

CONTENTS

<i>Contributors</i>	vii
<i>Preface</i>	ix
1. Type-3 Copper Proteins: Recent Advances on Polyphenol Oxidases	1
Cornelia Kaintz, Stephan Gerhard Mauracher, and Annette Rempel	
1. Introduction	2
2. Primary Structure and Molecular Weights of PPOs	7
3. Oxo Complex	17
4. X-ray Crystallographic Structural Data of PPOs and Hemocyanins	22
5. Conclusions and Outlook	30
Acknowledgments	30
References	30
2. Biophysical Studies of Matrix Metalloproteinase/Triple-Helix Complexes	37
Gregg B. Fields	
1. MMPs and Collagen Hydrolysis	37
2. Structures of Full-Length, Collagenolytic MMPs in Solution and in the Solid State	38
3. Structural Evaluation of MMP Interactions with Collagen	41
4. Mechanism of Collagenolysis	43
5. Heterogeneity in MMP Structures	46
Acknowledgment	47
References	47
3. Catalytic Mechanisms of Metallohydrolases Containing Two Metal Ions	49
Nataša Mitić, Manfredi Miraula, Christopher Selleck, Kieran S. Hadler, Elena Uribe, Marcelo M. Pedroso, and Gerhard Schenk	
1. Introduction	50
2. Metallo- β -Lactamases, Major Culprits in the Emergence of Antibiotic Resistance	50
3. Methionine Aminopeptidase, a Target for Novel Anticancer Drugs	57
4. Glycerophosphodiesterase, a Very Promiscuous Potential Bioremediator	60
5. PAP, an Alternative Target to Treat Osteoporosis	65

6. Conclusions and Outlook: Agmatinase, an Emerging Target for Biotechnological Applications	69
Acknowledgments	71
References	72
4. Applications of Quantum Mechanical/Molecular Mechanical Methods to the Chemical Insertion Step of DNA and RNA Polymerization	83
Lalith Perera, William A. Beard, Lee G. Pedersen, and Samuel H. Wilson	
1. Introduction	85
2. Methods for Describing Reactive Pathways	85
3. DNA Polymerase β	87
4. Application of QM/MM to Systems Similar to Pol β	98
5. RNA Polymerase	103
6. Thoughts for Future QM/MM Simulations on Ternary Substrate Complexes of Nucleic Acid Polymerases	106
7. Conclusions	109
Acknowledgments	109
References	109
5. Monitoring the Biomolecular Interactions and the Activity of Zn-Containing Enzymes Involved in Conformational Diseases: Experimental Methods for Therapeutic Purposes	115
Giuseppe Grasso	
1. Zn-Metalloproteases and Conformational Diseases	116
2. Analytical Techniques Used to Study ZnMPs-Substrate/Inhibitors Interactions	120
3. Conclusions and Future Perspectives	135
References	135
<i>Author Index</i>	<i>143</i>
<i>Subject Index</i>	<i>159</i>

CONTRIBUTORS

William A. Beard

Laboratory of Structural Biology, National Institution of Environmental Health Sciences,
Research Triangle Park, North Carolina, USA

Gregg B. Fields

Torrey Pines Institute for Molecular Studies, Port St. Lucie, Florida, USA

Giuseppe Grasso

Dipartimento di Scienze Chimiche, Università degli Studi di Catania, Catania, Italy

Kieran S. Hadler

School of Chemistry and Molecular Biosciences, The University of Queensland, Brisbane,
Queensland, Australia

Cornelia Kaintz

Institut für Biophysikalische Chemie, Fakultät für Chemie, Universität Wien, 1090-Wien,
Austria

Stephan Gerhard Mauracher

Institut für Biophysikalische Chemie, Fakultät für Chemie, Universität Wien, 1090-Wien,
Austria

Manfredi Miraula

Department of Chemistry, National University of Ireland, Maynooth, Maynooth, Co.
Kildare, Ireland, and School of Chemistry and Molecular Biosciences, The University of
Queensland, Brisbane, Queensland, Australia

Nataša Mitić

Department of Chemistry, National University of Ireland, Maynooth, Maynooth, Co.
Kildare, Ireland

Lee G. Pedersen

Department of Chemistry, University of North Carolina at Chapel Hill, Chapel Hill,
North Carolina, USA

Marcelo M. Pedroso

School of Chemistry and Molecular Biosciences, The University of Queensland, Brisbane,
Queensland, Australia

Lalith Perera

Laboratory of Structural Biology, National Institution of Environmental Health Sciences,
Research Triangle Park, North Carolina, USA

Annette Rempel

Institut für Biophysikalische Chemie, Fakultät für Chemie, Universität Wien, 1090-Wien,
Austria

Gerhard Schenk

School of Chemistry and Molecular Biosciences, The University of Queensland, Brisbane,
Queensland, Australia
