Preface	xv

Section I

Protein Protocols/Protein *In Vitro* Translation

1. <i>In Vitro</i> Synthesis of Proteins in Bacterial Extracts	3
Hani S. Zaher and Rachel Green	
1. Theory	4
2. Equipment	4
3. Materials	5
4. Protocol	7
5. Step 1 Grow and Harvest <i>E. coli</i> for the S30 Extract	8
6. Step 2 Preparation of the S30 Extract	10
7. Step 3 Optimization of the Coupled Transcription and Translation Reaction	11
References	15
2. Preparation of a <i>Saccharomyces cerevisiae</i> Cell-Free Extract for <i>In Vitro</i> Translation	17
Cheng Wu and Matthew S. Sachs	
1. Theory	18
2. Equipment	18
3. Materials	19
4. Protocol	22
5. Step 1 Preparation of Yeast Cell-Free Extract	23
6. Step 2 Cell-Free Translation	26
Source References	28

Section II

Protein Protocols/Protein *In Vivo* Binding Assays

3. Yeast Two-Hybrid Screen	31
Lauren Makuch	
1. Theory	32
2. Equipment	32
3. Materials	33

4. Protocol	35
5. Step 1 Small-Scale Transformation of Yeast with pDBLeu-X	37
6. Step 2 Two-Hybrid Screen	40
7. Step 3 Confirmation of Positive Interactors	43
8. Step 4 Plasmid Rescue from Yeast	45
9. Step 5 Electroporation of <i>E. coli</i> with Yeast DNA and Identification of Positive Interactors	47
10. Step 6 Back-Transformation of Yeast and Further Confirmation of Interactions	48
References	50
4. UV Cross-Linking of Interacting RNA and Protein in Cultured Cells	53
Emi Sei and Nicholas K. Conrad	
1. Theory	54
2. Equipment	55
3. Materials	56
4. Protocol	58
5. Step 1 UV Cross-Link RNA-Protein Complexes	59
6. Step 2 SDS Lysis of Cells	60
7. Step 3 Immunoprecipitation	62
8. Step 4 Proteinase K Treatment of RNA Samples	63
9. Step 5 RNA Analysis	65
10. Step 6 Protein Analysis	66
References	66
5. Analysis of RNA-Protein Interactions by Cell Mixing	67
Sarah H. Stubbs and Nicholas K. Conrad	
1. Theory	68
2. Equipment	70
3. Materials	71
4. Protocol	72
5. Step 1 Cell Mixing	73
6. Step 2 Cell Lysis	74
7. Step 3 Immunoprecipitation	75
8. Step 4 Proteinase K Treatment of RNA Samples	77
9. Step 5 Northern and Western Blot Analysis	79
References	80
Source References	80

6. General Protein-Protein Cross-Linking	81
Alice Alegria-Schaffer	
1. Theory	82
2. Equipment	82
3. Materials	82
4. Protocol	83
5. Step 1 Calculate the Amount of BS ³ to Use	83
6. Step 2 Protein Cross-Linking	85
References	87
7. Chromatin Immunoprecipitation and Multiplex Sequencing (ChIP-Seq) to Identify Global Transcription Factor Binding Sites in the Nematode <i>Caenorhabditis Elegans</i>	89
Cathleen M. Brdlik, Wei Niu, and Michael Snyder	
1. Theory	90
2. Equipment	95
3. Materials	96
4. Protocol	100
5. Step 1 Preparation of Extract from Formaldehyde-Fixed <i>Caenorhabditis elegans</i> Embryos and Larvae	100
6. Step 2 Washes and Collection of the Immunocomplexes and ChIP DNA Purification	102
7. Step 3 Library Preparation for Multiplex Sequencing Using the Illumina Genome Analyzer	104
Acknowledgments	110
References	110
8. PAR-CLIP (Photoactivatable Ribonucleoside-Enhanced Crosslinking and Immunoprecipitation): a Step-By-Step Protocol to the Transcriptome-Wide Identification of Binding Sites of RNA-Binding Proteins	113
Jessica Spitzer, Markus Hafner, Markus Landthaler, Manuel Ascano, Thalia Farazi, Greg Wardle, Jeff Nusbaum, Mohsen Khorshid, Lukas Burger, Mihaela Zavolan, and Thomas Tuschl	
1. Theory	115
2. Equipment	117
3. Materials	119
4. Protocol	129

