

CONTENTS

<i>Preface</i>	<i>ix</i>
1. Introduction	1
References	7
2. Chemistry of Reactive Species	13
2.1 Introduction	13
2.2 Redox Chemistry	14
2.3 Properties of Reactive Species	15
References	54
3. Reactive Species in Biological Systems	65
3.1 Introduction	65
3.2 Extracellular Milieu	66
3.3 Membrane-Bound Enzymes	71
3.4 Cytosolic Enzymes	73
3.5 Organelle Enzymes	76
References	80
4. Fluorescence Technique	87
4.1 Introduction	87
4.2 Fluorescence Spectroscopy and Microscopy	87
4.3 Chemistry of Redox Detection by Fluorescence	89
4.4 Classification of Fluorescent RS Probes by Specificity	94
4.5 Considerations in Fluorescence Probe Application	148
References	151
5. EPR Spin Trapping	163
5.1 Introduction	163
5.2 Electron Paramagnetic Resonance Spectroscopy	165
5.3 Chemistry of Spin Trapping	166
5.4 Classification of Spin Traps	167
5.5 Kinetics and Thermodynamics of Spin Trapping and pH Effect	169
5.6 Kinetics and Thermodynamics of Adduct Decay	175
5.7 Biostability and Cytotoxicity of Spin Traps	179
5.8 Synthesis of Spin Traps	181

5.9	Interpretation of EPR Spectra	182
5.10	Applications of Spin Trapping	188
	References	195
6.	UV–Vis Absorption and Chemiluminescence Techniques	203
6.1	Introduction	203
6.2	Superoxide Radical Probes	204
6.3	Hydroxyl Radical Probes	208
6.4	Antioxidant Capacity Assays	212
6.5	Nitric Oxide and Metabolites Probes	218
6.6	Thiols Probes	221
6.7	Peroxides Probes	224
6.8	Chemiluminescence	229
	References	236
7.	Electrochemical, Mass Spectroscopic, Immunochemical, and Nuclear Magnetic Resonance Techniques	253
7.1	Introduction	253
7.2	Electrochemical Techniques	253
7.3	Mass Spectroscopy	267
7.4	Immunochemical Technique	287
7.5	Nuclear Magnetic Resonance Spectroscopy and Imaging	300
	References	304
	<i>Index</i>	323
