

CONTENTS

Contributors	xi
Preface	xv

Section I

Protein Protocols

1. Practical Steady-State Enzyme Kinetics	3
Jon R. Lorsch	
1. Theory	4
2. Equipment	6
3. Materials	6
4. Protocol	6
5. Step 1 Measure Initial Rates of the Enzyme-Catalyzed Reaction as a Function of Substrate Concentration	7
6. Step 2 Determine the Kinetic Parameters (V_{max} , k_{cat} , K_m)	10
7. Step 3 Analyze the Mode of Action of an Inhibitor	13
References	15
2. Quantification of Protein Concentration Using UV Absorbance and Coomassie Dyes	17
James E. Noble	
1. Theory	18
2. Equipment	19
3. Materials	19
4. Protocol 1	20
5. Step 1 Quantification of Protein Using UV Absorbance	21
6. Protocol 2	23
7. Step 1 Quantification of Protein Using the Coomassie (Bradford) Assay	24
References	26
3. Preparation of Protein Samples for Mass Spectrometry and N-Terminal Sequencing	27
Gary Glenn	
1. Theory	28
2. Equipment	30
3. Materials	30

4. Method A Preparation of Protein Samples for Mass Spectrometry	33
5. Step A1 Purify the Mitochondria by Metrizamide Gradient Centrifugation and Solubilize them	34
6. Step A2 Fractionate the Solubilized Mitochondria by Sucrose Density Gradient Sedimentation	35
7. Step A3 Separate the Proteins by SDS-PAGE	37
8. Method B Preparation of Protein Samples for N-Terminal Sequencing	38
9. Step B1 Prepare Whole Cell Lysates of the Cells	39
10. Step B2 Affinity Purify the Protein of Interest	40
11. Step B3 Separate Proteins by SDS-PAGE and Transfer to PVDF Membrane	42
12. Step B4 Stain the PVDF Membrane and Take it to Your Protein Sequencing Facility	42
References	44

Section II

Protein Protocols/Cell Lysis

4. Lysis of Mammalian and Sf9 Cells	47
Jennifer M. Kavran and Daniel J. Leahy	
1. Theory	48
2. Equipment	48
3. Materials	48
4. Protocol	49
5. Step 1 Resuspend Cells in Lysis Buffer	49
6. Step 2 Lyse Cells Using a French Press	51
7. Step 3 Clarify the Cell Lysate	51
References	52

Section III

Protein Protocols/Measurement of Protein Synthesis and Decay Rates

5. <i>In Vivo</i> [35 S]-Methionine Incorporation	55
Anthony M. Esposito and Terri Goss Kinzy	
1. Theory	56
2. Equipment	56
3. Materials	57
4. Protocol	59
5. Step 1 Preparation of Culture	60
6. Step 2 Lyse Cells and TCA Precipitate Proteins	61

7. Step 3 Count in Scintillation Counter and Analyze Data	63
References	64
6. Pulse-Chase Analysis to Measure Protein Degradation	65
Einav Simon and Daniel Kornitzer	
1. Theory	66
2. Equipment	67
3. Materials	67
4. Protocol	70
5. Step 1 Methionine Pulse-Chase	71
6. Step 2 Immunoprecipitation	72
7. Step 3 Derivation of Protein Half-Life	74
References	75

Section IV

Protein Protocols/Methods for Protein Derivitization

7. Labeling of a Protein with Fluorophores Using Maleimide Derivitization	79
Jagpreet S. Nanda and Jon R. Lorsch	
1. Theory	80
2. Equipment	80
3. Materials	81
4. Protocol	81
5. Step 1 Fluorescent Labeling of Protein by Maleimide Derivitization	82
6. Step 2 Calculate the Efficiency of Labeling	84
References	86
8. Labeling a Protein with Fluorophores Using NHS Ester Derivitization	87
Jagpreet S. Nanda and Jon R. Lorsch	
1. Theory	88
2. Equipment	88
3. Materials	88
4. Protocol	89
5. Step 1 Fluorescent Labeling of Protein with 5(6)-FAM, SE Using NHS Ester Derivitization	90
6. Step 2 Calculate the Efficiency of Labeling	93
References	94

9. Protein Derivatization-Expressed Protein Ligation 95

Sarah F. Mitchell and Jon R. Lorsch

- 1. Theory 96
- 2. Equipment 98
- 3. Materials 99
- 4. Protocol 100
- 5. Step 1 Expression of Intein Fusion Proteins 101
- 6. Step 2 Cell Harvesting and Lysis 102
- 7. Step 3 Binding to Chitin Beads and Linking the Peptide 104
- 8. Step 4 Elution and Characterization of Protein 105
- References 108

10. Protein Biotinylation 109

Alice Alegria-Schaffer

- 1. Theory 109
- 2. Equipment 110
- 3. Materials 110
- 4. Protocol 111
- 5. Step 1 Calculations 111
- 6. Step 2 Protein Biotinylation 113
- References 114

Section V**Protein Protocols/Protein Expression****11. Small-Scale Expression of Proteins in *E. coli* 117**

Sarah Zerbs, Sarah Giuliani, and Frank Collart

- 1. Theory 118
- 2. Equipment 122
- 3. Materials 123
- 4. Protocol 125
- 5. Step 1 Induction of Heterologous Protein Expression in Small-Scale Bacterial Cultures 126
- 6. Step 2 Solubility Analysis of Expressed Heterologous Protein 129
- Acknowledgments 131
- References 131

12. Protein Expression-Yeast 133

Klaus H. Nielsen

- 1. Theory 134
- 2. Equipment 136

3. Materials	137
4. Protocol	141
5. Step 1 Growth of Yeast Cells	142
6. Step 2 Lysis of the Yeast Cells	143
7. Step 3 Purification of the Protein	144
References	147
13. Recombinant Protein Expression in Baculovirus-Infected Insect Cells	149
Donald L. Jarvis	
1. Theory	150
2. Equipment	150
3. Materials	151
4. Protocol	153
5. Step 1 Perform a Viable Cell Count	154
6. Step 2 Plaque Purify the Recombinant Baculovirus	154
7. Step 3 Prepare and Titer a Working Stock of the Recombinant Baculovirus	158
8. Step 4 Infect Insect Cells with the Recombinant Baculovirus and Produce the Protein of Interest	159
References	163
14. Single Cell Cloning of a Stable Mammalian Cell Line	165
Patti A. Longo, Jennifer M. Kavran, Min-Sung Kim, and Daniel J. Leahy	
1. Theory	165
2. Equipment	166
3. Materials	166
4. Protocol	167
5. Step 1 Serial Dilution of Cells	168
6. Step 2 Grow Single Cells and Analyze Protein Expression	171
References	172
