

CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xv</i>
1. Examining the Molecular Mechanism of Bcl-2 Family Proteins at Membranes by Fluorescence Spectroscopy	1
Justin Kale, Xiaoke Chi, Brian Leber, and David Andrews	
1. Introduction	2
2. An <i>In Vitro</i> Fluorescence-Based Liposome System	3
3. Membrane Permeabilization Assay	11
4. Fluorescence Resonance Energy Transfer	13
5. Tracking the Conformation Changes of a Protein	16
6. Determining the Topology of Proteins within Membranes	19
7. Conclusion	20
Acknowledgments	22
References	22
2. Photoreactive Stapled Peptides to Identify and Characterize BCL-2 Family Interaction Sites by Mass Spectrometry	25
Susan Lee, Craig R. Braun, Gregory H. Bird, and Loren D. Walensky	
1. Introduction	26
2. Overview of Photoreactive Stabilized Alpha-Helices Methodology	28
3. Design and Synthesis of Photoreactive Stapled Peptides	31
4. Photoaffinity Labeling and Retrieval	34
5. Mass Spectrometry Analysis	36
6. Computational Docking	38
7. Mapping Novel Binding Sites	41
8. Conclusions and Future Directions	45
Acknowledgments	46
References	46
3. The Structural Biology of BH3-Only Proteins	49
Marc Kvansakul and Mark G. Hinds	
1. Introduction	50
2. What Constitutes a BH3-Only Protein?	52
3. Specificity and Interactions with the Bcl-2 Family	56

4. Structures of BH3-Only Proteins and Their Complexes	58
5. Interaction of BH3-Only Proteins with Viral Bcl-2 Homologues	61
6. Interaction with Non-Bcl-2 Proteins: Beyond the BH3-Motif	63
7. Regulation	64
8. BH3-Only Proteins and Disease	65
9. Conclusion	67
Acknowledgments	67
References	67
 4. How to Analyze Mitochondrial Morphology in Healthy Cells and Apoptotic Cells in <i>Caenorhabditis elegans</i>	75
Stéphane G. Rolland	
1. Introduction	76
2. Why Address These Questions in <i>C. elegans</i>	79
3. How to Inactivate or Overexpress a Particular Candidate Gene in <i>C. elegans</i>	79
4. How to Visualize Mitochondria in <i>C. elegans</i>	82
5. Potential Outcomes and Future Experiments	94
6. Concluding Remarks and Future Challenges	95
Acknowledgments	95
References	96
 5. Apoptosis Initiation Through the Cell-Extrinsic Pathway	99
Pradeep Nair, Min Lu, Sean Petersen, and Avi Ashkenazi	
1. Introduction	100
2. Ligand-Induced Receptor Clustering	102
3. Control of Caspase-8 Activation	111
4. Death Receptor Stimulation of Necroptosis	117
5. Conclusion	120
References	121
 6. Using RNAi Screening Technologies to Interrogate the Extrinsic Apoptosis Pathway	129
Jean Philippe Stephan	
1. Introduction	130
2. RNAi-Mediated Gene Knockdown in Mammalian Cells	131
3. Concluding Remarks and Perspectives	152
References	153

