1. Photoperiodic Flowering Regulation in *Arabidopsis thaliana* 1

Greg S. Golembeski, Hannah A. Kinmonth-Schultz, Young Hun Song
and Takato Imaizumi

1.1 Introduction	2
1.2 Photoperiodic Flowering and the External Coincidence Model	4
1.3 Current Molecular Mechanism of Photoperiodic Flowering in <i>Arabidopsis</i>	8
1.4 Photosynthates as a Component of the Photoperiodic Flowering Stimulus	17
1.5 Conclusions	21
Acknowledgements	22
References	23

2. Regulation of Flowering by Vernalisation in *Arabidopsis* 29

Youngjae Pyo, Sungrye Park, Yanpeng Xi and Sibum Sung

2.1 Introduction	30
2.2 The Vernalisation Response	32
2.3 Genetic Analysis of Vernalisation	34
2.4 Vernalisation-Mediated Changes in Gene Expression	37
2.5 Histone Modifications and Histone-Modifying Complexes	40
2.6 Non-Coding RNAs: New Players in Vernalisation	47
2.7 Changes at <i>VIN3</i> Chromatin and its Transcription by Vernalisation	50
2.8 Concluding Remarks	52
Acknowledgements	53
References	53

3. Regulation of Flowering by Endogenous Signals 63

Vinicius Costa Galvão and Markus Schmid

3.1 Introduction	64
3.2 Regulation of Flowering by Plant Hormones	66
3.3 Regulation of Flowering by Sugars	87
3.4 Conclusions	91
Acknowledgements	92
References	92

4. Critical Gates in Day-Length Recognition to Control the Photoperiodic Flowering	103
Asami Osugi and Takeshi Izawa	
4.1 Introduction	104
4.2 Gate-Regulated Expression of Florigen Genes in Response to Day Length	108
4.3 Regulation of Flowering Time through Nongating Mechanisms in Response to Day Length	115
4.4 Developmental Responses to Day Length	118
4.5 Day-Length Recognition in Different Plant Species	119
4.6 Perspectives	125
References	126
5. Genetic Control of Reproductive Development in Temperate Cereals	131
Chiara Campoli and Maria von Korff	
5.1 Introduction	132
5.2 Flowering Time and Adaptation to Different Environments	132
5.3 Impact of Flowering Time on Yield in Temperate Cereals	134
5.4 Flowering Time Genes and Floral Pathways in Temperate Cereals	134
5.5 Additional Flowering Genes in Temperate Cereals: Their Role in Flowering Time, Adaptation and Pleiotropic Effects	147
5.6 Conclusions	149
References	150
6. Genetic Control of <i>Arabidopsis</i> Flower Development	159
Diarmuid S. O'Maoileidigh, Emmanuelle Graciet and Frank Wellmer	
6.1 Introduction	160
6.2 Stages of Flower Development and Flower Morphology	161
6.3 Early Events during Flower Formation	163
6.4 The Specification of Floral Organs	167
6.5 Molecular Basis and Modifications of the ABC Model	170
6.6 Floral Patterning	173
6.7 Termination of FM Activity	178
6.8 Floral Organ Development	179
6.9 Conclusions and Perspectives	181
Acknowledgements	182
References	182

7. Grass Inflorescence: Basic Structure and Diversity	191
Junko Kyoizuka	
7.1 Inflorescence	192
7.2 The Genetic Basis of Grass Inflorescence Development	196
7.3 Perspectives and Conclusions	212
Acknowledgements	213
References	213
8. Flower Development in Rice	221
Wakana Tanaka, Taiyo Toriba and Hiro-Yuki Hirano	
8.1 Introduction	222
8.2 Structure of the Flower and Spikelet in Rice	228
8.3 Meristem Regulation	231
8.4 Floral Organ Specification—Function of Floral Homeotic Genes	237
8.5 Genetic Interactions and Flower Meristem Determinacy	242
8.6 Organ Development and Differentiation	245
8.7 Development of Nonfloral Spikelet Organs	250
8.8 Concluding Remarks	254
References	254
9. Genetic and Hormonal Regulation of Maize Inflorescence Development	263
Beth Thompson	
9.1 Introduction	264
9.2 A Brief Primer on Maize Inflorescence Development	265
9.3 Stem Cell Maintenance and Homeostasis in Inflorescence Meristems	268
9.4 Initiation and Determinacy of Lateral Meristems	271
9.5 Genetic Control of Floral Development	280
9.6 Genetic Regulation of Sex Determination	285
9.7 Concluding Remarks	288
References	289
10. Molecular Control of Inflorescence Development in Asteraceae	297
Suvi K. Broholm, Teemu H. Teeri and Paula Elomaa	
10.1 Introduction	298
10.2 Structure and Evolution of the Capitulum	299
10.3 CYCLOIDEA/TEOSINTE BRANCHED1-like TCP Domain Transcription Factors in Regulation of Capitulum Development in Asteraceae	304

10.4 Flower Organ Determination: the ABCE-Model in Asteraceae	313
10.5 Connections between MADS and TCP Regulators	322
10.6 Morphogenetic Control of Inflorescence Development	323
10.7 Concluding Remarks	326
Acknowledgements	326
References	327
