren	
1. Introduction	166
2. Theory	167
3. Experimental	172
4. Analysis	183
Acknowledgments	185
References	186
9. Cryo-TEM Analysis of Collagen Fibrillar Structure	189
Bryan D. Quan and Eli D. Sone	
1. Introduction	190
2. Sample Preparation for Cryo-TEM	193
3. Image Acquisition and Processing	195
4. Image Averaging	198
5. Summary and Outlook	202
Acknowledgments	203
References	203

Section III**Biomimetic Crystallization Techniques *in vitro*****10. Preparation of Organothiol Self-Assembled Monolayers
for Use in Templated Crystallization 209**

Michael H. Nielsen and Jonathan R.I. Lee

1. Introduction 210
2. Crystallization Approaches Using SAMs as Templates 211
3. Preparation 214
4. Why Good SAMs Go Bad 218
5. SAM Preparation Procedure 221
6. Summary 221
- Acknowledgments 222
- References 222

**11. Experimental Techniques for the Growth and Characterization
of Silica Biomorphs and Silica Gardens 225**Matthias Kellermeier, Fabian Glaab, Emilio Melero-García, and
Juan Manuel García-Ruiz

1. Introduction 226
2. Silica Biomorphs 230
3. Chemical Gardens 240
4. Conclusions and Outlook 251
- Acknowledgments 252
- References 252

**12. Precipitation in Liposomes as a Model for Intracellular
Biom mineralization 257**

Chantel C. Tester and Derk Joester

1. Introduction 258
2. Model Systems for Studying the Influence of Confinement
on Biom mineralization 260
3. Preparation of Liposomes 261
4. Precipitation Inside Liposomes 268
5. Characterization Methods 270
6. Conclusions 273
- Acknowledgments 274
- References 274

13. Polymer-Mediated Growth of Crystals and Mesocrystals	277
Helmut Cölfen	
1. Introduction	278
2. Insoluble Polymers	279
3. Soluble Polymers	286
4. Conclusion	301
References	302
14. Phage Display for the Discovery of Hydroxyapatite-Associated Peptides	305
Hyo-Eon Jin, Woo-Jae Chung, and Seung-Wuk Lee	
1. Introduction	306
2. Methods	312
3. Summary	321
References	321
Section IV	
Protein Structure, Interactions and Function	
15. Quantitatively and Kinetically Identifying Binding Motifs of Amelogenin Proteins to Mineral Crystals Through Biochemical and Spectroscopic Assays	327
Li Zhu, Peter Hwang, H. Ewa Witkowska, Haichuan Liu, and Wu Li	
1. Introduction	328
2. Strategy and Rationale	330
3. Experimental Components and Considerations	331
4. Experimental Approaches	332
5. Data Handling and Processing	340
6. Summary	340
Acknowledgments	341
References	341
16. Using the RosettaSurface Algorithm to Predict Protein Structure at Mineral Surfaces	343
Michael S. Pacella, Da Chen Emily Koo, Robin A. Thottungal, and Jeffrey J. Gray	
1. Introduction	344
2. Algorithm Evolution and Prior Results	346
3. Computational Methods	348

4. Protocol Capture	352
5. Future Challenges	359
Acknowledgments	360
A. Appendix	360
References	363
17. Investigating Protein Function in Biomineralized Tissues Using Molecular Biology Techniques	367
Christopher E. Killian and Fred H. Wilt	
1. Introduction	368
2. Discovery of Proteins Involved in Biomineralization	368
3. Analysis of Function	377
Acknowledgments	385
References	385
Section V	
Mapping Biomineral Morphology and Ultrastructure	
18. Imaging the Nanostructure of Bone and Dentin Through Small- and Wide-Angle X-Ray Scattering	391
Silvia Pabisch, Wolfgang Wagermaier, Thomas Zander, Chenghao Li, and Peter Fratzl	
1. Introduction	392
2. Experimental Setup	394
3. Overview of Parameters	396
4. Treatment of SAXS Data from Mineralized Tissue	397
5. Treatment of WAXD Data from Mineralized Tissues	405
6. Analysis Tools	408
7. Combination of Scanning SAXS/WAXD with Other Methods	409
8. Conclusions	410
References	412
19. Synchrotron X-Ray Nanomechanical Imaging of Mineralized Fiber Composites	415
Angelo Karunaratne, Nicholas J. Terrill, and Himadri S. Gupta	
1. Introduction	416
2. Molecular and Nanoscale Strains and Stresses in a Prototypical Biomineralized Composite	419
3. Relation between X-Ray Spectra and Nanomechanics	422

4. Sample Preparation for <i>In Situ</i> Mechanical Testing with Synchrotron X-Rays	425
5. Mechanical Tester Design	435
6. Synchrotron Setup	441
7. <i>In Situ</i> Experimental Procedure	442
8. Data Analysis	450
9. Case Studies	461
10. Model Interpretation	464
11. Summary	468
Acknowledgments	469
References	469

Section VI

Mapping Mineral Chemistry

20. Application of Total X-Ray Scattering Methods and Pair Distribution Function Analysis for Study of Structure of Biominerals 477

Richard J. Reeder and F. Marc Michel

1. Introduction	478
2. Total Scattering Methodology	479
3. The PDF	486
4. Extracting Information from the PDF	486
5. PDF Studies of Biominerals	492
6. Summary	496
7. Links	498
Acknowledgments	498
References	498

21. X-Ray Microdiffraction of Biominerals 501

Nobumichi Tamura and Pupa U.P.A. Gilbert

1. Introduction	501
2. Elements of X-Ray (Micro)Diffraction	504
3. Synchrotron, X-Ray Focusing Optics, and Area Detectors	509
4. Sample Preparation	514
5. Powder X-Ray Microdiffraction	515
6. White-Beam X-Ray Microdiffraction	520
7. Microbeam Small-Angle X-Ray Scattering	522
8. Future Developments	526
References	527

22. FTIR and Raman Studies of Structure and Bonding in Mineral and Organic-Mineral Composites	533
Jinhui Tao	
1. Introduction	534
2. FTIR and Raman Spectroscopies Overview	535
3. The Raman Effect	535
4. Measuring Biomimetic Crystals and Biominerals	543
5. Future Directions	553
Acknowledgments	553
References	553
23. A Mixed Flow Reactor Method to Synthesize Amorphous Calcium Carbonate Under Controlled Chemical Conditions	557
Christina R. Blue, J. Donald Rimstidt, and Patricia M. Dove	
1. Introduction	558
2. Method	559
3. Characterization	562
4. Results	564
References	567