5. Step 1 UV Crosslinking of 4-Thiouridine-Labeled Cells (Day 1)	131
6. Step 2 Preparation of Cell Lysate for Immunoprecipitation (Day 2)	134
7. Step 3 Preparation of the Magnetic Beads (Day 2)	136
8. Step 4 Immunoprecipitation and Second RNase T1 Treatment (Day 2)	136
9. Step 5 Dephosphorylation and Radiolabeling RNA Segments Crosslinked to Immunoprecipitated Proteins (Day 2)	138
10. Step 6 SDS-PAGE and Electroelution of Cross-Linked RNA-Protein Complexes from Gel Slices (Days 2 and 3)	139
11. Step 7 Proteinase K Digestion (Day 3)	143
12. Step 8 3'-Adapter Ligation for cDNA Library Preparation (Day 3 overnight, day 4, beginning of day 5)	145
13. Step 9 5'-Adapter Ligation for cDNA Library Preparation (Day 5, beginning of day 6)	148
14. Step 10 cDNA Library Preparation/Reverse Transcription (Day 6)	150
15. Step 11 PCR Amplification of cDNA Library & Sample Preparation for Sequencing (Day 6)	152
16. Step 12 Determination of Incorporation Levels of 4SU into Total RNA	156
References	160
Source References	160

9. Determining the RNA Specificity and Targets of RNA-Binding Proteins using a Three-Hybrid System **163**

Yvonne Y. Koh and Marvin Wickens

1. Theory	164
2. Equipment	167
3. Materials	167
4. Protocol	168
5. Step 1 Pilot Transformation to Determine Expected Transformation Efficiency	169
6. Step 2 Determine 3-AT Concentration to be Used in Selection	171
7. Step 3 Introduce the Hybrid RNA Library	172
8. Step 4 Assay β -Galactosidase Activity	174
9. Step 5 Cure the RNA Plasmid and Test Positives for Protein Dependence	175
10. Step 6 Isolate Plasmids for Autoactivation Test and Sequencing	176
11. Step 7 Determine Binding Specificity Using Mutant and Control Proteins	178
12. Step 8 Functional Tests or Additional Screens	180
References	180
Source References	181

10. Dissecting a Known RNA-Protein Interaction using a Yeast Three-Hybrid System	183
Yvonne Y. Koh and Marvin Wickens	
1. Theory	184
2. Equipment	186
3. Materials	186
4. Protocol	187
5. Step 1A Assaying Interactions: Qualitative Filter Assay for β -Galactosidase Activity	188
6. Step 1B Assaying Interactions: Quantitative Solution Assay for β -Galactosidase Activity	189
7. Step 1C Assaying Interactions: 3-Aminotriazole (3-AT) Resistance Assay	191
References	193
Source References	193
11. Identifying Proteins that Bind a Known RNA Sequence Using the Yeast Three-Hybrid System	195
Yvonne Y. Koh and Marvin Wickens	
1. Theory	196
2. Equipment	198
3. Materials	199
4. Protocol	200
5. Step 1 Pilot Transformation to Determine Expected Transformation Efficiency	200
6. Step 2 Determine 3-AT Concentration to be Used in Selection	203
7. Step 3 Introduce the cDNA Library	204
8. Step 4 Eliminate RNA-Independent False Positives by Colony Color	205
9. Step 5 Assay β -Galactosidase Activity	206
10. Step 6 Cure the RNA Plasmid and Test Positives for RNA Dependence	208
11. Step 7 Isolate Plasmids for Autoactivation Test and Sequencing	209
12. Step 8 Determine Binding Specificity Using Mutant and Control RNAs	211
13. Step 9 Functional Tests or Additional Screens	213
References	213
Source References	214
