Preface

xi

1. Systems Biology of Monovalent Cation Homeostasis in Yeast: The Translucent Contribution

1

Joaquín Ariño, Ebru Aydar, Samuel Drulhe, Daniel Ganser, Jesús Jorrín, Matthias Kahm, Falko Krause, Silvia Petrezsélyová, Lynne Yenush, Olga Zimmermannová, G. Paul H. van Heusden, Maik Kschischo, Jost Ludwig, Chris Palmer, José Ramos, and Hana Sychrová

1. Translucent 1 and 2, a Story of Collaborative Learning	3
2. Overview of Alkali-Metal-Cation Transporters Contributing to Potassium Homeostasis in <i>S. cerevisiae</i>	5
3. Setting Strains, Methods, Reagents and Standards	10
4. Potassium Homeostasis in <i>S. cerevisiae</i> : An Omics Approach	25
5. Functional Consequences of Altered Potassium Homeostasis	33
6. Monovalent Cation Homeostasis: Regulatory Issues	34
7. Mathematical Modelling of Ion Regulation	43
8. Data Management	51
9. Conclusions	53
Acknowledgements	55
References	55

2. Towards a Systems Level Understanding of the Oxygen Response of *Escherichia coli*

65

Katja Bettenbrock, Hao Bai, Michael Ederer, Jeffrey Green, Klaas J. Hellingwerf, Michael Holcombe, Samantha Kunz, Matthew D. Rolfe, Guido Sanguinetti, Oliver Sawodny, Poonam Sharma, Sonja Steinsiek, and Robert K. Poole

1. Introduction	67
2. The Metabolic Modes of <i>E. coli</i> and Oxygen Limitation	68
3. Effects of Oxygen Availability on <i>E. coli</i> Gene Expression	78
4. Spatial Organization of the <i>E. coli</i> Cell Influences ArcA and FNR Activities	95
5. Conclusions	104
Acknowledgements	107
References	108

3. The Silicon Trypanosome: A Test Case of Iterative Model Extension in Systems Biology	115
Fiona Achcar, Abeer Fadda, Jurgen R. Haanstra, Eduard J. Kerkhoven, Dong-Hyun Kim, Alejandro E. Leroux, Theodore Papamarkou, Federico Rojas, Barbara M. Bakker, Michael P. Barrett, Christine Clayton, Mark Girolami, R. Luise Krauth-Siegel, Keith R. Matthews, and Rainer Breitling	
1. Introduction	116
2. Uncertainty in the Glycolysis Model	118
3. Metabolic Extensions of the Model	125
4. Transcription/Translation Extensions of the Model	130
5. Experimental Data to Reduce Model Uncertainty and Refine Predictions	133
6. Conclusion	138
Acknowledgements	140
References	140
Author Index	145
Subject Index	155
