IX. Lamina VIII	44
X. Lamina IX	44
XI. Area X	44
XII. Lateral Spinal Nucleus and Lateral Cervical Nucleus	44
References	44

I Vasculature

1 Cerebral Vascular System

Oscar U. Scremin

I. Introduction	3
II. Methodology	3
III. Cerebral Blood Vessels	4
IV. Spinal Cord Blood Vessels	28
V. Vascular Innervation	29
References	33

II Spinal Cord and Peripheral Nervous System

2 Spinal Cord Cytoarchitecture

Carl Molander · Gunnar Grant

I. Introduction	39
II. Lamina I	39
III. Lamina II	39
IV. Lamina III	43
V. Lamina IV	43
VI. Lamina V	43
VII. Lamina VI	43
VIII. Lamina VII	44

3 Substantia Gelatinosa of Spinal Cord

Alfredo Ribeiro-da-Silva

I. Introduction	47
II. Definition	47
III. Characteristics of Neurons of the Superficial Laminae of the Spinal Cord	48
IV. Ultrastructure of the Spinal Dorsal Horn	49
V. Neurochemistry of the Dorsal Horn	52
VI. Final Remarks	56
References	57

4 Primary Afferent Projections to the Spinal Cord

Gunnar Grant

I. Introduction	61
II. Projection of Primary Afferent Fibers to Different Laminae and Some Spinal Cord Nuclei	62
III. Somatotopic Organization of Primary Afferent Projections	63
References	64

5 Ascending and Descending Pathways in the Spinal Cord

David J. Tracey

I. Introduction	67
II. Ascending Pathways	67
III. Descending Pathways	72
IV. Summary	75
References	75

6 Autonomic Nervous System

Giorgio Gabella

I. Localization of Autonomic Ganglia	81
II. Structure of Autonomic Ganglia and Nerves	87
References	100

III Brain Stem and Cerebellum

7 Central Autonomic System

Clifford B. Saper

I. Introduction	107
II. Medullospinal Level: Reflex Control	109
III. Mesopontine Level: Modulation and Integration of Reflex Control and Arousal	113
IV. Forebrain Level: Behavioral and Metabolic Integration of Autonomic Control and Arousal	120
V. Summary and Conclusion	127
References	128

8 The Basic, Somatic, and Emotional Components of the Motor System in Mammals

Gert Holstege

I. Introduction	137
II. First or Basic Motor System	137
III. Second or Somatic Motor System	138
IV. Emotional Motor System	144
V. Conclusion	152
References	152

9 Reticular Formation: Cytoarchitecture, Transmitters, and Projections

Barbara E. Jones

I. Introduction	155
II. Cytoarchitecture	155
III. Transmitters	161
IV. Projections	164
V. Summary and Conclusions	169
References	169

10 Periaqueductal Gray

Alvin J. Beitz

I. Introduction	173
II. Cytoarchitecture	173
III. Connectivity	175
IV. Chemoarchitecture and Receptor Distribution	176
V. Functions	179
References	181

11 The Locus Coeruleus, A5 and A7 Noradrenergic Cell Groups

Gary Aston-Jones · Michael T. Shipley · Reinhard Grzanna

I. Introduction	183
II. Background and Functional Perspective	183
III. Cytoarchitecture	184
IV. Afferents to the Nucleus Locus Coeruleus	186
V. The Pericoerulear Region: The "Extranuclear LC"	194
VI. Efferent Projections of LC Neurons	197
VII. Other Metencephalic Noradrenergic Neurons (A5 and A7 Cell Groups)	205
VIII. Conclusions	206
References	206

12 Substantia Nigra

James H. Fallon · Sandra E. Loughlin

I. Introduction	215
II. Nuclei	215
III. Cytoarchitectonics	216
IV. Development	217
V. General Input and Output Patterns	217
VI. Receptors	223

VII. Neurotrophic Factors	228
VIII. Functional Role of the Nigro-Striatal System	228
References	232

13 Oromotor Nuclei

Joseph B. Travers

I. Introduction	239
II. Motor Trigeminal Nucleus	239
III. Facial Nucleus	242
IV. Hypoglossal Nucleus	245
V. Summary and Conclusions	250
References	250

14 Brain Stem Systems Involved in the Blink Reflex, Feeding Mechanisms, and Micturition

Gert Holstege · Bertil F. M. Blok ·
Gert J. ter Horst

I. Introduction	257
II. Brain Stem Systems Involved in the Blink Reflex	257
III. Feeding Mechanism	261
IV. The Neuronal Control of Micturition	265
References	271

