1. Ontogeny and Functional Specialization of Dendritic Cells in Human and Mouse

1

Muzlifah Haniffa, Matthew Collin, and Florent Ginhoux

1. Introduction 2
2. History of DC Identification and Characterization 2
3. Recent Advances in Mouse DC Immunobiology: Lessons from a Rodent 9
4. Recent Advances in Human DC Immunobiology 18
5. Humanized Mice 27
6. Matching Mice and Men 28
7. The Relationship of DCs to Monocytes and Macrophages 33
8. Next Steps Ahead 34
9. Disclosure Statement 35
- Acknowledgments 35
- References 35

2. Dendritic Cell Migration Through the Lymphatic Vasculature to Lymph Nodes

51

Andrew M. Platt and Gwendalyn J. Randolph

1. Structure and Function of the Lymphatic Vasculature 52
2. DC Migration into Lymphatics and the Requirement for Specialized Lymphatic Capillaries 55
3. DC Mobilization to LNs: The Role of CCR7 58
4. DC Mobilization to LNs: The Machinery for Locomotion 59
5. Lymphangiogenesis and DC Trafficking During Inflammation 60
6. Concluding Remarks 63
- References 63

3. A Close Encounter of the Third Kind: Monocyte-Derived Cells

69

Alexander Mildner, Simon Yona, and Steffen Jung

1. Dendritic Cell and Macrophages 70
2. Monocytes, the Mononuclear Phagocytes of the Blood Compartment 73
3. Monocytes, as Precursors of Tissue Mononuclear Phagocytes 76
4. Monocyte-Derived Cells in the Inflamed Peritoneum 80

5. Monocyte-Derived Cells in the Inflamed Brain	83
6. Monocyte-Derived Cells in the Intestine	88
7. Development of Monocyte-Derived Cells	91
8. Perspective	93
Acknowledgments	94
References	94
4. Plasmacytoid Dendritic Cell Development	105
Ken Shortman, Priyanka Sathe, David Vremec, Shalin Naik, and Meredith O'Keeffe	
1. Background	106
2. Markers for pDC Identification	107
3. Cytokines Promoting pDC Development	108
4. Transcription Factors Determining pDC Development	110
5. Early Investigation of the Myeloid Versus Lymphoid Origin of pDC	110
6. Markers of pDC of Lymphoid Origin?	111
7. CDP and the Consensus Myeloid Pathway to pDC	113
8. Reassessment of the Lymphoid Pathway to pDC	114
9. Implications of RAG-1 Expression and IgH Gene Rearrangements in pDC	116
10. Extension of the CDP Definition to Include New pDC Precursors	118
11. A Different Non-pDC but pDC-Like Product of the Myeloid Pathway	118
12. Tracking pDC Development Using Cellular "Barcoding"	120
13. Some Conclusions	121
References	122
5. Pathological Consequence of Misguided Dendritic Cell Differentiation in Histiocytic Diseases	127
Marie-Luise Berres, Carl E. Allen, and Miriam Merad	
1. The Mononuclear Phagocyte System	128
2. The DC Lineage	128
3. Origin and Regulation of DC Differentiation	130
4. DC Heterogeneity	132
5. Batf-IRF8-ID2-Dependent DC Lineage	132
6. Batf3-ID2-IRF8-Independent DC Lineage	134
7. Monocyte-Derived DCs and Inflammatory DCs	135
8. The LC Exception	135
9. The Human DC Lineage	137
10. Human Histiocytoses as a Result of Dysregulated Differentiation of the Human Myeloid Compartment	139

11. Conclusion and Perspective	150
Acknowledgments	150
References	151
6. Macrophage Activation and Polarization as an Adaptive Component of Innate Immunity	163
Massimo Locati, Alberto Mantovani, and Antonio Sica	
1. Introduction	164
2. Activation, Priming, and Tolerance as Adaptive Responses of Macrophages	165
3. Polarized Activation	168
4. Molecular Mechanisms Underlying Macrophage Polarization	170
5. Epigenetic Regulation of Macrophage Polarization	173
6. Posttranscriptional Regulation in Macrophage Activation and Polarization	174
7. Concluding Remarks	176
Acknowledgments	177
References	177
7. Terminal Differentiation of Dendritic Cells	185
Cyril Seillet and Gabrielle T. Belz	
1. Introduction	186
2. Dendritic Cell Subsets	186
3. Transcriptional Regulation of Early DC Development: Cellular Differentiation and Some of the Key Regulatory Molecules	188
4. Transcriptional Regulation of Late DC Development at Steady State	192
5. Alternative DC Generation: Emergency Hematopoiesis	202
6. Perspectives	203
Acknowledgments	204
References	204
8. Diversity of Pathogen Sensors in Dendritic Cells	211
Silvia Cerboni, Matteo Gentili, and Nicolas Manel	
1. Introduction	212
2. Diversity of Pathogen Sensors in DCs	218
3. Interactions and Effectors	226
4. Perspectives	230
Acknowledgments	231
References	231

9. Transcriptional Control of Dendritic Cell Development	239
Kenneth M. Murphy	
1. Dendritic Cells Comprise Functionally Heterogeneous Subsets	240
2. DC Development	242
3. Zbtb46 and cDCs	248
4. Ongoing Issues in DC Development	250
Acknowledgments	258
References	258
10. Transcriptional Control of Macrophage Identity, Self-Renewal, and Function	269
Kaaweh Molawi and Michael H. Sieweke	
1. Creating Macrophage Identity	270
2. Controlling Macrophage Numbers and Proliferation	281
3. Transcriptional Control of Macrophage Specialization and Functional Activation States	285
4. Concluding Remarks	291
Acknowledgments	291
References	292
Index	301
Contents of Recent Volumes	311
