1. Structure and Function of POTRA Domains of Omp85/TPS Superfamily	1
Richard F. Simmerman, Ashita M. Dave, and Barry D. Bruce	
1. Introduction	2
2. Omp85/TPS Superfamily Architecture	5
3. Function of Omp85 Family of Proteins	10
4. Functions of Two-Partner Secretion B Proteins	13
5. Phototrophic Members of Omp85/TPS	15
6. POTRA Domains Mode of Action	22
7. Concluding Remarks	26
References	27
2. Molecular Cell Biology and Immunobiology of Mammalian Rod/Ring Structures	35
Wendy C. Carcamo, S. John Calise, Carlos A. von Mühlen, Minoru Satoh, and Edward K.L. Chan	
1. Introduction	36
2. Conserved RR Structures Across Species	38
3. Known Components of RR	45
4. Biological Function of RR	54
5. Immunobiology of RR—Autoimmune Response	59
6. Concluding Remarks and Future Perspectives	66
Acknowledgments	67
References	67
3. Modulation of Glycan Recognition by Clustered Saccharide Patches	75
Miriam Cohen and Ajit Varki	
1. Introduction: Glycome Complexity in Nature	76
2. Glycan Recognition by GBPs	77
3. Concept of CSPs	79
4. Evidence for CSPs on Heavily Glycosylated Proteins	80

5. Clustered Patches of Sialylated Gangliosides on Cell Surfaces	88
6. Clustered Patches of Sialylated Glycoproteins on Cell Surfaces	92
7. Enzyme Recognition of Clustered Glycans: O-Sialoglycoprotein Endopeptidase	93
8. CSPs on Pathogens	95
9. Glycosynapses: Cell Interactions and Signaling via CSPs	99
10. Recognition of Combined Saccharide–Peptide Patches	101
11. Experimental Recreation of CSPs	104
12. Conclusions and Perspectives	109
Acknowledgments	111
References	111
4. New Insights into the Molecular Mechanisms of Mitosis and Cytokinesis in Trypanosomes	127
Qing Zhou, Huiqing Hu, and Ziyin Li	
1. Introduction	128
2. Cell Structure of <i>T. brucei</i>	129
3. Cell Cycle of <i>T. brucei</i>	131
4. Regulation of Mitosis	142
5. Mechanisms of Cytokinesis	149
6. Conclusions and Perspectives	157
Acknowledgments	158
References	158
5. Reprogramming and Carcinogenesis—Parallels and Distinctions	167
Agata M. Wasik, Jerzy Grabarek, Aleksandar Pantovic, Artur Cieřlar-Pobuda, Hamid R. Asgari, Caspar Bundgaard-Nielsen, Mehrdad Rafat, Ian M.C. Dixon, Saeid Ghavami, and Marek J. Łos	
1. Introduction	168
2. Overview of Reprogramming Methods	169
3. Reprogramming, Antiproliferative Response, Apoptosis, and Senescence	172
4. Reprogramming and Autophagy	177
5. Reprogramming Factors and Carcinogenesis	180
6. Stemness Factors as Transcription Factors—Effects in Transformation and Reprogramming	183
7. Differences and Similarities between iPS Cells and CSC	184
8. Interaction of Biomaterials with Cells	188
9. Closing Remarks	192
Acknowledgments	193
References	193

6. New Insights into Functions, Regulation, and Pathological Roles of Tight Junctions in Kidney Tubular Epithelium	205
Katalin Szaszi and Yasaman Amoozadeh	
1. Introduction	206
2. Structure and Function of TJs	209
3. "Nonclassic" Functions of TJs	231
4. Regulation of TJs	237
5. Kidney Disease and TJs	244
6. Concluding Remarks	253
Acknowledgments	254
References	254
7. Making of a Retinal Cell: Insights into Retinal Cell-Fate Determination	273
Jillian J. Goetz, Caitlin Farris, Rebecca Chowdhury, and Jeffrey M. Trimarchi	
1. Introduction	274
2. Retinal Cell-Fate Specification	278
3. Extrinsic Signaling	282
4. Intrinsic Signals and Retinal Development	289
5. Recent Discoveries Contributing to Retinal Fate Decisions	298
6. "Omics" Approaches to Understanding Retinal Cell-Fate Decisions	303
7. Additional Factors Contributing to Retinal Fate Determination	306
8. Recent Perspectives	308
References	311
8. Adhesion Networks of Cnidarians: A Postgenomic View	323
Richard P. Tucker and Josephine C. Adams	
1. Introduction	324
2. Cnidarian Genomes	328
3. The Anatomy of <i>N. vectensis</i> and <i>Hydra</i> Polyps	330
4. ECM in Cnidarians	333
5. Functional Importance of Cell-ECM Interactions for Tissue Organization and Regeneration in Cnidarians	348
6. Cell-Cell Adhesion Molecules in Cnidarians	351
7. Conclusions and Future Directions	367
Acknowledgment	369
References	369
Index	379