15 Precerebellar Nuclei and Red Nucleus

Tom J. H. Ruigrok · Franca Cella

I. Introduction	277
II. Pontine Nuclei	277
III. Lateral Reticular Nucleus	281
IV. Inferior Olivary Nucleus	286
V. Red Nucleus	293
References	300

16 Cerebellum

Jan Voogd

I. Introduction	309
II. The Gross Anatomy of the Cerebellum	309
III. The Cerebellar Nuclei and Their Efferent Pathways	312
IV. Longitudinal, Zonal Organization of Purkinje Cells in the Cerebellar Cortex: The Corticonuclear and Corticovestibular Projections	321
V. Afferent Cerebellar Connections	332

VI. Conclusions	343
References	344

IV Forebrain

17 Anatomical Substrates of Hypothalamic Integration

Richard B. Simerly

I. Introduction	353
II. Morphological Organization of the Hypothalamus	353
III. Hypothalamic Integration	369
References	372

18 Hypothalamic Supraoptic and Paraventricular Nuclei

William E. Armstrong

I. Introduction	377
II. Pituitary Gland	377
III. Supraoptic Nucleus	378
IV. Paraventricular Nucleus	381
V. Accessory Magnocellular Neurosecretory Neurons	386
VI. Conclusion	387
References	387

19 Circumventricular Organs

Brian J. Oldfield · Michael J. McKinley

I. Introduction	391
II. General Features	391
III. Subfornical Organ	391
IV. Vascular Organ of the Lamina Terminalis	395
V. Area Postrema	397
VI. Median Eminence and Neurohypophysis	398
VII. Subcommissural Organ	399
VIII. Pineal Gland	399
IX. Choroid Plexus	400
References	400

20 Septum

Robert L. Jakab · Csaba Lanth

I. Introduction	405
II. Organization of the Septum	405

III. Connections of the Medial Septal Division	416	IV. Connections	600
IV. Connections of the Lateral Septal Division	418	References	614
V. Connections of the Posterior Septal Division	422		
VI. Intrinsic Septal Connections	422	24 Thalamus	
VII. Principal Neurons of the Septum	424	Joseph L. Price	
References	431	I. Introduction	629
		II. Morphological Description of Thalamic Nuclei	629
21 Hippocampal Formation		III. Principal "Relay" Nuclei	630
David G. Amaral · Menno P. Witter		IV. Midline and Intralaminar Nuclei	640
I. Introduction: General Features of the Rat Hippocampal Formation	443	V. Reticular Nucleus	644
II. Dentate Gyrus	450	References	645
III. Hippocampus	460		
IV. Overview of the Subiculum, Presubiculum, and Parasubiculum: Should the Subiculum, Presubiculum, and Parasubiculum be Grouped Together as the "Subicular Complex"?	467	25 Cortex: Areal and Laminar Structure	
V. Subiculum	468	Karl Zilles · Andreas Wree	
VI. Presubiculum	471	I. Introduction	649
VII. Parasubiculum	473	II. Transition Zone between Allo- and Isocortical Areas	649
VIII. Entorhinal Cortex	473	III. Isocortex	659
IX. Conclusions: The Organization of Hippocampal Circuitry and the Flow of Information Processing	483	IV. Regional and Laminar Patterns of Local Cerebral Glucose Utilization in the Cortex	667
X. Summary	485	V. Regional and Laminar Distributions of Neurotransmitters and Transmitter Receptors	675
References	486	References	678
22 Amygdala and Extended Amygdala		V Sensory Systems	
George F. Alheid · Jose S. de Olmos · Carlos A. Beltramino		26 Somatosensory System	
I. Introduction	495	David J. Tracey · Phil M. E. Waite	
II. Topography	507	I. Introduction	689
III. Cytoarchitecture	515	II. Somatosensory Receptors	689
IV. Comparison of the Nomenclature for the Amygdala and Extended Amygdala	558	III. Cell Bodies and Central Processes of Somatosensory Receptors	691
V. Concluding Remarks	571	IV. Ascending Spinal Pathways	692
References	572	V. Medullary Relay Nuclei	693
		VI. Somatosensory Thalamus	695
23 Basal Ganglia		VII. Somatosensory Cortex	696
L. Heimer · D. S. Zahm · George F. Alheid		VIII. Conclusion	700
I. Introduction	579	References	700
II. Evolving Concepts of Basal Ganglia Anatomy	580		
III. Topography, Cytoarchitecture, and Neurochemical Anatomy	589	27 Trigeminal Sensory System	
		Phil M. E. Waite · David J. Tracey	
		I. Introduction	705
		II. Sensory Trigeminal System in the Adult	705

