|--------------------------------------|------|
| CONTRIBUTORS TO VOLUME 207 | ix |
| PREFACE | xiii |

Section I. Modern Applications of Electrophysiological Techniques

| | | |
|---|---|-----|
| 1. Patch Clamp Techniques: An Overview | MICHAEL CAHALAN AND ERWIN NEHER | 3 |
| 2. Constructing a Patch Clamp Setup | RICHARD A. LEVIS AND JAMES L. RAE | 14 |
| 3. Glass Technology for Patch Clamp Electrodes | JAMES L. RAE AND RICHARD A. LEVIS | 66 |
| 4. Ion Channel Selectivity, Permeation, and Block | TED BEGENISICH | 92 |
| 5. Access Resistance and Space Clamp Problems Associated with Whole-Cell Patch Clamping | CLAY M. ARMSTRONG AND WILLIAM F. GILLY | 100 |
| 6. Correction for Liquid Junction Potentials in Patch Clamp Experiments | ERWIN NEHER | 123 |
| 7. Nonstationary Noise Analysis and Application to Patch Clamp Recordings | STEFAN H. HEINEMANN AND FRANCO CONTI | 131 |
| 8. Prevention of Rundown in Electrophysiological Recording | RICHARD HORN AND STEPHEN J. KORN | 149 |
| 9. Patch Voltage Clamping with Low-Resistance Seals: Loose Patch Clamp | WILLIAM M. ROBERTS AND WOLFHARD ALMERS | 155 |
| 10. Perfusing Patch Pipettes | J. M. TANG, J. WANG, AND R. S. EISENBERG | 176 |
| 11. Whole-Cell Recording of Calcium Channel Currents | BRUCE P. BEAN | 181 |
| 12. Recording from Calcium-Activated Potassium Channels | B. S. PALLOTTA, A. L. BLATZ, AND K. L. MAGLEBY | 194 |
| 13. Patch-Clamping Cells in Sliced Tissue Preparations | FRANCES A. EDWARDS AND ARTHUR KONNERTH | 208 |

Section II. Expression of Ion Channels

A. Expression of Ion Channels in *Xenopus* Oocytes

- | | | |
|---|---|-----|
| 14. <i>Xenopus</i> Oocyte Microinjection: From Gene to Protein | HERMONA SOREQ AND SHLOMO SEIDMAN | 225 |
| 15. Maintenance of <i>Xenopus laevis</i> and Oocyte Injection | ALAN L. GOLDIN | 266 |
| 16. Preparation of RNA for Injection into <i>Xenopus</i> Oocytes | ALAN L. GOLDIN AND KATUMI SUMIKAWA | 279 |
| 17. Tissue RNA as Source of Ion Channels and Receptors | TERRY P. SNUTCH AND GAIL MANDEL | 297 |
| 18. <i>In Vitro</i> Synthesis of RNA for Expression of Ion Channels in <i>Xenopus</i> Oocytes | RICHARD SWANSON AND KIMBERLY FOLANDER | 310 |
| 19. Electrophysiological Recording from <i>Xenopus</i> Oocytes | WALTER STÜHMER | 319 |
| 20. Use of Stage II-III <i>Xenopus</i> Oocytes to Study Voltage-Dependent Ion Channels | DOUGLAS S. KRAFTE AND HENRY A. LESTER | 339 |
| 21. Intracellular Perfusion of <i>Xenopus</i> Oocytes | NATHAN DASCAL, GAVIN CHILCOTT, AND HENRY A. LESTER | 345 |
| 22. Recording of Gating Currents from <i>Xenopus</i> Oocytes and Gating Noise Analysis | STEFAN H. HEINEMANN, FRANCO CONTI, AND WALTER STÜHMER | 353 |
| 23. Ligand-Binding Assays in <i>Xenopus</i> Oocytes | AMY L. BULLER AND MICHAEL M. WHITE | 368 |
| 24. Expression of Gap Junctional Proteins in <i>Xenopus</i> Oocyte Pairs | LISA EBIHARA | 376 |
| 25. Regulation of Intracellular Calcium Activity in <i>Xenopus</i> Oocytes | YORAM ORON AND NATHAN DASCAL | 381 |

B. Expression of Ion Channels Using Other Systems

- | | | |
|---|---|-----|
| 26. Stable Expression of Heterologous Multisubunit Protein Complexes Established by Calcium Phosphate- or Lipid-Mediated Cotransfection | TONI CLAUDIO | 391 |
| 27. Vaccinia Virus as Vector to Express Ion Channel Genes | ANDREAS KARSCHIN, BARBARA A. THORNE, GARY THOMAS, AND HENRY A. LESTER | 408 |
| 28. Expression of Ion Channels in Cultured Cells Using Baculovirus | ALEXANDER KAMB, JUAN I. KORENBROT, AND JAN KITAJEWSKI | 423 |

- | | | |
|--|---|-----|
| 29. Probing Molecular Structure and Structural Changes of Voltage-Gated Channel by Expressing Mutant Channels in Yeast and Reconstituting Them into Planar Membranes | M. COLOMBINI, S. PENG, E. BLACHLY-DYSON, AND M. FORTE | 432 |
|--|---|-----|

