CHAPTER 1 Fifty Years of Nuclear Pores and Nucleocytoplasmic Transport Studies: Multiple Tools Revealing Complex Rules1

Aur lie G. Floch, Benoit Palancade, Val rie Doye

Introduction	2
1.1 The NPCs: A Modular Macromolecular Assembly	3
1.2 Nucleocytoplasmic Trafficking: The Rules of the Road	12
1.3 The Nuclear Transport Machinery: A Dynamic and Versatile Device	23
Concluding Remarks	31
Acknowledgments	31
References	32

CHAPTER 2 Imaging Metazoan Nuclear Pore Complexes by Field Emission Scanning Electron Microscopy41

Boris Fichtman, Lihi Shaulov, Amnon Harel

Introduction	42
2.1 Rationale	44
2.2 Materials	48
2.3 Anchored Nuclei	49
2.4 Mammalian Cell Nuclei	51
2.5 Immunogold Labeling	52
2.6 Sample Preparation for FESEM	54
Acknowledgments	56
References	56

CHAPTER 3 Imaging Yeast NPCs: From Classical Electron Microscopy to Immuno-SEM59

Elena Kiseleva, A. Christine Richardson, Jindriska Fiserova,
Anton A. Strunov, Matthew C. Spink, Simeon R. Johnson,
Martin W. Goldberg

Introduction	60
3.1 Conventional TEM	61
3.2 SEM and Immuno-SEM of Yeast Nuclei	65
3.3 Immunogold Labeling of Yeast Ultrathin Cryosections	69
Conclusions and Perspectives	76

	Acknowledgments	77
	References	77
CHAPTER 4	Exploring Nuclear Pore Complex Molecular Architecture by Immuno-Electron Microscopy Using <i>Xenopus</i> Oocytes.....	81
	Nelly Panté, Birthe Fahrenkrog	
	Introduction	82
4.1	Materials	86
4.2	Experimental Strategies	87
4.3	Preparation of Antibodies Conjugated with Colloidal Gold Particles	89
4.4	Immunogold Labeling of Nucleoporins Using Anti-Nucleoporin Antibodies	90
4.5	Immunogold Labeling of Nucleoporins Using Epitope-Tagged Nucleoporins	93
	Concluding Remarks	96
	Acknowledgments	96
	References	96
CHAPTER 5	Utilizing the Dyn2 Dimerization-Zipper as a Tool to Probe NPC Structure and Function.....	99
	Dirk Flemming, Philipp Stelter, Ed Hurt	
	Introduction	100
5.1	Common Preparatory Steps	101
5.2	Dyn2 as an EM Label to Map Subcomplexes and Single Nups	107
5.3	Probing the FG Network by Selective Insertion of the eDID-Dyn2 Complex into FG Repeat Domains.....	111
5.4	Materials and Reagents	113
	Conclusion.....	114
	Acknowledgment	114
	References.....	114
CHAPTER 6	The Use of Targeted Proteomics to Determine the Stoichiometry of Large Macromolecular Assemblies.....	117
	Alessandro Ori, Amparo Andrés-Pons, Martin Beck	
	Introduction	118
6.1	Isolation of Nuclei and Nuclear Envelopes.....	119
6.2	Targeted Proteomics	130
	Conclusions	143

	Acknowledgments	144
	References	144
CHAPTER 7	A Pulse–Chase Epitope Labeling to Study Cellular Dynamics of Newly Synthesized Proteins: A Novel Strategy to Characterize NPC Biogenesis and Ribosome Maturation/Export.....	147
	Philipp Stelter, Ed Hurt	
	Introduction	148
7.1	Cloning into the <i>Saccharomyces cerevisiae</i>	
	Pulse–Chase Vectors	150
7.2	Epitope Pulse–Chase Protocols.....	151
7.3	Material	160
	Conclusion and Perspectives.....	161
	Acknowledgments	162
	References.....	162
CHAPTER 8	Analysis of Nuclear Reconstitution, Nuclear Envelope Assembly, and Nuclear Pore Assembly Using <i>Xenopus In Vitro</i> Assays	165
	Cyril Bernis, Douglass J. Forbes	
	Introduction	166
8.1	Materials.....	168
8.2	<i>Xenopus</i> Egg Extracts	170
8.3	Demembranated Sperm Chromatin	177
8.4	<i>In Vitro</i> Reconstitution of Nuclei	180
8.5	Assaying Assembly and Integrity of the Nuclear Envelope ...	182
8.6	A Nuclear Pore Complex Assembly Assay Using Pore-Free Nuclear Intermediates	184
	Conclusion.....	187
	References.....	188
CHAPTER 9	<i>Xenopus In Vitro</i> Assays to Analyze the Function of Transmembrane Nucleoporins and Targeting of Inner Nuclear Membrane Proteins.....	193
	Nathalie Eisenhardt, Allana Schooley, Wolfram Antonin	
	Introduction	195
9.1	Preparation of <i>Xenopus</i> Egg Extract Cytosol and Membranes	196
9.2	Protein Expression	201
9.3	Biochemical Procedures.....	204
9.4	Nuclear Assembly Reactions.....	210