III. Development of the Trigeminal System	714
References	717

28 Pain

William D. Willis · Karin N. Westlund ·
Susan M. Carlton

I. Introduction	725
II. Nociceptors	725
III. Dorsal Horn Interneurons	726
IV. Ascending Nociceptive Pathways	732
V. Thalamus and Cortex	735
VI. Descending Control Systems	735
VII. Plastic Changes in Spinal Cord	737
References	740

29 Gustatory System

Ralph Norgren

I. Introduction	751
II. Peripheral Anatomy	751
III. Central Organization	752
IV. Cytoarchitecture	763
V. Neurochemistry	765
VI. Conclusion	767
References	767

30 The Vestibular Nuclear Complex

Joseph A. Rubertone · William R. Mehler ·
Jan Voogd

I. Introduction	773
II. Topography and Cytoarchitecture of the Vestibular Nuclei	773
III. Afferent Connections of the Vestibular Nuclei and Associated Cell Groups	782
IV. Efferent Connections	786
V. Intrinsic Vestibular Connections	790
VI. Histochemical Observations	790
References	791

31 Auditory System

William R. Webster

I. Introduction	797
II. Cochlea	797
III. Cochlear Nuclei	800
IV. Superior Olivary Complex	802
V. Nuclei of the Lateral Lemniscus	807

VI. Inferior Colliculus	807
VII. Medial Geniculate Body	816
VIII. Auditory Cortex	819
IX. Neuropharmacology of the Rat Auditory Pathway	825
X. General Conclusions	826
References	827

32 Visual System

Ann Jervie Sefton · Bogdan Dreher

I. Introduction	833
II. Visual Pathways	834
III. Retinal Output	835
IV. Retino-Recipient Nuclei	839
V. Associated Visual Nuclei	865
VI. Visual Cortex	868
References	880

33 Olfactory System

Michael T. Shipley · John H. McLean ·
Matthew Ennis

I. Introduction	899
II. The Main Olfactory Bulb	902
III. Primary Olfactory Cortex	909
IV. The Accessory Olfactory System	917
V. "Nonolfactory" Modulatory Inputs to the Olfactory System	918
References	921

VI Neurotransmitters

34 Serotonin and Tachykinin Systems

Glenda Halliday · Antony Harding ·
George Paxinos

I. Introduction	929
II. Serotonin System	929
III. Tachykinin System	935
IV. Coexistence of Serotonin and Tachykinins	966
V. Functional Interaction between Serotonin and Tachykinins	967
References	969

35 Endogenous Opioid Systems

Sandra E. Loughlin · Frances M. Leslie ·
James H. Fallon

I. Introduction	975
II. Opioid Peptides	975
III. Opioid Receptors	988
IV. Conclusion	997
References	998

36 Cholinergic Neurons and Networks

Larry L. Butcher

I. Introduction	1003
II. Distribution of Cholinergic Somata	1003
III. Major Cholinergic Networks: Structurofunctional Considerations	1009
IV. Concluding Comments	1013
References	1013

37 Amino Acid Transmitters

Ole P. Ottersen · Ole P. Hjelle ·
Kirsten K. Osen · Jon H. Laake

I. Introduction	1017
II. Glutamate	1018
III. GABA	1023
IV. Glycine	1027
References	1032

VII Development

38 Neurogenesis and Neuronal Migration

Shirley A. Bayer · Joseph Altman

I. Introduction	1041
II. The Spinal Cord	1041

III. The Medulla	1043
IV. The Pons	1047
V. The Cerebellum and the Precerebellar Nuclei	1049
VI. The Mesencephalic Tegmentum	1052
VII. The Mesencephalic Tectum	1054
VIII. The Thalamus	1056
IX. The Epithalamus	1059
X. The Preoptic Area and the Hypothalamus	1059
XI. The Zona Incerta and the Subthalamus	1064
XII. The Basal Telencephalon	1065
XIII. The Septum	1069
XIV. The Cerebral Cortex	1070
XV. The Olfactory Bulb and Peduncle	1074
References	1076

39 Principles of Neurogenesis, Neuronal Migration, and Neural Circuit Formation

Shirley A. Bayer · Joseph Altman

I. Introduction	1079
II. The Neuroepithelium Contains a "Bauplan" of the Central Nervous System	1079
III. The Chronology of Neuron Production	1084
IV. Patterns of Neuronal Migration	1084
V. The Chronology of Neurogenesis and the Patterns of Neuronal Migration in Relation to the Maturation of Neural Circuits	1093
References	1096