Section III. Reconstitution of Ion Channels in Lipid Bilayers

- | | | |
|--|--|-----|
| 30. Insertion of Ion Channels into Planar Lipid Bilayers by Vesicle Fusion | PEDRO LABARCA AND RAMÓN LATORRE | 447 |
| 31. Planar Lipid Bilayers on Patch Pipettes: Bilayer Formation and Ion Channel Incorporation | BARBARA E. EHRLICH | 463 |
| 32. Surface Charge Effects on Ion Conduction in Ion Channels | RAMÓN LATORRE, PEDRO LABARCA, AND DAVID NARANJO | 471 |
| 33. Determination of Ion Permeability by Fluorescence Quenching | ANA MARIA GARCIA | 501 |
| 34. Synthetic Peptides and Proteins as Models for Pore-Forming Structure of Channel Proteins | ANNE GROVE, TAKEO IWAMOTO, MYRTA S. MONTAL, JOHN M. TOMICH, AND MAURICIO MONTAL | 510 |

Section IV. Purification of Ion Channel Proteins and Genes

- | | | |
|---|--|-----|
| 35. Purification and Reconstitution of Skeletal Muscle Calcium Channels | VINCENT FLORIO, JÖRG STRIESSNIG AND WILLIAM A. CATTERALL | 529 |
| 36. Purification and Reconstitution of Nicotinic Acetylcholine Receptor | AMITABH CHAK AND ARTHUR KARLIN | 546 |
| 37. Purification, Affinity Labeling, and Reconstitution of Voltage-Sensitive Potassium Channels | HUBERT REHM AND MICHEL LAZDUNSKI | 556 |
| 38. Affinity Purification and Reconstitution of Calcium-Activated Potassium Channels | DAN A. KLÆRKE AND PETER L. JØRGENSEN | 564 |
| 39. Assay and Purification of Neuronal Receptors for Inositol 1,4,5-Trisphosphate | SUNIL R. HINGORANI AND WILLIAM S. AGNEW | 573 |
| 40. Isolation of Ion Channel Genes by Expression Cloning in <i>Xenopus</i> Oocytes | GEORGES C. FRECH AND ROLF H. JOHO | 592 |
| 41. Hybrid Arrest Technique to Test for Functional Roles of Cloned cDNAs and to Identify Homologies among Ion Channel Genes | ILANA LOTAN | 605 |
| 42. Cloning of Ion Channel Gene Families Using the Polymerase Chain Reaction | ELEAZAR VEGA-SAENZ DE MIERA AND JEN-WEI LIN | 613 |
| 43. Overview of Toxins and Drugs as Tools to Study Excitable Membrane Ion Channels: I. Voltage-Activated Channels | TOSHIO NARAHASHI AND MARTIN D. HERMAN | 620 |

| | | |
|--|---|-----|
| 44. Overview of Toxins and Drugs as Tools to Study Excitable Membrane Ion Channels: II. Transmitter-Activated Channels | TOSHIO NARAHASHI | 643 |
| 45. Biosynthesis of Ion Channels in Cell-Free and Metabolically Labeled Cell Systems | WILLIAM B. THORNHILL AND S. ROCK LEVINSON | 659 |
| Section V. Recording of Ion Channels of Cellular Organelles and Microorganisms | | |
| 46. Patch Clamp Techniques to Study Ion Channels from Organelles | BERNHARD U. KELLER AND RAINER HEDRICH | 673 |
| 47. Patch Clamp Studies of Microbial Ion Channels | YOSHIRO SAIMI, BORIS MARTINAC, ANNE H. DELCOUR, PETER V. MINORSKY, MICHAEL C. GUSTIN, MICHAEL R. CULBERTSON, JULIUS ADLER, AND CHING KUNG | 681 |
| 48. Studies on Intact Sarcoplasmic Reticulum: Patch Clamp Recording and Tension Measurement in Lobster Split Muscle Fibers | J. M. TANG, J. WANG, AND R. S. EISENBERG | 692 |
| 49. Planar Bilayer Recording of Ryanodine Receptors of Sarcoplasmic Reticulum | ROBERTO CORONADO, SEIKO KAWANO, CHEOL J. LEE, CARMEN VALDIVIA AND HECTOR H. VALDIVIA | 699 |
| Section VI. Data Storage and Analysis | | |
| 50. Software for Acquisition and Analysis of Ion Channel Data: Choices, Tasks, and Strategies | ROBERT J. FRENCH AND WILLIAM F. WONDERLIN | 711 |
| 51. Stationary Single-Channel Analysis | MEYER B. JACKSON | 729 |
| 52. Analysis of Nonstationary Single-Channel Currents | F. J. SIGWORTH AND J. ZHOU | 746 |
| 53. Preventing Artifacts and Reducing Errors in Single-Channel Analysis | K. L. MAGLEBY | 763 |
| 54. Analysis of Drug Action at Single-Channel Level | EDWARD MOCZYDLOWSKI | 791 |
| 55. Analysis of Sodium Channel Tail Currents | GABRIEL COTA, AND CLAY M. ARMSTRONG | 806 |
| 56. Calculation of Ion Currents from Energy Profiles and Energy Profiles from Ion Currents in Multi-barrier, Multisite, Multioccupancy Channel Model | OSVALDO ALVAREZ, ALFREDO VILLARROEL, AND GEORGE EISENMAN | 816 |
| AUTHOR INDEX | | 855 |
| SUBJECT INDEX | | 887 |