	Conclusion.....	216
	References.....	217
CHAPTER 10	Imaging the Assembly, Structure, and Function of the Nuclear Pore Inside Cells.....	219
	Shotaro Otsuka, Anna Szyborska, Jan Ellenberg	
	Introduction	220
10.1	Measuring the Kinetics of Postmitotic NPC Assembly in Living Cells by Multicolor 4D Imaging	221
10.2	Monitoring NE Permeability in Living Cells by Sequential Photoswitching	225
10.3	Structural Analysis of the NPC by Super-Resolution Microscopy.....	228
10.4	Future Perspective.....	234
10.5	Materials and Instruments.....	234
	Acknowledgments	235
	References.....	236
CHAPTER 11	Cell-Fusion Method to Visualize Interphase Nuclear Pore Formation	239
	Kazuhiro Maeshima, Tomoko Funakoshi, Naoko Imamoto	
	Introduction	240
11.1	Materials and Equipment.....	246
11.2	Quantitative Analysis of Interphase NPC Formation using Cell-Fusion Method.....	247
11.3	Combining the Cell-Fusion Method with Drug and siRNA Treatments.....	249
11.4	Visualization of Interphase NPC Formation using Photobleaching	250
	Conclusions	252
	Acknowledgments	252
	References.....	252
CHAPTER 12	An <i>In Vitro</i> System to Study Nuclear Envelope Breakdown	255
	Joseph Marino, Lysie Champion, Cornelia Wandke, Peter Horvath, Monika I. Mayr, Ulrike Kutay	
	Introduction	256
12.1	Preparative Steps.....	258
12.2	NEBD Assay	264
12.3	Special Treatments	267
12.4	Data Analysis	270

12.5	Future Directions.....	273
12.6	Material and Reagents	273
	Acknowledgments	275
	References.....	275
CHAPTER 13	Modern Tools to Study Nuclear Pore Complexes and Nucleocytoplasmic Transport in <i>Caenorhabditis elegans</i>	277
	Peter Askjaer, Vincent Galy, Peter Meister	
	Introduction	278
13.1	Forward and Reverse Genetics	279
13.2	Transgenesis	287
13.3	Live Imaging of Embryos.....	290
13.4	<i>In Vivo</i> Methods to Evaluate Structural and Functional Integrity of the NE.....	296
13.5	Immunofluorescence and Electron Microscopy	298
13.6	Interaction of Nups with Chromatin.....	303
	Summary and Future Perspectives	304
	Acknowledgments	304
	References.....	305
CHAPTER 14	Assessing Regulated Nuclear Transport in <i>Saccharomyces cerevisiae</i>	311
	Christopher Ptak, Richard W. Wozniak	
	Introduction	312
14.1	Observing Steady-State Localization of Kap Cargo Proteins.....	314
14.2	Perturbing Nuclear Transport	319
14.3	Materials and Reagents	327
	Acknowledgments	328
	References.....	328
CHAPTER 15	Analysis of Nucleocytoplasmic Transport in Digitonin-Permeabilized Cells Under Different Cellular Conditions	331
	Maiko Furuta, Shingo Kose, Ralph H. Kehlenbach, Naoko Imamoto	
	Introduction	332
15.1	Equipment, Material, Reagents, and Buffers	335
15.2	Purification of Recombinant Transport Factors	339
15.3	Use of Digitonin-Permeabilized Cells to Study Nuclear Transport Under Normal and Heat-Shock Conditions.....	342