7. Caspase Enzymology and Activation Mechanisms	161
Peter D. Mace, Stefan J. Riedl, and Guy S. Salvesen	
1. Introduction	161
2. Activating Initiator Caspases	163
3. Investigating Caspase Activity and Inhibition	171
4. Conclusions	176
Acknowledgments	176
References	176
8. Turning ON Caspases with Genetics and Small Molecules	179
Charles W. Morgan, Olivier Julien, Elizabeth K. Unger, Nirao M. Shah, and James A. Wells	
1. Use of Chemical-Induced Dimerizers to Activate Caspases	180
2. Use of Cre-LoxP and a Self-Activating Caspase-3 ^{TevS} for Conditional Apoptosis of Neurons	190
3. Small-Molecule Activators of Caspases	200
Acknowledgments	209
References	210
9. A Multipronged Approach for Compiling a Global Map of Allosteric Regulation in the Apoptotic Caspases	215
Kevin Dagbay, Scott J. Eron, Banyuhay P. Serrano, Eli M. Velázquez-Delgado, Yunlong Zhao, Di Lin, Sravanti Vaidya, and Jeanne A. Hardy	
1. Introduction	216
2. Zinc-Mediated Allosteric Inhibition of Caspases	218
3. Using the Embedded Record of Functionally Important Posttranslational Modifications to Identify Allosterically Sensitive Sites	224
4. Synthetic Small-Molecule Inhibitors to Identify Allosteric Sites	230
5. Exploiting Structural Differences Among Caspases	236
6. Future of Allosteric Site Discovery	243
Acknowledgments	244
References	244
10. Measuring Caspase Activity <i>In Vivo</i>	251
Samantha B. Nicholls and Bradley T. Hyman	
1. Introduction	251
2. Small Molecule Reagents	253

3. Protein Indicators	258
4. Future Directions	266
References	267
11. Single-Molecule Sensing of Caspase Activation in Live Cells via Plasmon Coupling Nanotechnology	271
Cheryl Tajon, Young-Wook Jun, and Charles S. Craik	
1. Imaging of Caspase Activation	272
2. Gold Nanoparticles and Their Potential as Plasmon Rulers	275
3. Live Cell Imaging Using Crown Nanoparticles	280
4. Methods	287
5. Conclusions	293
Acknowledgments	294
References	294
12. In Vivo Monitoring of Caspase Activation Using a Fluorescence Resonance Energy Transfer-Based Fluorescent Probe	299
Yoshifumi Yamaguchi, Erina Kuranaga, Yu-ichiro Nakajima, Akiko Koto, Kiwamu Takemoto, and Masayuki Miura	
1. Introduction	300
2. Monitoring Caspase Activities in Living Cells: Principle and Tips for Using a SCAT3 Probe	303
3. Monitoring Caspase Activation with SCAT3 in <i>Drosophila</i>	308
4. Monitoring Caspase Activation with SCAT3 in Mice	317
5. Concluding Remarks	322
References	322
13. Global Analysis of Cellular Proteolysis by Selective Enzymatic Labeling of Protein N-Termini	327
Arun P. Wiita, Julia E. Seaman, and James A. Wells	
1. Introduction	328
2. Basic Features of Subtiligase Method	332
3. Subtiligase-Based Labeling Method	335
4. Experimental Applications of Subtiligase-Based N-Terminomics	337
5. Limitations to the Subtiligase Labeling Method	351
6. Summary of Findings from Subtiligase-Based N-Terminomics	352
7. Future Directions	354
Acknowledgments	355
References	355

14. Complementary Methods for the Identification of Substrates of Proteolysis	359
Victoria C. Pham, Veronica G. Anania, Qui T. Phung, and Jennie R. Lill	
1. Introduction	360
2. Combined Fractional Diagonal Chromatography	361
3. Protein Topography and Migration Analysis Platform	364
4. Global Analyzer of SILAC-Derived Substrates of Proteolysis	368
5. Immuno-Affinity Enrichment of C-Terminal Aspartic Acid Containing Peptides for the Identification of Caspase substrates	373
6. Summary	376
References	378
15. Phospholipid Scrambling on the Plasma Membrane	381
Jun Suzuki and Shigekazu Nagata	
1. Introduction	381
2. Assays for Calcium-Induced Phospholipid Scrambling	384
3. Assays for Apoptosis-Induced Phospholipid Scrambling	388
References	392
16. Studying Apoptosis in the Zebrafish	395
Peter M. Eimon	
1. Introduction	396
2. Detecting and Quantifying Apoptosis in Zebrafish	397
3. Approaches to Manipulating Apoptosis Pathways in Zebrafish	414
4. Mutant Lines and Morpholinos	425
5. Summary	425
Acknowledgments	425
References	426