15.4	Interphase Nucleocytoplasmic Transport and Mitotic Chromosome Loading of Chromokinesin hKid	346
	Conclusions and Perspectives	349
	Acknowledgments	349
	References	349
CHAPTER 16	Novel Approaches for the Identification of Nuclear Transport Receptor Substrates	353
	Makoto Kimura, Ketan Thakar, Samir Karaca, Naoko Imamoto, Ralph H. Kehlenbach	
	Introduction	354
16.1	Identification of CRM1-Dependent Export Cargos	357
16.2	Identification of Nuclear Import Cargos	364
	Conclusions	375
	Acknowledgments	375
	References	376
CHAPTER 17	NPC Mimics: Probing the Mechanism of Nucleocytoplasmic Transport	379
	Tijana Jovanovic-Talisman, Brian T. Chait, Michael P. Rout	
	Introduction	380
17.1	Protein Production and Purification	381
17.2	Preparation of Nanoselective Filters	384
17.3	Device Setup	385
17.4	Flux Measurements	387
17.5	Materials and Reagents (Listed by Alphabetical Order)	389
	Conclusions	391
	References	391
CHAPTER 18	Analysis of RNA Transport in <i>Xenopus</i> Oocytes and Mammalian Cells	395
	Ichiro Taniguchi, Asako McCloskey, Mutsuhito Ohno	
	Introduction	396
18.1	Materials	398
18.2	Nuclear Export of Radiolabeled RNAs in <i>Xenopus</i> Oocytes	401
18.3	Nuclear Localization of Fluorescently Labeled RNAs in <i>Xenopus</i> Oocytes	405
18.4	Nuclear Export of Endogenous poly(A)+RNA in Mammalian Cells	407
18.5	Nuclear Export of Exogenously Expressed GFP mRNA in Mammalian Cells	409

	Concluding Remarks	411
	Acknowledgment	411
	References	412
CHAPTER 19	Strategies for Investigating Nuclear–Cytoplasmic tRNA Dynamics in Yeast and Mammalian Cells	415
	Jacqueline B. Pierce, Shawn C. Chafe, Manoj, B. K. Eswara, George van der Merwe, Dev Mangroo	
	Introduction	416
19.1	Identification of tRNA-Interacting Proteins Using a Yeast Three-Hybrid Interaction Screen	419
19.2	Amber Suppression <i>In Vivo</i> Nuclear tRNA Export Assay	423
19.3	Fluorescence <i>In Situ</i> Hybridization Detection of the Cellular Location of tRNA	426
19.4	Analysis of tRNA Aminoacylation Status in the Nucleus	431
	Concluding Remarks	435
	References	435
CHAPTER 20	Dissecting Ribosome Assembly and Transport in Budding Yeast	437
	Martin Altwater, Sabina Schütz, Yiming Chang, Vikram Govind Panse	
	Introduction	438
20.1	Localization of Preribosomal Subunits by Fluorescence Microscopy	441
20.2	Fractionation of Cell Extracts by Sucrose Gradient Sedimentation	443
20.3	Isolation of Preribosomal Particles by TAP	450
20.4	Monitoring Localization of the 40S Preribosome by Fluorescence <i>In situ</i> Hybridization	453
20.5	Analysis of Shuttling <i>Trans</i> -Acting Factors by Heterokaryon Assays	454
20.6	Material, Reagents and Yeast Media	456
	Conclusions	458
	Acknowledgments	458
	References	458
CHAPTER 21	Approaches to Studying Subnuclear Organization and Gene–Nuclear Pore Interactions	463
	Defne Emel Egecioglu, Agustina D'Urso, Donna Garvey Brickner, William H. Light, Jason H. Brickner	
	Introduction	464

21.1	A Quantitative Assay for Gene Localization to the Nuclear Pore Complex in Yeast	465
21.2	Monitoring Interchromosomal Clustering of Genes at the NPC	471
21.3	Using Chromatin Immunoprecipitation to Probe Nuclear Organization, Transcription, and Chromatin Structure in Yeast and Human Cells	474
21.4	List of Plasmids and Strains	481
	Concluding Remarks, Possible Caveats, and Troubleshooting	482
	Acknowledgments	483
	References	483
	Index	485
